# MONITORING & REPORTING PROGRAM (MRP) R5-2022-0025

## ORDER INFORMATION

| | |
|---|---|
| **Order Type(s):** | Monitoring & Reporting Program (MRP) |
| **Status:** | Adopted |
| **Program:** | Title 27 Discharges to Land |
| **Region 5 Office:** | Sacramento (Rancho Cordova) |
| **Discharger(s):** | Amador County |
| **Facility:** | Buena Vista Landfill |
| **Address:** | 6500 Ione Buena Vista Road, Ione, California 95640 |
| **County:** | Amador County |
| **Parcel Nos.:** | 12-04-040 through 12-04-046 |
| **WDID:** | L10008365060 |
| **Prior Order(s):** | R5-2018-0020; R5-2011-0062; R5-2018-0020; R5-2011-0062; R5-2003-0078; R5-2000-0169 |

## CERTIFICATION

I, PATRICK PULUPA, Executive Officer, hereby certify that the following is a full, true, and correct copy of the order adopted by the California Regional Water Quality Control Board, Central Valley Region, on 21 April 2022.

Date: 2022.05.12 11:01:27 -07'00'

PATRICK PULUPA,
Executive Officer

## TABLE OF CONTENTS

**TABLE OF CONTENTS**

**TABLE OF CONTENTS**

# TABLE INDEX

**TABLE INDEX**

# GLOSSARY

AMR .....Annual Monitoring Report

CalRecycle .....California Department of Resources Recycling and Recovery

CAMP.....Corrective Action Monitoring Program

C.F.R. .....Code of Federal Regulations

CIWQS .....California Integrated Water Quality System Project

COCs .....Constituents of Concern

DMP .....Detection Monitoring Program

DWR.....California Department of Water Resources

EC .....Electrical Conductivity

ELAP .....State Water Board's Environmental Laboratory Accreditation Program (formerly administered by California Department of Public Health)

EMP .....Evaluation Monitoring Program

EW .....Extraction Well

Five-Year COCs.....Five-Year Constituents of Concern

GeoTracker .....State Water Board's Data Management System for Sites with Potential Groundwater Impact

GP .....Gas Probe

LCRS.....Leachate Collection and Removal System

LF .....Landfill

LFG .....Landfill Gas

MDL.....Method Detection Limit

**GLOSSARY**

| | |
|---|---|
| Method TO-15 VOCs | Volatile Organic Compounds associated with USEPA Method TO-15 |
| MRP | Monitoring and Reporting Program |
| MSW | Municipal Solid Waste |
| MSWLF | Municipal Solid Waste Landfill |
| N/A | Not Applicable |
| PID | Photo Ionization Detector |
| POC | Point of Compliance for Water Quality Protection Standard |
| QA/QC | Quality Assurance/Quality Control |
| Qualified Professional | Professional Civil Engineer or Geologist licensed by the State of California |
| RCRA | Resource Conservation and Recovery Act, 42 U.S.C. § 6901 et seq. |
| RL | Reporting Limit |
| ROWD / JTD | Report of Waste Discharge / Joint Technical Document |
| SCAP | Sample Collection and Analysis Plan |
| SGP | Soil Pore Gas |
| SI | Surface Impoundment |
| SMR | Semiannual Monitoring Report |
| SPRRs / Standard Provisions | Standard Provisions and Reporting Requirements for Nonhazardous Solid Waste Discharges Regulated by Subtitle D and/or Title 27 Municipal Solid Waste Facilities, December 2015 Edition |
| TDS | Total Dissolved Solids |

**GLOSSARY**

Title 27 .....California Code of Regulations, Title 27

USEPA .....United States Environmental Protection Agency

VOCs.....Volatile Organic Compounds

WDRs.....Waste Discharge Requirements

WMU .....Waste Management Unit

WQPS .....Water Quality Protection Standard

**UNITS**

ft3 / min .....Cubic Feet per Minute

°F .....Degrees Fahrenheit

Gallons/Day.....Gallons per Day

mg/L .....Milligrams per Liter

µg/L .....Micrograms per Liter

µmhos/cm.....Microsiemens per Centimeter

µg/cm3 .....Micrograms per Cubic Centimeter

NTUs .....Nephelometric Turbidity Units

% Vol.....Percent by Volume

Inches Hg .....Inches of Mercury (Barometric Pressure)

MM Hg Vacuum .....Millimeters of Mercury (Barometric Pressure)

# PREFACE

Adopted by the California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board) pursuant to Water Code section 13267, subdivision (b)(1), this Order establishes a Monitoring and Reporting Program (MRP) for Amador County (Discharger), which owns and operates the Buena Vista Landfill (Facility) in Amador County. Additional information regarding the Facility is set forth in the enumerated findings of Waste Discharge Requirements Order R5-2022-0025 (WDRs Order). Except as otherwise provided in the following MRP, these findings are incorporated herein.

The MRP also contains supplemental findings related to monitoring and reporting activities, and/or Facility conditions. For the purposes of California Code of Regulations, title 27 (Title 27) (e.g., §§ 21720, 20380-20435), the findings and provisions of this Order are conversely incorporated as part of the WDRs Order as well.

Although adopted with the WDRs Order, this is a separate order subject to subsequent revision by the Executive Officer in accordance with delegated authority per Water Code § 13223. For the purposes of Title 27, such revisions shall be automatically incorporated as part of the WDRs Order.

