**Subject:** Adoption of Emergency Regulation for Russian River Tributaries

Dear Chairwoman Marcus and members of the Board,

We are writing to express our support for the recommendations contained in the comments of Trout Unlimited, the Nature Conservancy, and California Trout regarding the State Water Resources Control Board's consideration of a proposed resolution to adopt a drought-related emergency regulation requiring enhanced water conservation and additional water user information for the protection of specific fisheries in tributaries to the Russian River. We agree that the proposed regulation is not only appropriate but should be applied to other coastal areas with similar fisheries concerns.

sincerely,

Gary Bobker, Program Director
