**Subject:** 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

To Whom It May Concern:

As concerned citizens who have been affected by existing emergency water conservation measures, we feel that the Feb 2 date is far too early to evaluate whether or not to continue current restriction mandates. Instead, it would be much more realistic to delay consideration until April 1. At that time, our water supply conditions would be much clearer and the Board could react accordingly. We still have a lot of winter weather ahead of us; therefore, please delay this vote until you have an accurate picture of our water supply conditions.

Thank you,

Barry and Toney Schlesinger  
Granite Bay, CA
