Background

The State Water Board established the CUL, T-SUB, and SUB beneficial uses in Resolution No. 2017-0027, which approved “Part 2 of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries of California (ISWEBE Plan)— Tribal and Subsistence Fishing Beneficial Uses and Mercury Provisions” (Statewide Mercury Provisions) for use by the State Water Board and nine regional Water Boards in their water quality control plans. The CUL beneficial use reflects uses of water that support the cultural, spiritual, and traditional ways of living by California Native American Tribes. The Tribal Subsistence Fishing and Subsistence Fishing beneficial uses recognize use of some surface waters by populations that are likely to consume more fish than the average recreational angler in California. Furthermore, this Basin Plan Amendment project aligns with the San Francisco Bay Water Board’s 2024 Triennial Review, which identified designation of the CUL, T-SUB, and SUB beneficial uses as the highest priority Basin Plan project.

This Basin Plan Amendment serves as the foundational first step for this priority project. Designations of these beneficial use definitions to specific water bodies will be undertaken in separate processes in future Basin Plan amendment(s).

Stay Informed

The State Water Board will separately publish an agenda for the meeting at which it will consider adopting a resolution approving the Basin Plan Amendment. Oral comments at the State Water Board meeting generally will be limited to a summary of the written comments submitted during the written comment period. Persons interested in receiving notice of the meeting at which the State Water Board will consider approving the Basin Plan Amendment must subscribe to the Regional Water Board’s email distribution list. Persons who require notice by regular mail must submit such request to the San Francisco Bay Water Board contact identified below.