# MONITORING & REPORTING PROGRAM

**IT IS HEREBY ORDERED**, pursuant to Water Code § 13267: that all previously issued Monitoring and Reporting Program(s) for the discharge of solid waste at the Facility are rescinded (except for enforcement purposes); and that the Discharger, their agents, employees and successors shall comply with the following Monitoring and Reporting Program (MRP). The Discharger shall not implement any changes until a revised MRP is issued by the Central Valley Water Board or its Executive Officer.

## A. General Provisions

### 1. Incorporation of Standard Provisions

The Discharger shall comply with all relevant provisions of the *Standard Provisions and Reporting Requirements for Nonhazardous Solid Waste Discharges Regulated by Subtitle D and/or Title 27 Municipal Solid Waste Facilities, December 2015 Edition* (SPRRs or Standard Provisions), which are incorporated herein. See, e.g., SPRRs section I (*Standard Monitoring Specifications*) and section J (*Response to Release*).

### 2. Monitoring Provisions in WDRs Order

The Discharger shall comply with all "Monitoring Provisions" in the Facility's operative Title 27 WDRs Order, which are also incorporated herein.

### 3. Compliance with Title 27

The Discharger shall comply with all of Title 27 provisions as they pertain to activities described in this MRP (including SPRRs).

### 4. Sample Collection and Analysis Plan (SCAP)

All samples shall be collected, preserved and transported in accordance with the approved Sample Collection and Analysis Plans (2010 / 2017 SAP) and the Quality Assurance/Quality Control (QA/QC) standards specified therein [Standard Monitoring Specification I.7]. The Discharger may use alternative analytical test methods (including new USEPA-approved methods), provided that the alternative methods have method detection limits (MDLs) equal to or lower than the analytical methods specified in this MRP and are identified in the approved 2010 / 2017 SAP.

## B. Detection Monitoring Program (DMP)

To detect a release at the earliest possible time (see Title 27, § 20420, subd. (b)), the Discharger shall implement a Detection Monitoring Program (DMP) for groundwater, surface water and the unsaturated zone in accordance with the provisions of Title 27, particularly §§ 20415 and 20420. Groundwater, unsaturated zone and surface water[1] detection monitoring networks shall be revised (as needed) with the construction of each new landfill cell or module.

### 1. Groundwater

[1] I.e., to the extent that surface water detection monitoring is required under this Order.

**a. Required Network**

The Facility's groundwater monitoring well network consists of the wells listed in **Table 1**.[2] As of the date of this Order, the network meets the requirements of Title 27. (Title 27, § 20415, subd. (b).)

**Table 1—Groundwater Monitoring Network**

| Well | Program | Monitored Unit(s) | Point of Compliance (WQPS) | Water-Bearing Zone | Status |
|---|---|---|---|---|---|
| Sump L-1 | Corrective Action | WMU I | Yes | Shallow | Operational |
| MW-1 | Detection | WMU I | No | Shallow | Operational |
| MW-3A | Corrective Action | WMU I | Yes | Shallow | Operational |
| MW-3B | Corrective Action | WMU I | Yes | Shallow | Operational |
| MW-4A | Detection | WMU II / III | Yes | Shallow | Operational |
| MW-5 | Detection | WMU II / III | Yes | Shallow | Operational |
| MW-5S | Detection | WMU II / III | Yes | Shallow | Operational |
| MW-7 | Corrective Action | WMU I | No | Shallow | Operational |
| MW-9 | Background | All WMUs | No | Shallow | Operational |
| MW-10 | Corrective Action | WMU I | Yes | Shallow | Operational |
| MW-11 | Detection | WMU I | Yes | Shallow | Operational |

[2] Non-background monitoring wells at the Point of Compliance constitute "Monitoring Points" for purposes of the Water Quality Protection Standard (WQPS).

| Well | Program | Monitored Unit(s) | Point of Compliance (WQPS) | Water-Bearing Zone | Status |
|---|---|---|---|---|---|
| MW-13 | Detection | WMU I | No | Shallow | Operational |
| MW-14 | Background | All WMUs | No | Shallow | Operational |
| MW-15 | Detection | WMU II / III | Yes | Shallow | Operational |
| MW-16 | Detection | WMU II / III | Yes | Shallow | Operational |
| MW-20 | Other | | No | Perched | Operational |
| MW-21 | Detection | Surface Impoundment | Yes | Shallow | Operational |

See Glossary for definitions of terms and abbreviations in table.

**b. Sample Collection and Analysis**

Groundwater samples shall be collected from each well and analyzed for Monitoring Parameters listed in **Table 2** (Physical Parameters) and **Table 3** (Constituent Parameters), in accordance with the specified schedule for each parameter. (Title 27, § 20420, subds. (e)-(f).)

