

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
CENTRAL COAST REGION  
895 AEROVISTA PLACE, SUITE 101  
SAN LUIS OBISPO, CALIFORNIA**

**RESOLUTION NO. R3-2008-0061**

**Waiver of Waste Discharge Requirements**

**For**

**ENGINEERED ONSITE DISPOSAL SYSTEM  
MOELLER RESIDENCE, 194 SAN REMO ROAD  
CARMEL HIGHLANDS  
(APN 243-181-006)  
Monterey County**

The California Regional Water Quality Control Board, Central Coast Region (hereinafter Water Board) finds that:

1. California Water Code Section 13260(a) requires that any person discharging waste, or proposing to discharge waste within any region that could affect the quality of the waters of the state, other than into a community sewer system, shall file with the appropriate Regional Water Board a report of the discharge ("report of waste discharge" or "ROWD") or other report containing such information and data as may be required by the Regional Board.
2. California Water Code section 13263 authorizes the Water Board to prescribe waste discharge requirements that implement the Water Board's Water Quality Control Plan.
3. California Water Code Section 13269 authorizes the Water Board to waive the issuance of waste discharge requirements provided that the waiver of waste discharge requirements is consistent with applicable water quality control plans and is in the public interest. In addition, any waiver must be conditional, may not exceed five years in duration, and may be terminated at any time. The waiver must also require monitoring unless the Regional Board determines that the discharges do not pose a significant threat to water quality.
4. The Water Quality Control Plan for the Central Coast Region (Basin Plan) designates the beneficial uses of waters within the Region, specifies the water quality objectives to protect the beneficial uses, establishes prohibitions, and establishes implementation policies to implement the water quality objectives. Pursuant to Chapter 2 of the Basin Plan, present and potential beneficial uses of groundwater (both shallow and deeper water-bearing zones) underlying the property include domestic and municipal water supply, agricultural water supply, and industrial water supply. The Basin Plan incorporates the state's drinking water standards adopted by the California Department of Public Health as water quality objectives.

**Item No. 26 Attachment No. 1  
WDR Moeller Residence  
194 San Remo Rd.  
R3-2008-0061  
December 4-5 2008 Meeting**

### BACKGROUND

5. The subject site consists of a 0.85-acre residential property located in the Carmel Highlands. The property is within an unincorporated portion of Monterey County and is not within a sewer services district and requires an onsite wastewater disposal system. However, the subject property is within the Carmel Riviera Mutual Water Company service area and does not require an onsite water supply well. The property owner, Michael Moeller (hereafter Discharger), applied for a permit with the Monterey County Division of Environmental Health to install an engineered onsite wastewater disposal system. The proposed onsite disposal system consists of an advanced treatment system with ultraviolet disinfection and subsurface drip irrigation as the primary mode of disposal with shallow pressurized gravel-filled dispersal trenches as secondary disposal.
6. The proposed system replaces a proposal for conventional system that was previously approved by Monterey County. The engineered system is proposed in response to the concerns of neighboring property owners. The proposed project for the subject address is not subject to Monterey County Ordinance No. 5086 and No. 5093 because the Discharger's application for the standard system design was deemed complete by Monterey County prior to the adoption of these ordinances.
7. The secondary disposal system (shallow pressurized rock filled-dispersal trenches) was designed using a loading rate of 0.8 gallons per day per square foot (gpd/ft<sup>2</sup>). The Basin Plan recommends a loading rate of 0.25 gpd/ft<sup>2</sup> for the observed [average] onsite percolation rate of 50 minutes per inch (mpi) as determined from eleven percolation tests conducted at various depths on the subject property and adjacent parcel at 192 San Remo Road. Monterey County Standards and Specifications contained within Title 15 of the County Code recommends a maximum loading rate of 0.3 gpd/ft<sup>2</sup> based on a pass/fail percolation test. The primary subsurface drip irrigation disposal system was designed using a loading rate of 0.4 gpd/ft<sup>2</sup> per manufacturer specifications as based on the observed onsite soil profile and characteristics. The higher design loading rate for the secondary disposal system is based on the observation of multiple onsite soil borings conducted by the system designer, shallow (near surface) soil infiltration testing conducted in similar soils within the Carmel Highlands area (220 Upper Walden Road) and follow-up onsite 24-hour infiltration tests conducted on September 3, 2008. The 24-hour infiltration tests more closely approximate actual loading conditions for the shallow disposal trenches than standard percolation tests. In addition, both the primary and secondary disposal systems are designed to handle 100% of the design flow for the proposed residence.
8. Aside from the 0.8 gpd/ft<sup>2</sup> loading rate for the secondary disposal system and setbacks to slopes, cuts and subsurface drainage systems, design criteria and site conditions meet the recommended numeric Basin Plan criteria for a conventional onsite wastewater disposal system.

