Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

To Whom it May Concern:

Implementing conservation requirements in February, before you have a chance to really predict the water conditions for the year is not only unfair to the residents of California, it is irresponsible. There is no reason that the Board should evaluate this matter so early in the year.

On behalf of Johnson Ranch Management, we strongly urge you to reconsider your position and evaluate the water restrictions in April to better serve the state.

Respectfully,

Jennifer Thompson, CCAM, CMCA, AMS
