Being we just received our letter from you people on Friday, June 12th - it would be pretty difficult to make your June 11th drop-dead date to respond in writing.

I hope you will take into consideration the people who live in the Russian River watershed and are very careful with the water supply. We are not FISH. Fish are pretty hardy and will handle many different changes.

My question - how are we going to report our usage? A meter on our well? Who puts the meter on the well?

Thank you,  
Amy