9. The Basin Plan and July 1979 Memorandum of Understanding between the Central Coast Water Board and County specifically prohibit the County from approving engineered onsite disposal systems for sites unsuitable for standard systems. The Basin Plan allows that the Water Board or Executive Officer may grant exemptions for engineered onsite disposal systems or exemptions to specific Basin Plan criteria for onsite wastewater disposal systems given sufficient justification that the continued operation of such systems in a particular area will not individually or collectively, directly or indirectly, result in pollution or nuisance, or affect water quality adversely.
10. An application containing a Report of Waste Discharge: Supplemental Form for Regional Board Subsurface Disposal Exemption Submittal and associated design documents for the proposed engineered system was submitted to the Water Board by the County on behalf of the Discharger. The Monterey County Department of Health certified (signed) the Supplemental Form on June 4, 2008. The onsite disposal system design was prepared by Andrew Brownstone, BioSphere Consulting, and is dated May 14, 2008. The geotechnical investigation report (percolation tests) was prepared by Richard Dante, Soil Surveys, Inc., and is dated November 2, 2001. Additional soil percolation and 24-hour infiltration test results are contained within a September 25, 2008 report prepared by Andrew Brownstone of Biosphere Consulting.
11. The Executive Officer approved the Basin Plan exemption and notified the Discharger of the proposed Waiver on July 21, 2008.
12. The Water Board has considered the information provided in the application and has required the Discharger, as a condition of this waiver, to comply with all applicable Monterey County ordinances and permit requirements and applicable Basin Plan requirements for onsite disposal systems.
13. The proposed system will also be subject to nonstandard permit conditions applied by the County prior to issuing a building permit. The nonstandard permit conditions require an operations and maintenance contract and deed notification. The nonstandard permit conditions and deed notification (June 27, 2007 template) are attached hereto as Exhibits 1 and 2, respectively, and incorporated herein by reference.
14. Individual subsurface disposal systems for domestic residences are categorically exempt from the California Environmental Quality Act as set forth in California Code of Regulations, Title 14, Section 15303.
15. The Water Board finds that if the onsite disposal system is properly operated and maintained in accordance with the conditions of this Resolution this waiver of waste discharge requirements is in the public interest and consistent with the Basin Plan.

16. This waiver of waste discharge requirements is in the public interest because:
  - a) The discharge is already regulated by another governmental entity;
  - b) This Waiver requires the discharger to observe reasonable practices to minimize the deleterious effects of the discharge;
  - c) This Waiver requires the discharger to implement feasible treatment methods to control the waste constituents in the discharge; and
  - d) This Waiver includes conditions that will adequately protect beneficial uses while allowing the Water Board to use more of its resources to conduct field oversight, public outreach and, where necessary, enforcement.
17. The proposed onsite disposal system is regulated by Monterey County and must comply with County ordinances and permit requirements and Basin Plan requirements to implement design and operational controls, maintenance activities, and regular monitoring to prevent water quality impacts.
18. This waiver is consistent with the Basin Plan because it:
  - a) Prohibits pollution, contamination or nuisance;
  - b) Requires monitoring and compliance with applicable Basin Plan prohibitions and Monterey County Ordinances and permit requirements; and
  - c) Requires the Discharger to grant access to Water Board and Monterey County staff to perform inspections.
  - d) Requires the onsite disposal system to comply with the Basin Plan's criteria for onsite systems.
19. Pursuant to California Water Code Section 13269, this action waiving the issuance of waste discharge requirements for this on-site domestic wastewater disposal system: (a) is conditional, (b) may be terminated at any time, (c) does not permit an illegal activity, (d) does not preclude the need for permits which may be required by other local or governmental agencies, and (e) does not preclude the Water Board from administering enforcement remedies (including civil liability) pursuant to the California Water Code.
20. Operation of the proposed onsite disposal system consistent with this Resolution is not anticipated to degrade groundwater and is consistent with State Water Resources Control Board Resolution 68-16 ("Policy for Maintenance of the High Quality of Waters of the State"). State Water Board Resolution No. 68-16 requires the Regional Board to maintain the high quality of waters of the state unless the Regional Board determines that some degradation of waters is consistent with maximum benefit to the people of the state, will not unreasonably affect present and anticipated beneficial use of such water and will not result in water quality less than set forth in the Basin Plans. The Regional Boards must ensure that waste discharge requirements will result in best practicable treatment or control of the discharge necessary to ensure that pollution or nuisance will not occur and the

