Subject: 2/2/16 Board meeting (conservation Extended Emergency Regulation)

Dear Board members:

Rather than impose additional onerous mandatory water use reduction regulations (33%), would you please defer imposition of an extended reduction until you have had time, in April, to reevaluate area water needs in light of an abundant snowpack, which might prove adequate to meet both immediate and future needs. Several lovely large redwood and oak trees on our property were severely stressed by the 36% reduction. A 33% deprivation of water for another year will likely send them over the edge.

Thank you.

Regards,

Michael Gaedke, D.D.S.
