Subject: 2/2/16

State Water Board,

I am a Homeowner in the San Juan Water District. We have worked hard and been successful at meeting the required 33% reduction in usage. We understand the future required reduction amount is going to be reviewed and decided on 2/2/16. With a greater amount of rain fall already this season and healthy snow levels and more of each expected we request you delay an opinion on further mandated reductions until April when we can more accurately determine the need to do so.

Thank you,

Susan Tennyson