**Table 2—Groundwater Detection Monitoring, Physical Parameters**

| Physical Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Temperature | TEMP | °F | Semiannual | Semiannual |
| Electrical Conductivity | SC | µmhos/cm | Semiannual | Semiannual |
| pH | PH | pH Units | Semiannual | Semiannual |
| Turbidity | TURB | NTUs | Semiannual | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**Table 3—Groundwater Detection Monitoring, Constituent Parameters**

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| TDS | TDS | mg/L | Semiannual | Semiannual |
| Chloride | CL | mg/L | Semiannual | Semiannual |
| Carbonate | CACO3 | mg/L | Semiannual | Semiannual |
| Bicarbonate | BICACO3 | mg/L | Semiannual | Semiannual |
| Sulfate | SO4 | mg/L | Semiannual | Semiannual |
| Calcium | CA | mg/L | Semiannual | Semiannual |
| Magnesium | MG | mg/L | Semiannual | Semiannual |
| Potassium | K | mg/L | Semiannual | Semiannual |
| Sodium | NA | mg/L | Semiannual | Semiannual |
| Short List VOCs (Attachment A) | (various) | µg/L | Semiannual | Semiannual |
| 1,2,3-Trichloropropane per Method SRL-524M-TCP | TCPR123 | µg/L | Every 5 Years | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**c. Five-Year COCs**

The Discharger shall analyze for groundwater samples from each well for the Five-Year Constituents of Concern (Five-Year COCs) listed in **Table 4**. Five-Year COCs were last monitored in 2021, and shall be analyzed again in 2026. (Title 27, § 20420, subd. (g).)

**Table 4—Groundwater Detection Monitoring, Five-Year COCs**

| Five-Year Constituent | GeoTracker Code | Units | Sampling & Reporting Freq. |
|---|---|---|---|
| Total Organic Carbon | TOC | mg/L | Every 5 Years |

| Five-Year Constituent | GeoTracker Code | Units | Sampling & Reporting Freq. |
|---|---|---|---|
| Dissolved Inorganics (Attachment B) | (various) | µg/L | Every 5 Years |
| Extended List VOCs (Attachment C) | (various) | µg/L | Every 5 Years |
| Semi-Volatile Organic Compounds (Attachment D) | (various) | µg/L | Every 5 Years |
| Chlorophenoxy Herbicides (Attachment E) | (various) | µg/L | Every 5 Years |
| Organophosphorus Compounds (Attachment F) | (various) | µg/L | Every 5 Years |

See Glossary for definitions of terms and abbreviations in table.

**d. Groundwater Conditions**

Each quarter, the Discharger shall monitor the Groundwater Conditions specified in **Table 5**, with the result of such monitoring being reported semiannually per **Section 0**.[3] (Title 27, § 20415, subd. (b)(1).)

**Table 5—Groundwater Detection Monitoring, Groundwater Conditions**

| Groundwater Condition | GeoTracker Code | Monitoring Freq. | Reporting Freq. |
|---|---|---|---|
| Elevation (Well-Specific) | ELEV | Quarterly | Semiannually |
| Gradient | (none) | Quarterly | Semiannually |

[3] To the extent feasible, this information shall be determined separately for: (1) the uppermost aquifer; (2) any zones of perched water; and (3) any additional zone of saturation monitored based upon water level elevations taken prior to the collection of the water quality data submitted in the report. (Title 27, § 20415, subd. (e)(15).)

| Groundwater Condition | GeoTracker Code | Monitoring Freq. | Reporting Freq. |
|---|---|---|---|
| Flow Rate | (none) | Quarterly | Semiannually |

## 2. Unsaturated Zone

### a. Required Network

The Facility's unsaturated zone monitoring network consists of the lysimeter (LYS) and landfill gas (LFG) monitoring points specified in **Table 6**. As of the date of this Order, the network meets the requirements of Title 27. (Title 27, § 20415, subd. (d).)

**Table 6—Unsaturated Zone & Landfill Gas Monitoring Network**

| Monitoring Point | Device Type | Program | Monitored Unit(s) | Status |
|---|---|---|---|---|
| VZ-1 | Suction Lysimeter | Detection | WMU II / III | Operational |
| VZ-4 | Suction Lysimeter | Detection | WMU II / III | Operational |
| VZ-5 | Suction Lysimeter | Detection | WMU II / III | Operational |
| VZ-9 | Suction Lysimeter | Detection | WMU II / III | Operational |
| VZ-10 | Suction Lysimeter | Detection | WMU II / III | Operational |
| VZ-12 | Suction Lysimeter | Detection | WMU II / III | Operational |
| PZ-1 | Suction Lysimeter | Detection | Surface Impoundment | Operational |
| PZ-2 | Suction Lysimeter | Detection | Surface Impoundment | Operational |
| GP-1 | Gas Probe | Detection | WMU I | Operational |
| GP-2 | Gas Probe | Detection | WMU I | Operational |
| GP-3 | Gas Probe | Detection | WMU II / III | Operational |

| Monitoring Point | Device Type | Program | Monitored Unit(s) | Status |
|---|---|---|---|---|
| GP-4 | Gas Probe | Detection | WMU II / III | Operational |
| GP-5 | Gas Probe | Detection | WMU II / III | Operational |
| GP-6 | Gas Probe | Detection | WMU I | Operational |
| GP-7 | Gas Probe | Detection | WMU I | Operational |
| GP-8 | Gas Probe | Corrective Action | WMU I | Operational |
| GP-9 | Gas Probe | Corrective Action | WMU I | Operational |
| GP-10 | Gas Probe | Corrective Action | WMU I | Operational |
| GP-11S | Gas Probe | Corrective Action | WMU I | Operational |
| GP-11D | Gas Probe | Corrective Action | WMU I | Operational |

See Glossary for definitions of terms and abbreviations in table.

**b. Soil Pore Gas (SPG) Monitoring**

Soil Pore Gas (SPG) shall be monitored for Methane and Method TO-15 VOCs[4] in accordance with **Table 7**, provided that samples may be prescreened to determine if such analyses will be required.[5] (Title 27, § 20420, subds. (e)-(f).)

