**Subject:** "2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)."

To Whom It Concerns:

As a resident of Granite Bay and customer of San Juan WD, I feel the 33% reduction requirement is too high and unfair for those in this area. We have met our 36% reduction and are acutely aware of the drought issue since we live near and see Folsom Lake regularly. Please consider the fairness and your measurement criteria before making this drastic decision. Thank you!
