Should the reference to "April 2016" in paragraph 15 of the draft resolution be "April 2017"?

As of January 15, 2017, the state has experienced significant snow and rainfall in December and January, causing many of the state's reservoirs to shift to flood-control operations; however, groundwater storage remains depleted in many areas due to the continued impact of prolonged drought, precipitation cannot be counted on to continue, and snowpack levels, while above average for the current time of year, are subject to rapid reductions as seen in 2016 and before. The full picture of the state's hydrologic water conditions for 2016/2017 remains unclear and subject to a number of variables at least until **April 2016**;