[4] Volatile Organic Compounds associated with USEPA Method TO-15.

[5] A gas analyzer for methane concentrations or a Photo Ionization Detector (PID) for total VOCs concentrations may be used. If methane concentrations exceed 1 percent by volume OR organic vapors (total VOCs) exceed 1 ppm, a gas sample shall be obtained and analyzed for VOCs using Method TO-15. Both the screening results and lab

**Table 7—Unsaturated Zone Detection Monitoring (Soil Pore Gas), Constituent Parameters**

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Method TO-15 VOCs | (various) | µg/cm$^3$ | Annual | Annual |
| Methane | CH4 | % | Semiannual | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**c. Monthly Lysimeter Inspection**

Lysimeters shall be inspected monthly for the presence of liquid, which shall then be analyzed for the Monitoring Parameters in **Table 8** (Physical Parameters) and **Table 9** (Constituent Parameters). (Title 27, § 20420, subds. (e)-(f).) If liquid is detected in a previously dry pan lysimeter, the Discharger shall notify Central Valley Water Board staff within seven days of the detection.

**Table 8—Unsaturated Zone Detection Monitoring (Lysimeters), Physical Parameters**

| Physical Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Electrical Conductivity | SC | µmhos/cm | Semiannual | Semiannual |
| pH | PH | pH Units | Semiannual | Semiannual |
| Volume of Removed Liquid | (none) | Gallons | Monthly | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

analysis results shall be reported. Otherwise, the methane or total VOC screening results shall be reported, and no further lab analysis will be required.

**Table 9—Unsaturated Zone Detection Monitoring (Lysimeters), Constituent Parameters**

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| TDS | TDS | mg/L | Semiannual | Semiannual |
| Chloride | CL | mg/L | Semiannual | Semiannual |
| Carbonate | CACO3 | mg/L | Semiannual | Semiannual |
| Bicarbonate | BICACO3 | mg/L | Semiannual | Semiannually |
| Sulfate | SO4 | mg/L | Semiannual | Semiannual |
| Calcium | CA | mg/L | Semiannual | Semiannual |
| Magnesium | MG | mg/L | Semiannual | Semiannual |
| Potassium | K | mg/L | Semiannual | Semiannual |
| Sodium | NA | mg/L | Semiannual | Semiannual |
| Short List VOCs (Attachment A) | (various) | µg/L | Semiannual | Semiannual |
| 1,2,3-Trichloropropane per Method SRL-524M-TCP | TCPR123 | µg/L | Every 5 Years | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**d. Five-Year COCs**

Every five years, liquid from each lysimeter shall be analyzed for the Five-Year COCs listed below in **Table 10**. Five-Year COCs were last monitored in 2021, and shall be analyzed again in 2026. (Title 27, § 20420, subd. (g).)

**Table 10—Unsaturated Zone Detection Monitoring (Lysimeter), Five-Year COCs**

| Five-Year Constituent | GeoTracker Code | Units | Sampling & Reporting Freq. |
|---|---|---|---|
| Total Organic Carbon | TOC | mg/L | Every 5 Years |

| Five-Year Constituent | GeoTracker Code | Units | Sampling & Reporting Freq. |
|---|---|---|---|
| Dissolved Inorganics (Attachment B) | (various) | µg/L | Every 5 Years |
| Extended List VOCs (Attachment C) | (various) | µg/L | Every 5 Years |
| Semi-Volatile Organic Compounds (Attachment D) | (various) | µg/L | Every 5 Years |
| Chlorophenoxy Herbicides (Attachment E) | (various) | µg/L | Every 5 Years |
| Organophosphorus Compounds (Attachment F) | (various) | µg/L | Every 5 Years |

See Glossary for definitions of terms and abbreviations in table.

### 3. Surface Water

The Discharger diverts the majority of surface water drainage to an unlined runoff holding pond near the southern property boundary. This runoff holding pond has a total capacity of approximately nine acre-feet (2.93 million gallons). Overflow from the runoff holding pond drains to Jackson Creek. Jackson Creek is tributary to Dry Creek which enters Delta Waterways Boundary prior to discharge to the Mokelumne River which may be affected by a release. (See Title 27, § 20415, subd. (c)(1).)

#### a. Required Network

The Facility's surface water monitoring network consists of the monitoring points listed in **Table 11**. As of the date of this Order, the network meets the requirements of Title 27. (See § 20415, subd. (c).)

**Table 11—Surface Water Detection Monitoring Network**

| Monitoring Point | Location |
|---|---|
| S-1 | Downstream of Phase I landfill WMU, and located west of Phase I at east side of the Buena Vista Road culvert |
| S-2 | Downstream of Phase II and III landfill WMUs and located south of Phase III at the entrance to the runoff pond |
| S-3 | Background sample located in the intermittent stream bed in the northeast part of the landfill property |

See Glossary for definitions of terms and abbreviations in table.

**b. Sample Collection and Analysis**

When surface water is present at monitoring points in **Table 11** at any point during the monitoring period, samples shall be collected from each monitoring point and analyzed for the Monitoring Parameters in **Table 12** (Physical Parameters) and **Table 13** (Constituent Parameters), in accordance with the specified schedule. (Title 27, § 20420, subds. (e)-(f).)

