Dear Mr Young

My understanding of the laws governing a waste water project were designed to protect our water, the bay and the people who have to pay for it by making it affordable. The project developed by our recelled C.S.D. failed in all of these categories; and so after a long grass roots effort by this community we exercised our democratic rights and voted for this new <sup>C.S.D.</sup> board, with a mandate to move the sewer away from the bay, homes, the community center and out of the center of our beautiful town.

The water board by nature is better from our appointed regulatory board.

Our C.S.D. inherited this horrible.

better from our appointed regulatory board.

Our C.S.D. inherited this horrible train wreck that was caused by our recalled board by not allowing for elections to happen sooner. They made that choice, waiting till after construction had started; they gambled with our money.

We care about the 33% of our elderly and those on fixed incomes who would be forced out of their homes and we expect you to care too, and to work in our best interest - not against us.

We have a dedicated and very knowledgeable C.S.D. and they need you to help us get through this difficult time.

We don't deserve to be punished for believing in and acting in a democratic process. Our country is suffering great sacrifice to bring democracy to Iraq. Do not make a mockery of our democracy at home.

Respectfully, Nancy E. Ruhl  
cc Lisa Shicker, Pres. C.S.D.