highest water quality is maintained. In short, the degradation may not violate water quality objectives and must not unreasonably affect existing and designated beneficial uses. Operation of the proposed system is consistent with Resolution 68-16 because the system is designed to treat the domestic wastewater to secondary standards (85% reduction of biochemical oxygen demand and total suspended solids), remove 65% of total influent nitrogen, and disinfect the effluent prior to disposal via ultraviolet treatment.

21. The monitoring and reporting requirements of this Resolution are imposed pursuant to California Water Code Section 13267. The monitoring and reporting are necessary to ensure compliance with the conditions of this Resolution and to verify the adequacy and effectiveness of the conditions.
22. The Regional Board provided an opportunity for a public hearing on December 4-5, 2008, in San Luis Obispo, California, and considered all comments and evidence concerning this matter.
23. Any person aggrieved by this action of the Central Coast Water Board may petition the State Water Board to review the action in accordance with Water Code section 13320 and California Code of Regulations, title 23, sections 2050 and following. The State Water Board must receive the petition by 5:00 p.m., 30 days after the date of the order, except that if the thirtieth day following the date of the order falls on a Saturday, Sunday, or state holiday, the petition must be received by 5:00 p.m. on the next business day. Copies of the law and regulations applicable to filing petitions may be found on the internet at [http://www.waterboards.ca.gov/public\\_notices/petitions/water\\_quality](http://www.waterboards.ca.gov/public_notices/petitions/water_quality) or will be provided upon request.

#### **THEREFORE BE IT RESOLVED:**

1. In accordance with California Water Code Sections 13267 and 13269, waste discharge requirements for the proposed onsite domestic wastewater disposal system are hereby waived subject to the following conditions:
  - a) The onsite treatment and disposal system shall be installed under the oversight of Monterey County and the designer, Andrew Brownstone, per the June 4, 2008 (or more recent approved version) Alternative Onsite Wastewater System Design by Andrew Brownstone, BioSphere Consulting, and be operated and maintained in accordance with applicable Monterey County Ordinances and permit conditions, the Basin Plan criteria and manufacturer specifications.
  - b) The Discharger shall comply with all applicable Monterey County Ordinances and Permit Conditions.
  - c) The Discharger and future property owners shall be subject to the requirements of the County's pending Onsite Wastewater Management Plan.
  - d) Utility trenches in the vicinity of the disposal areas shall be backfilled pursuant to

- geotechnical engineering specifications to prevent channeling of effluent
- e) Additional subsurface drains (french or curtain) are prohibited within 50 feet downslope and 20 feet upslope of the disposal areas.
  - f) Peak daily flow shall not exceed 900 gallons per day.
  - g) Use of the individual sewage disposal system shall not create a condition of pollution, contamination, or condition of nuisance, as defined by CWC Section 13050.
  - h) Only domestic wastewater shall be discharged to the individual sewage disposal system.
  - i) The use of self-regenerating water softeners is prohibited; water softening devices shall be off-site regenerated cartridge type only.
  - j) The Discharger shall install and use low flow plumbing fixtures on all appurtenances such as toilets, showers and faucets. Low flow dishwashers and frontloading clothes washing machines are also strongly recommended.
  - k) The Discharger shall immediately notify the Water Board and Monterey County of any proposed change(s) in discharge volume, nature, or location.
  - l) The Discharger shall immediately notify the Water Board and Monterey County of any discharges threatening water quality or public health.
  - m) The Discharger shall allow the Water Board and Monterey County to inspect the onsite disposal system at any time to evaluate compliance with this Waiver.
  - n) Operation of the sewage disposal system shall not result in the daylighting (surfacing) of effluent from the disposal area or other portions of the system.
  - o) The Discharger and future property owners shall also provide copies of all monitoring data per County requirements to the Water Board.
  - p) The Discharger shall inspect the sewage disposal system every two years, at a minimum, for solids buildup and have it pumped out as required by a licensed septic tank contractor.
  - q) The Discharger shall have the shallow pressurized trench laterals manually flushed once every six months by a qualified technician.
  - r) If the Discharger transfers the property, the Discharger shall notify the new owner of this Waiver of Waste Discharge Requirements and shall notify the Water Board of the transfer within 30 days of transfer.
2. This Waiver shall not create a vested right to discharge and all such discharges shall be considered a privilege, as provided for in CWC Section 13263.
  3. The Executive Officer or Water Board may terminate the applicability of the Waiver described herein at any time.