**Table 12—Surface Water Detection Monitoring, Physical Parameters**

| Physical Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Electrical Conductivity | SC | µmhos/cm | Semiannual | Semiannual |
| pH | PH | Std. Units | Semiannual | Semiannual |
| Turbidity | TURB | NTUs | Semiannual | Semiannual |
| Hardness | HARD | mg / L (asCaCO3) | Semiannual | Semiannual |
| Presence of Oil & Grease | (none) | Yes / No | Semiannual | Semiannual |
| Flow to Surface Waters at Time of Sampling | (none) | Yes/No | Semiannual | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**Table 13—Surface Water Detection Monitoring, Constituent Parameters**

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| TSS | TSS | mg/L | Semiannual | Semiannual |
| Chloride | CL | mg/L | Semiannual | Semiannual |
| Carbonate | CACO3 | mg/L | Semiannual | Semiannual |
| Bicarbonate | BICACO3 | mg/L | Semiannual | Semiannual |
| Nitrate as Nitrogen | NO3N | mg/L | Semiannual | Semiannual |
| Sulfate | SO4 | mg/L | Semiannual | Semiannual |
| Calcium | CA | mg/L | Semiannual | Semiannual |
| Magnesium | MG | mg/L | Semiannual | Semiannual |
| Potassium | K | mg/L | Semiannual | Semiannual |
| Sodium | NA | mg/L | Semiannual | Semiannual |
| Short List VOCs (Attachment A) | (various) | µg/L | Semiannual | Semiannual |
| 1,2,3-Trichloropropane per Method SRL-524M-TCP | TCPR123 | µg/L | Every 5 Years | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**c. Five-Year COCs**

The Discharger shall analyze surface water samples for the Five-Year COCs listed in **Table 14** Five-Year COCs were last monitored in 2021, and shall be analyzed again in 2026. (Title 27, § 20420, subd. (g).)

**Table 14—Surface Water Detection Monitoring, Five-Year COCs**

| Five-Year Constituent | GeoTracker Code | Units | Sampling & Reporting Freq. |
|---|---|---|---|
| Total Organic Carbon | TOC | mg/L | Every 5 Years |
| Dissolved Inorganics (Attachment B) | (various) | µg/L | Every 5 Years |
| Extended List VOCs (Attachment C) | (various) | µg/L | Every 5 Years |
| Semi-Volatile Organic Compounds (Attachment D) | (various) | µg/L | Every 5 Years |
| Chlorophenoxy Herbicides (Attachment E) | (various) | µg/L | Every 5 Years |
| Organophosphorus Compounds (Attachment F) | (various) | µg/L | Every 5 Years |

See Glossary for definitions of terms and abbreviations in table.

**4. Class II Surface Impoundment Liquids**

Three months after commencement of discharge of liquid wastes to the replaced and expanded Class II surface impoundment, the Discharger shall collect and analyze class II surface impoundment liquids to characterize the liquids stored in the class II surface impoundment for the constituents identified in **Table 2**, **Table 3**, and **Table 4** (Title 27, § 20420(g)). The Discharger shall evaluate the potential risk of water quality degradation associated with each constituent in the event of an unauthorized release (Title 27, § 20420(c)) and verify the liquid wastes are compatible with containment features of the class II surface impoundment. (Title 27, §§ 20200(c), 20320(e)). The Discharger shall repeat sample collection and analysis once every five years.

**5. Summary of Water Quality Protection Standard (WQPS) Components**

The Water Quality Protection Standard (WQPS) is the Title 27 analytical framework through which an individual WMU is monitored for releases and impacts to water quality, i.e., the Detection Monitoring Program (DMP). (See Title 27, § 20390, subd. (a).) As explained in further detail below, for

the duration of the Compliance Period, the Monitoring Points situated at a WMU's Point of Compliance are sampled and analyzed for Monitoring Parameters indicative of a release. If concentrations of Constituents of Concern exceed Concentration Limits, the results are confirmed through Retesting Procedures.

**a. Compliance Period**

The "compliance period" is the minimum time for which a water quality monitoring will be required—i.e., equal to the sum of active years and the closure period. (Title 27, § 20410.) The period restarts each time an Evaluation Monitoring Program (EMP) is initiated for a given WMU. (Id., §§ 20410(a), 20415, 20425.) If a WMU is in corrective action, the period continues until it is demonstrated that the WMU has been in continuous compliance with its WQPS for at least three years. (Id., § 20410, subd. (c).)

**b. Monitoring Points**

For WQPS purposes, a "monitoring point" is any well, device, or location where monitoring is conducted, and is specified in the Facility's WDRs and subject to the WQPS. (Title 27, § 20164.) Monitoring Points are listed in **Section 0** (Detection Monitoring Program)—specifically **Table 1** (Groundwater), **Table 6** (Unsaturated Zone) and **Table 11** (Surface Water).

**c. Point of Compliance (POC)**

The Point of Compliance (POC) is a vertical plane at the WMU's hydraulically downgradient limit, extending through the uppermost underlying aquifer. (Title 27, §§ 10164, 20405(a).) The Facility's POC monitoring wells are listed below in **Table 1**.

**d. Constituents of Concern (COCs)**

Constituents of Concern (COCs) are waste constituents, reaction products, and hazardous constituents that are reasonably expected to be in or derived from waste contained in a WMU. (Title 27, §§ 20164, 20395.)

