Subject: 2/2/16 Board Meeting

i would ask that you reevaluate the decrease to 33%. We have done everything possible this year to reduce our water consumption.... Toilet low flow upgrade, low flow faucet, sod removal with new drought tolerant plants and new drip system. We would prefer that you wait a couple of months for you evaluation until we know the actual status of the water levels after having had so much rain and snow in the Sierras.

Thank you,
Alicia Crancer McCormack