4. This Waiver shall become effective on **December 5, 2008**, and shall expire on **December 5, 2013**.
5. The Discharger may be subject to enforcement actions for violations of this Waiver pursuant to Division 7 of the California Water Code. As provided by California Water Code Section 13350(a), the Discharger may be civilly liable if in violation of a waiver condition or causes waste to be deposited where it is discharged, into the waters of the State and creates a condition of pollution or nuisance.

I, Roger W. Briggs, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of a Resolution adopted by the California Regional Water Quality Control Board, Central Coast Region, on December 5, 2008.

December 4-5 2008 Meeting**

### BACKGROUND

5. The subject site consists of a 0.85-acre residential property located in the Carmel Highlands. The property is within an unincorporated portion of Monterey County and is not within a sewer services district and requires an onsite wastewater disposal system. However, the subject property is within the Carmel Riviera Mutual Water Company service area and does not require an onsite water supply well. The property owner, Michael Moeller (hereafter Discharger), applied for a permit with the Monterey County Division of Environmental Health to install an engineered onsite wastewater disposal system. The proposed onsite disposal system consists of an advanced treatment system with ultraviolet disinfection and subsurface drip irrigation as the primary mode of disposal with shallow pressurized gravel-filled dispersal trenches as secondary disposal.
6. The proposed system replaces a proposal for conventional system that was previously approved by Monterey County. The engineered system is proposed in response to the concerns of neighboring property owners. The proposed project for the subject address is not subject to Monterey County Ordinance No. 5086 and No. 5093 because the Discharger's application for the standard system design was deemed complete by Monterey County prior to the adoption of these ordinances.
7. The secondary disposal system (shallow pressurized rock filled-dispersal trenches) was designed using a loading rate of 0.8 gallons per day per square foot (gpd/ft<sup>2</sup>). The Basin Plan recommends a loading rate of 0.25 gpd/ft<sup>2</sup> for the observed [average] onsite percolation rate of 50 minutes per inch (mpi) as determined from eleven percolation tests conducted at various depths on the subject property and adjacent parcel at 192 San Remo Road. Monterey County Standards and Specifications contained within Title 15 of the County Code recommends a maximum loading rate of 0.3 gpd/ft<sup>2</sup> based on a pass/fail percolation test. The primary subsurface drip irrigation disposal system was designed using a loading rate of 0.4 gpd/ft<sup>2</sup> per manufacturer specifications as based on the observed onsite soil profile and characteristics. The higher design loading rate for the secondary disposal system is based on the observation of multiple onsite soil borings conducted by the system designer, shallow (near surface) soil infiltration testing conducted in similar soils within the Carmel Highlands area (220 Upper Walden Road) and follow-up onsite 24-hour infiltration tests conducted on September 3, 2008. The 24-hour infiltration tests more closely approximate actual loading conditions for the shallow disposal trenches than standard percolation tests. In addition, both the primary and secondary disposal systems are designed to handle 100% of the design flow for the proposed residence.
8. Aside from the 0.8 gpd/ft<sup>2</sup> loading rate for the secondary disposal system and setbacks to slopes, cuts and subsurface drainage systems, design criteria and site conditions meet the recommended numeric Basin Plan criteria for a conventional onsite wastewater disposal system.

