Subject: Sewer Loan

How dare you hold the citizens of Los Osos hostage with the State Sewer Loan. This is our town and we should have a decision in what type of sewer we want and on the location. This is our money that will be paying for the sewer not yours. If we are forced to build the sewer on the TRI-W site and use the plan that the previous CSD approved, we will use up all of our ground water. Los Osos will then have to pay for water to be piped in. How much will that cost?

How dare you threaten us with fines and leins against our homes. We had no choice with the previous CSD on the type of sewer that was to be built and the location or cost.

This is my money that you are playing with not yours. Do you know how many lives you are ruining with your threats and decisions? You and the previous CSD has torn this town apart. Now let me get to the real reason that you have canceled the loan. This entire sewer issue comes down to water. Unless we can have water piped in the developers cannot build. We are also being punished for voting in Measure B. This Measure finally gives the taxpayers a voice in how <sup>are</sup> money is spent.

The RWQCB is destroying the middle class and <sup>our</sup> working in Los Osos. I find it odd that you were willing to loan the money to the previous CSD when you knew that the election was coming up. Starting the construction of the sewer before the election was criminal and anyone with half a brain would know that. The new CSD is left trying to clean up a mess from the three previous board members. The new CSD has not even had a chance to help the people of LOs Osos. Now i realize that the RWQCB had no intention of working with the new board to help us. The cost of the old sewer was up to \$163,000,000. How would you like to pay about \$40,000. to flush the toilet. This is total insanity and a big scam to get the building moratorium lifted so the developers can make millions off the backs of 4700 families. I also find it rotten that out of 15000 people, 4700 families ~~that~~ are polluting the bay. It is not right that the entire town gets to vote on this issue but we are the ones to pay. So much for Democracy. The working man is screwed again.

Sincerely

Leslie Spoon