**e. Monitoring Parameters**

Monitoring Parameters are a predetermined set of COCs and measurable physical characteristics (e.g., temp., electrical conductivity, pH), which serve as reliable indicators of a WMU

release, and for which samples will therefore be routinely analyzed. (Title 27, §§ 20164, 20395(a), 20420(e)-(f).) For the purposes of this MRP, the Monitoring Parameters are:

i. For **Surface Water**, those in **Table 12** and **Table 13**;

ii. For **Groundwater**, those in **Table 2** and **Table 3**; and

iii. For the Unsaturated Zone, those in **Table 7**, **Table 8** and **Table 9**.

**f. Five-Year COCs**

In addition to the Monitoring Parameters described above, this Order requires the quinquennial analysis of samples for a larger range of constituents that are reasonably expected to be found in, or derived from, the waste contained within each unit at the Facility. (Title 27, §§ 20395, 20420(g).) Analytical results for Five-Year COCs were last submitted to the Central Valley Water Board as part of the 2021 Annual Monitoring Report and are due again in 2026. For the purposes of this MRP, the Five-Year COCs are listed in:

i. **Attachment B** (*Dissolved Inorganics*);

ii. **Attachment C** (*Extended List VOCs*);

iii. **Attachment D** (*Semi-Volatile Organic Compounds*);

iv. **Attachment E** (*Chlorophenoxy Herbicides*);

v. **Attachment F** (*Organophosphorus Compounds*); and

vi. Any other COCs listed in **Table 14** (*Surface Water*), **Table 4** (*Groundwater*) and **Table 10** (*Unsaturated Zone*)

**g. Concentration Limits**

The Concentration Limit for each COC is the “background concentration,” as determined by the statistical methods outlined in

subdivision (e)(8) of Title 27, § 20415.[6] (Title 27, § 20400, subds. (a), (b).) Methods for calculating Concentration Limits were proposed in the 15 August 2017 WQPS Report. The approved methods use Shewhart-CUMSUM Control Charts for calculating intrawell concentration limits for inorganic constituents. The concentration limit for all non-naturally occurring waste constituents including all volatile organic constituents is non-detect.

Concentration Limits shall be proposed and/or updated by the Discharger on a biannual basis (i.e., once every two years), in the Annual Monitoring Report (AMR) submitted per **Section 0** here.

Unless expressly rejected by the Executive Officer in writing, these Concentration Limits shall be incorporated as part of this Order. Several notable Concentration Limits, as set forth in the First Semi Annual 2021 Report, are set forth below in **Table 15**.[7]

If the Discharger fails to submit periodically updated concentration limits, as provided in this MRP, the existing concentration limits shall remain operative, provided that, where appropriate, the Executive Officer may revert to lower concentrations where warranted based on existing monitoring data.

---

[6] Concentration Limits are initially proposed by the Discharger, then reviewed and approved by the Central Valley Water Board (subject to any necessary revisions). The limits specified herein are approved and incorporated as part of the Facility's WDRs.

[7] The Concentration Limits set forth in **Table 15** is only a partial list of values that are provided for general informational purposes only. These limits shall be superseded once updated values are submitted.

**Table 15—Notable Concentration Limits, 1SA 2021 Annual Report (WQPS)**

| Well | Analysis | Chloride (mg/L) | Nitrate as N (mg/L) | Sulfate (mg/L) | TDS (mg/L) | Carbonate (mg/L) | Bicarbonate (mg/L) | Calcium (mg/L) | Magnesium (mg/L) | Potassium (mg/L) | Sodium (mg/L) |
|---|---|---|---|---|---|---|---|---|---|---|---|

See Glossary for definitions of terms and abbreviations in table.

**h. Retesting Procedures**

If monitoring results indicate measurably significant evidence of a release, as described in Section I.45 of the SPRRs (Standard Monitoring Specifications), the Discharger shall apply the following:

vii. **Non-Statistical Retesting Procedures (SPRRs, § I.46)** for analytes detected in less than 10 percent of background samples (e.g., non-naturally occurring COCs); and

viii. **Statistical Retesting Procedures (SPRRs, § I.46)** for analytes detected in at least 10 percent of background samples (e.g., naturally occurring COCs).

## C. Corrective Action Monitoring Program (CAMP)

To demonstrate the effectiveness of ongoing correction action at the Facility, the Discharger shall perform the following additional monitoring in accordance with of subdivision (d) of Title 27, § 20430.

### 1. Groundwater Corrective Action

Corrective action monitoring wells for shall be sampled for the parameters / constituents identified in **Table 2** (Field Parameters), **Table 3** (Monitoring Parameters), and **Table 4** (Five-Year COCs).

### 2. Unsaturated Zone Corrective Action

Unsaturated zone corrective action monitoring points shall be sampled for the parameters / constituents identified in **Table 8** (Field Parameters) and **Table 9** (Monitoring Parameters), and **Table 10** (Five-Year COCs).

### 3. Groundwater Extraction Well System

The Facility's current network of corrective action extraction wells is summarized in **Table 16**. Extracted LFG reports to a flare station in the LFG control system for combustion. Leachate pumped from the extraction wells and LFG condensate are discharged to the Class II surface impoundment.