9. The Basin Plan and July 1979 Memorandum of Understanding between the Central Coast Water Board and County specifically prohibit the County from approving engineered onsite disposal systems for sites unsuitable for standard systems. The Basin Plan allows that the Water Board or Executive Officer may grant exemptions for engineered onsite disposal systems or exemptions to specific Basin Plan criteria for onsite wastewater disposal systems given sufficient justification that the continued operation of such systems in a particular area will not individually or collectively, directly or indirectly, result in pollution or nuisance, or affect water quality adversely.
10. An application containing a Report of Waste Discharge: Supplemental Form for Regional Board Subsurface Disposal Exemption Submittal and associated design documents for the proposed engineered system was submitted to the Water Board by the County on behalf of the Discharger. The Monterey County Department of Health certified (signed) the Supplemental Form on June 4, 2008. The onsite disposal system design was prepared by Andrew Brownstone, BioSphere Consulting, and is dated May 14, 2008. The geotechnical investigation report (percolation tests) was prepared by Richard Dante, Soil Surveys, Inc., and is dated November 2, 2001. Additional soil percolation and 24-hour infiltration test results are contained within a September 25, 2008 report prepared by Andrew Brownstone of Biosphere Consulting.
11. The Executive Officer approved the Basin Plan exemption and notified the Discharger of the proposed Waiver on July 21, 2008.
12. The Water Board has considered the information provided in the application and has required the Discharger, as a condition of this waiver, to comply with all applicable Monterey County ordinances and permit requirements and applicable Basin Plan requirements for onsite disposal systems.
13. The proposed system will also be subject to nonstandard permit conditions applied by the County prior to issuing a building permit. The nonstandard permit conditions require an operations and maintenance contract and deed notification. The nonstandard permit conditions and deed notification (June 27, 2007 template) are attached hereto as Exhibits 1 and 2, respectively, and incorporated herein by reference.
14. Individual subsurface disposal systems for domestic residences are categorically exempt from the California Environmental Quality Act as set forth in California Code of Regulations, Title 14, Section 15303.
15. The Water Board finds that if the onsite disposal system is properly operated and maintained in accordance with the conditions of this Resolution this waiver of waste discharge requirements is in the public interest and consistent with the Basin Plan.

16. This waiver of waste discharge requirements is in the public interest because:
  - a) The discharge is already regulated by another governmental entity;
  - b) This Waiver requires the discharger to observe reasonable practices to minimize the deleterious effects of the discharge;
  - c) This Waiver requires the discharger to implement feasible treatment methods to control the waste constituents in the discharge; and
  - d) This Waiver includes conditions that will adequately protect beneficial uses while allowing the Water Board to use more of its resources to conduct field oversight, public outreach and, where necessary, enforcement.
17. The proposed onsite disposal system is regulated by Monterey County and must comply with County ordinances and permit requirements and Basin Plan requirements to implement design and operational controls, maintenance activities, and regular monitoring to prevent water quality impacts.
18. This waiver is consistent with the Basin Plan because it:
  - a) Prohibits pollution, contamination or nuisance;
  - b) Requires monitoring and compliance with applicable Basin Plan prohibitions and Monterey County Ordinances and permit requirements; and
  - c) Requires the Discharger to grant access to Water Board and Monterey County staff to perform inspections.
  - d) Requires the onsite disposal system to comply with the Basin Plan's criteria for onsite systems.
19. Pursuant to California Water Code Section 13269, this action waiving the issuance of waste discharge requirements for this on-site domestic wastewater disposal system: (a) is conditional, (b) may be terminated at any time, (c) does not permit an illegal activity, (d) does not preclude the need for permits which may be required by other local or governmental agencies, and (e) does not preclude the Water Board from administering enforcement remedies (including civil liability) pursuant to the California Water Code.
20. Operation of the proposed onsite disposal system consistent with this Resolution is not anticipated to degrade groundwater and is consistent with State Water Resources Control Board Resolution 68-16 ("Policy for Maintenance of the High Quality of Waters of the State"). State Water Board Resolution No. 68-16 requires the Regional Board to maintain the high quality of waters of the state unless the Regional Board determines that some degradation of waters is consistent with maximum benefit to the people of the state, will not unreasonably affect present and anticipated beneficial use of such water and will not result in water quality less than set forth in the Basin Plans. The Regional Boards must ensure that waste discharge requirements will result in best practicable treatment or control of the discharge necessary to ensure that pollution or nuisance will not occur and the

highest water quality is maintained. In short, the degradation may not violate water quality objectives and must not unreasonably affect existing and designated beneficial uses. Operation of the proposed system is consistent with Resolution 68-16 because the system is designed to treat the domestic wastewater to secondary standards (85% reduction of biochemical oxygen demand and total suspended solids), remove 65% of total influent nitrogen, and disinfect the effluent prior to disposal via ultraviolet treatment.

