**Subject:** 02/02/16 Board Meeting (Conservation Extended Emergency Regulation)

To Whom it May Concern:

We are writing to you as a resident of the City of Folsom and a customer of San Juan Water District. It has come to our attention that the State Water Resource Boards is considering drafting regulation that would require San Juan Water District to enforce a reduction to 33% - down from the current reduction of 36%.

To issue this requirement in February makes no sense due the current climate and rainfall/snow level we are experiencing. It would be more relevant to make that decision, which will impact thousands of customers, at a later date. We ask that you reconsider this decision until April, 2016, when the state of our water situation will be more evident.

As concerned citizens, this seems like a more logical and prudent step to take to fairly access our water conservation needs.

Thank you for your consideration,

Richard and Kathleen Garmsen