**Table 16—Groundwater Corrective Action, Extraction Well Network**

| Well | Zone | Monitored Unit |
|---|---|---|
| P1-1 | Leachate Only | WMU I |
| P1-2 | Dual Phase Leachate / Gas | WMU I |
| P1-3 | Dual Phase Leachate / Gas | WMU I |
| P1-4 | Dual Phase Leachate / Gas | WMU I |
| P1-5 | Dual Phase Leachate / Gas | WMU I |
| P1-6 | Dual Phase Leachate / Gas | WMU I |
| P1-7 | Dual Phase Leachate / Gas | WMU I |
| P1-8 | Dual Phase Leachate / Gas | WMU I |
| P1-9 | Dual Phase Leachate / Gas | WMU I |
| P1-10 | Leachate Only | WMU I |
| P1-11 | Dual Phase Leachate / Gas | WMU I |
| P2-1 | Gas | WMU II / III |
| P2-2 | Gas | WMU II / III |
| P2-3 | Gas | WMU II / III |
| P2-4 | Gas | WMU II / III |
| P2-5 | Gas | WMU II / III |
| P2-6 | Gas | WMU II / III |
| P2-7 | Gas | WMU II / III |
| P2-8 | Gas | WMU II / III |
| P2-9 | Gas | WMU II / III |
| P2-10 | Gas | WMU II / III |

| Well | Zone | Monitored Unit |
|---|---|---|
| P2-11 | Gas | WMU II / III |
| P2-12 | Gas | WMU II / III |
| P2-13 | Gas | WMU II / III |

See Glossary for definitions of terms and abbreviations in table.

**4. Landfill Gas Corrective Action**

The Facility's landfill gas (LFG) corrective action system currently consists of **the dual phase extraction wells described in Table 16 and gas probes**. The Discharger shall log all system shutdowns (including causes and stop/start dates), monthly downtime and monthly runtime. All shutdowns, regardless of the type of restart, shall be recorded. This information shall be reported semiannually per **Section E.1**. Additionally, system performance shall be monitored in accordance with **Table 17**.

**Table 17—Landfill Gas Corrective Action Monitoring, Control System Performance**

| Parameter | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|
| Control System Runtime | Hours | N/A | Semiannual |
| Control System Downtime | % | N/A | Semiannual |
| Temperature into Plant | °F | Quarterly | Semiannual |
| Flare Combustion Temperature | °F | Quarterly | Semiannual |
| System Vacuum | mm Hg vacuum | Quarterly | Semiannual |
| Totalized Flow into Plant | $ft^3$ | Quarterly | Semiannual |
| Totalized Flow Rate into Plant | $ft^3$ / min | Quarterly | Semiannual |
| VOCs per USEPA Method TO-15 in Influent | µg / cm | Semiannual | Semiannual |

| Parameter | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|
| Methane in Influent | % | Quarterly | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**a. Extraction Well Field**

The Facility's network of LFG extraction wells, installed to address a release to the unsaturated zone and/or groundwater, is set forth in **Table 16**. LFG samples shall be collected from the network in **Table 16** and analyzed for the Monitoring Parameters specified in **Table 18**.

**Table 18—Landfill Gas Corrective Action, Extraction Well Network Monitoring Parameters**

| Monitoring Parameter | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|
| Atmospheric Temperature | °F | Quarterly | Semiannual |
| Atmospheric Pressure | Inches Hg | Quarterly | Semiannual |
| Methane | % by Vol. | Quarterly | Semiannual |
| Carbon Dioxide | % by Vol. | Quarterly | Semiannual |
| Oxygen | % by Vol. | Quarterly | Semiannual |
| Remainder Gas | % by Vol. | Quarterly | Semiannual |
| Gas Temperature at Each Well | °F | Quarterly | Semiannual |
| Initial Static Pressure in Wellhead | Inches Hg | Quarterly | Semiannual |
| Adjusted Static Pressure in Wellhead | Inches Hg | Quarterly | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

**b. Probe Network**

The Facility's network of LFG probes, installed to address a release to the unsaturated zone and/or groundwater, is set forth in

**Table 19**. These probes shall be monitored in accordance with the Monitoring Parameters in **Table 20**[8].

**Table 19—Landfill Gas Corrective Action, Probe Network**

| LFG Probe | Device Type | Zone | Monitored Unit(s) |
|---|---|---|---|
| GP-8 | Gas Probe | Waste Mass | WMU I |
| GP-9 | Gas Probe | Waste Mass | WMU I |
| GP-10 | Gas Probe | Waste Mass | WMU I |
| GP-11S | Gas Probe | Waste Mass | WMU I |
| GP-11D | Gas Probe | Waste Mass | WMU I |

**Table 20—Landfill Gas Corrective Action, Probe Network Monitoring Parameters**

| Parameter | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|
| Atmospheric Temperature | °F | Quarterly | Semiannual |
| Atmospheric Pressure | Inches Hg | Quarterly | Semiannual |
| Methane | % by Vol. | Quarterly | Semiannual |
| Carbon Dioxide | % by Vol. | Quarterly | Semiannual |
| Oxygen | % by Vol. | Quarterly | Semiannual |

[8] A gas analyzer for methane concentrations or a Photo Ionization Detector (PID) for total VOCs concentrations may be used. If methane concentrations exceed 1 percent by volume OR organic vapors (total VOCs) exceed 1 ppm, a gas sample shall be obtained and analyzed for VOCs using Method TO-15. Both the screening results and lab analysis results shall be reported. Otherwise, the methane or total VOC screening results shall be reported, and no further lab analysis will be required.

| Parameter | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|
| Remainder Gas | % by Vol. | Quarterly | Semiannual |
| Probe Pressure / Vacuum | Inches Hg | Quarterly | Semiannual |
| Volatile Organic Compounds per USEPA Method TO-15 | µg / cm | Semiannual | Semiannual |

See Glossary for definitions of terms and abbreviations in table.