21. The monitoring and reporting requirements of this Resolution are imposed pursuant to California Water Code Section 13267. The monitoring and reporting are necessary to ensure compliance with the conditions of this Resolution and to verify the adequacy and effectiveness of the conditions.
22. The Regional Board provided an opportunity for a public hearing on December 4-5, 2008, in San Luis Obispo, California, and considered all comments and evidence concerning this matter.
23. Any person aggrieved by this action of the Central Coast Water Board may petition the State Water Board to review the action in accordance with Water Code section 13320 and California Code of Regulations, title 23, sections 2050 and following. The State Water Board must receive the petition by 5:00 p.m., 30 days after the date of the order, except that if the thirtieth day following the date of the order falls on a Saturday, Sunday, or state holiday, the petition must be received by 5:00 p.m. on the next business day. Copies of the law and regulations applicable to filing petitions may be found on the internet at [http://www.waterboards.ca.gov/public\\_notices/petitions/water\\_quality](http://www.waterboards.ca.gov/public_notices/petitions/water_quality) or will be provided upon request.

**THEREFORE BE IT RESOLVED:**

1. In accordance with California Water Code Sections 13267 and 13269, waste discharge requirements for the proposed onsite domestic wastewater disposal system are hereby waived subject to the following conditions:
  - a) The onsite treatment and disposal system shall be installed under the oversight of Monterey County and the designer, Andrew Brownstone, per the June 4, 2008 (or more recent approved version) Alternative Onsite Wastewater System Design by Andrew Brownstone, BioSphere Consulting, and be operated and maintained in accordance with applicable Monterey County Ordinances and permit conditions, the Basin Plan criteria and manufacturer specifications.
  - b) The Discharger shall comply with all applicable Monterey County Ordinances and Permit Conditions.
  - c) The Discharger and future property owners shall be subject to the requirements of the County's pending Onsite Wastewater Management Plan.
  - d) Utility trenches in the vicinity of the disposal areas shall be backfilled pursuant to

- geotechnical engineering specifications to prevent channeling of effluent
- e) Additional subsurface drains (french or curtain) are prohibited within 50 feet downslope and 20 feet upslope of the disposal areas.
  - f) Peak daily flow shall not exceed 900 gallons per day.
  - g) Use of the individual sewage disposal system shall not create a condition of pollution, contamination, or condition of nuisance, as defined by CWC Section 13050.
  - h) Only domestic wastewater shall be discharged to the individual sewage disposal system.
  - i) The use of self-regenerating water softeners is prohibited; water softening devices shall be off-site regenerated cartridge type only.
  - j) The Discharger shall install and use low flow plumbing fixtures on all appurtenances such as toilets, showers and faucets. Low flow dishwashers and frontloading clothes washing machines are also strongly recommended.
  - k) The Discharger shall immediately notify the Water Board and Monterey County of any proposed change(s) in discharge volume, nature, or location.
  - l) The Discharger shall immediately notify the Water Board and Monterey County of any discharges threatening water quality or public health.
  - m) The Discharger shall allow the Water Board and Monterey County to inspect the onsite disposal system at any time to evaluate compliance with this Waiver.
  - n) Operation of the sewage disposal system shall not result in the daylighting (surfacing) of effluent from the disposal area or other portions of the system.
  - o) The Discharger and future property owners shall also provide copies of all monitoring data per County requirements to the Water Board.
  - p) The Discharger shall inspect the sewage disposal system every two years, at a minimum, for solids buildup and have it pumped out as required by a licensed septic tank contractor.
  - q) The Discharger shall have the shallow pressurized trench laterals manually flushed once every six months by a qualified technician.
  - r) If the Discharger transfers the property, the Discharger shall notify the new owner of this Waiver of Waste Discharge Requirements and shall notify the Water Board of the transfer within 30 days of transfer.
2. This Waiver shall not create a vested right to discharge and all such discharges shall be considered a privilege, as provided for in CWC Section 13263.
  3. The Executive Officer or Water Board may terminate the applicability of the Waiver described herein at any time.

4. This Waiver shall become effective on **December 5, 2008**, and shall expire on **December 5, 2013**.
5. The Discharger may be subject to enforcement actions for violations of this Waiver pursuant to Division 7 of the California Water Code. As provided by California Water Code Section 13350(a), the Discharger may be civilly liable if in violation of a waiver condition or causes waste to be deposited where it is discharged, into the waters of the State and creates a condition of pollution or nuisance.

I, Roger W. Briggs, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of a Resolution adopted by the California Regional Water Quality Control Board, Central Coast Region, on December 5, 2008.

---

Roger W. Briggs  
Executive Officer
