Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation).

Dear board members

Please think carefully about setting any revised conservation goals at your next meeting. Clearly we're being blessed by el Nino with rain and snow beyond normal. I realize the drought will take years of good rain to replenish aquifers, but setting a high bar at the 2/2 meeting may prove silly if we have more than enough snow in the sierra. Please wait till the end of the rainy season to set our conservation targets.

truly yours,

Peter Anderson
