Subject: Water Conservation Extensions for Calif

Although we have had some welcomed but slight rainfall, I fully support as a citizen the extension of the all water conservation restrictions in urban and ALL parts of Calif, and frankly through the full year of 2016! I also would suggest that Jerry Brown and Calif. Water Boards be asked to spend some money on better advertising and educating the Calif population (especially in rich neighborhoods of LA) that water conservation by all households and businesses is *absolutely necessary for the future* and that the set restrictions shall be monitored. We have no assurance or firm indications that in any way the drought will not also be extended!!
