1. The State Board has the responsibility to coordinate water quality-related investigations of State agencies and to conduct necessary surveillance and monitoring activities.
2. The State Board, with the concurrence of the Regional Boards, has completed development and design of a statewide monitoring network and has implemented portions of that network.

Provided, however, that the Executive Director either shall not execute such an agreement until funds have been secured for this program, or shall make such agreement subject to the availability of funds for Fiscal Year 1980-81.
