

STATE WATER RESOURCES CONTROL BOARD
RESOLUTION NO. 78-6

AUTHORIZING NEGOTIATION AND EXECUTION OF AN AGREEMENT
WITH THE UNIVERSITY OF CALIFORNIA, DAVIS, FOR A
DEMONSTRATION OF OVERLAND FLOW TREATMENT PROCESS FOR
TREATMENT OF PRIMARY TREATED MUNICIPAL WASTEWATER

WHEREAS:

1. The increasing numbers of small communities becoming eligible for Clean Water Grant funds necessitate consideration of alternative low-cost treatment processes.
2. The cost of an overland flow process is substantially less than conventional in-plant treatment processes providing a similar degree of pollutant removal.
3. Well-documented design criteria for overland flow are not available and this contributes to the reluctance of many communities to utilize this low-cost process.
4. The University of California at Davis proposes to develop a rational approach to the design of an overland flow process and demonstrate this process performance in treatment of primary treated municipal wastewater.

THEREFORE BE IT RESOLVED:

That the State Board authorize the Executive Director to negotiate and execute an agreement with the University of California at Davis for thirty-three (33) months in an amount not to exceed \$253,200 for a demonstration of Overland Flow Treatment Process for Treatment of Primary Treated Municipal Wastewater.

CERTIFICATION

The undersigned, Executive Director of the State Water Resources Control Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on February 14, 1978.

Executive Director
