Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

To Whom it May Concern:

I live in the San Juan Water District area. I write to express my concern about the Board considering requiring San Juan customers to continue conserving at a 33% reduction over 2013. That type of a decision is premature, given the recent storms and long term forecast of wet wet weather. Furthermore, residential water savings are a drop in the bucket (pun intended) as compared to the massive amount (80%) of water use that goes to agriculture.
