Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

Dear Clerk of the California State Water Resources Control Board:

The Los Angeles County Department of Public Works, Waterworks Division, oversees the Los Angeles County Waterworks Districts. We have the following comments regarding the revisions to the Draft Emergency Conservation Regulation for 2016:

1. The Los Angeles County Waterworks Districts support and appreciate the proposed Climate Adjustment credit.
2. The Districts continue to urge the State Water Resources Control Board to consider credits for water suppliers with a majority of customers located in Very High Fire Hazard Severity Zones formally designated by the California Department of Forestry and Fire Protection.

Thank you for your considering these comments.

Paul H. Maselbas, P.E.
