

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD

In the Matter of Request for Review)
of Progress in Abatement of Gasoline)
Spill - Glendale, California)

Order No. 70-10

ORDER AMENDING ORDER NO. 70-8

In Order No. 70-8, adopted on September 3, 1970, the Board concluded that the gasoline spill in the vicinity of Glendale had been stopped, the quality of water being produced from the ground had not been adversely affected, the abatement program priorities were appropriate, substantial abatement progress had been realized, and there was need to maintain and expedite construction of additional containment, observation, and skimming wells.

Information received by the Board since September 3 indicates that Western Oil and Gas Association is continuing to maintain and expedite a satisfactory cleanup and abatement program. For this reason and because Mobil Oil Corporation was not notified that it could appear and submit evidence at the meeting held by the Board on August 10, and did not do so, that portion of Order No. 70-8 which contains directions to the regional board is amended to read:

The California Regional Water Quality Control Board, Los Angeles Region, is advised that it should:

1. Take such action as is necessary to insure that maximum measures to clean up and abate the effects of the gasoline spill are continued.

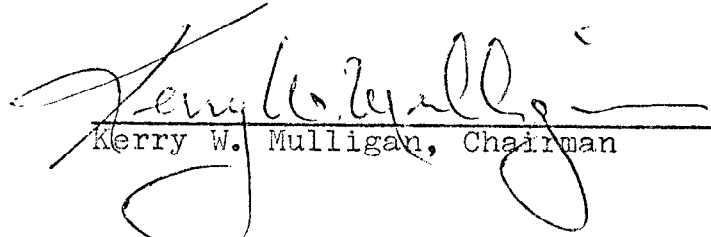

70-10

2. Require from such persons and at such intervals as the regional board deems appropriate progress reports of cleanup and abatement activities, and make such reports available to the public.

In all other respects Order No. 70-8 is affirmed.

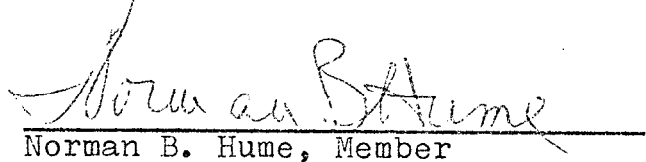

Adopted as the order of the State Water Resources Control Board at a meeting duly called and held at Sacramento, California.

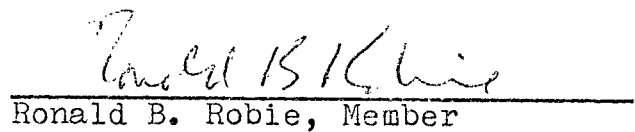

Dated: October 22, 1970
