**Subject:** 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

Dear Board,

With regard to your consideration to implement continued emergency conservation standards at the beginning of February, I strongly urge you to move your consideration of this matter to at least April. With the consistent storms, snow in the mountains, and steady rain, making any decisions about keeping emergency conservation regulations in place now is misguided. We will know far better about where we are with our water supply in the Spring. I oppose any decision to decide this critical matter at the February meeting.

Thank you, and thank you for all your work.
