**PROJECT DESCRIPTION:**

An emergency repair of the existing culvert is needed to retain the access to the City of Roseville power plant until completion of the new access road. The existing culvert failed during a large rain event in October 2021, undermining the access road, and making it unsafe to use the road to cross the creek.

The Project will consist of the following activities to repair the scour hole:

- Add either precast blocks or Bulk material bags filled with sand and/or gravel along the entrance of the scour hole;
- Add rock/ gravel bags behind the scour hole;
- Prop up the exposed 18" steel water main by chaining it to the temporary bridge and install gravel bags (potentially supplemented with sand bags), under the pipe;
- Barricade the upstream lane of the temporary bridge to keep powerplant employee/deliver traffic on the solid bearing portion of the bridge.

The Project will permanently impact 0.007 acre/20 linear feet of waters of the United States.

**PROJECT LOCATION:**

The Project is located on an unnamed tributary to Pleasant Grove Creek near the intersection of Cincinnati Avenue and Nichols Drive in the City of Roseville.
