Re: Los Osos Waste Water System

To whom it may concern,

I have been a resident of Los Osos for over 15 years. I support the new C. S. D. who is trying to REDUCE the price of a waste water system for the 5,000 homes in the prohibition zone in which my husband and I reside.

The former C.S.D. only tried to make things easy for a certain category of people, mostly real-estate developers and other "self-interests parties". It was their decision (the former C.S.D.) to start the construction of the sewer before the people could vote on the location. It was VOTED to be moved by the PEOPLE of Los Osos.

As a taxpayer and on a limited income, I am begging you to work out a solution with our new C.S.D. to forgive any fines connected with the project.

Sincerely,

Elizabeth E. Allebe
