### PRECEDENTIAL DECISION

The Los Angeles Regional Water Quality Control Board issued a National Pollutant Discharge Elimination System permit to Boeing Company for its Santa Susana Field Laboratory in 2004, and amended the permit in 2006. Boeing challenged monitoring requirements and numeric effluent limitations that are more stringent, or include different analytic methods, than in Boeing's 1998 permit. Boeing requested a stay of many of the numeric effluent limitations in its permit.

In this precedential order, the State Water Resources Control Board concludes that Boeing did not provide evidence adequate to support the stay request. In particular, Boeing did not prove that it will suffer substantial harm pending review of its petitions on the merits.
