3. That the State Board hereby directs the Taylorsville County Service Area to include in its Facilities Plan a discussion and analysis of all alternative solutions to its water quality problems including, but not limited to, construction of traditional community wastewater collection and treatment facilities, establishment of a septic tank maintenance district, institution of a septic tank rehabilitation program, and installation of alternative individual disposal systems; and
4. That no grant for Step 2 or Step 3 work be given for the Taylorsville County Service Area wastewater treatment facilities project until the above alternative solutions are studied and analyzed to the satisfaction of the Division of Water Quality.
