Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

Dear State Water Board,

Regarding your current reduction requirement, I believe that the reevaluation of water supply should take place in April. Current conditions, including snow pack in the Sierras, and our current seasonal rain, should be taken into account for the entire rainy season before considering reduction requirements. Make no mistake that I am, and my neighbors are, concerned about the state's drought issues. We know that one rainy season will not solve California's water issues, but calm heads and reason must prevail.

Sincerely,

Katherine Boase

Resident, Granite Bay, California
