Notes: "Result_QL_Code" is the Result Qualification code. "ND" refers to non-detect, which means the analyte is not detected in the sample. Non-detect samples are recorded in the result column of the table at a value equal to the "MDL" or method detection limit. A result qualification code of "=" means that the analyte is detected in the sample and at a result value greater than the method detection limit. "dw" = Dry Weight, ug/kg = microgram per kilogram, 1 ug/kg= 1 parts per million(ppm).