## D. Additional Facility Monitoring

### 1. Leachate Collection & Removal System (LCRS)

The Discharger shall operate and maintain the leachate collection and removal system (LCRS) sumps and conduct monitoring of any detected leachate seeps in accordance with Title 27 and the following provisions.

#### a. Annual LCRS Testing

All Leachate Collection and Removal Systems (LCRS) shall be tested annually to demonstrate proper operation, with the results of each test being compared to the results of prior testing. (See Title 27, § 20340, subd. (d).)

#### b. Monthly Sump Inspection

The LCRS sump shall be inspected monthly for the presence of leachate. As provided in **Table 21**, the total flow and flow rate for leachate in each sump shall be recorded after each inspection and reported semiannually per **Section E.1**.

**Table 21—LCRS Sump Monitoring, Monthly Inspection Parameters**

| Physical Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Total Flow | (none) | Gallons | Monthly | Semiannually |
| Flow Rate | FLOW | Gallons/Day | Monthly | Semiannually |

See Glossary for definitions of terms and abbreviations in table.

**c. First Detection of Leachate in Sump**

Upon detecting leachate in a previously dry sump, the Discharger shall notify Central Valley Water Board staff within seven days, and immediately sample and analyze leachate for the parameters in **Table 22**.[9] Thereafter, whenever leachate is present in the same sump, the leachate shall be sampled and analyzed for the same parameters, and in accordance with the specified sampling and reporting schedule in **Table 22**.

**Table 22—LCRS Sump Monitoring, Parameters for Subsequent Monitoring**

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Electrical Conductivity | SC | µmhos/cm | Semiannually | Semiannually |
| pH | PH | pH Units | Semiannually | Semiannually |
| TDS | TDS | mg/L | Semiannually | Semiannually |
| Chloride | CL | mg/L | Semiannually | Semiannually |
| Carbonate | CACO3 | mg/L | Semiannually | Semiannually |
| Bicarbonate | BICACO3 | mg/L | Semiannually | Semiannually |
| Nitrate (as Nitrogen) | NO3N | mg/L | Quarterly | Semiannually |
| Sulfate | SO4 | mg/L | Semiannually | Semiannually |
| Calcium | CA | mg/L | Semiannually | Semiannually |

[9] The sampling and reporting schedules in **Table 22** are applicable for subsequent monitoring only. When notifying Central Valley Water Board staff of the first detection of leachate, the Discharger shall indicate when laboratory results are expected to be available.

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Magnesium | MG | mg/L | Semiannually | Semiannually |
| Potassium | K | mg/L | Semiannually | Semiannually |
| Sodium | NA | mg/L | Semiannually | Semiannually |
| Short List VOCs (Attachment A) | (various) | µg/L | Semiannually | Semiannually |
| 1,2,3-Trichloropropane per Method SRL-524M-TCP | TCPR123 | µg/L | Every 5 Years | Semiannually |

See Glossary for definitions of terms and abbreviations in table.

**d. Five-Year COCs**

At least once every five years, the Discharger shall sample and analyze any leachate present in the sump for the Five-Year COCs listed in **Table 23**.

**Table 23—LCRS Sump Monitoring, Five-Year COCs**

| Parameter | GeoTracker Code | Units | Sampling & Reporting Freq. |
|---|---|---|---|
| Total Organic Carbon | TOC | mg/L | Every 5 Years |
| Dissolved Inorganics (Attachment B) | (various) | µg/L | Every 5 Years |
| Extended List VOCs (Attachment C) | (various) | µg/L | Every 5 Years |
| Semi-Volatile Organic Compounds (Attachment D) | (various) | µg/L | Every 5 Years |
| Chlorophenoxy Herbicides (Attachment E) | (various) | µg/L | Every 5 Years |

| Parameter | GeoTracker Code | Units | Sampling & Reporting Freq. |
|---|---|---|---|
| Organophosphorus Compounds (Attachment F) | (various) | µg/L | Every 5 Years |

See Glossary for definitions of terms and abbreviations in table.

**2. Leachate Seepage**

Leachate that seeps to the surface from any landfill WMU shall, immediately upon detection, be sampled and analyzed for the Monitoring Parameters in **Table 24** (Physical Parameters) and **Table 25** (Constituent Parameters). See **Section E.3** for Reporting Requirements.) In the event of a reported leachate seep, Central Valley Water Board staff may direct additional sampling and analysis pursuant to Water Code § 13267, subdivision (b)(1).

**Table 24—Leachate Seep Monitoring, Physical Parameters**

| Physical Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Total Flow | (none) | Gallons | Upon Detection | See MRP, § E.3 |
| Flow Rate | FLOW | Gallons/Day | (same) | (same) |
| Electrical Conductivity | SC | µmhos/cm | (same) | (same) |
| pH | PH | pH Units | (same) | (same) |

See Glossary for definitions of terms and abbreviations in table.

**Table 25—Leachate Seep Monitoring, Constituent Parameters**

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| TDS | TDS | mg/L | Upon Detection | See MRP, § E.3 |
| Chloride | CL | mg/L | (same) | (same) |

| Constituent Parameter | GeoTracker Code | Units | Sampling Freq. | Reporting Freq. |
|---|---|---|---|---|
| Carbonate | CACO3 | mg/L | (same) | (same) |
| Bicarbonate | BICACO3 | mg/L | (same) | (same) |
| Nitrate as N | NO3N | mg/L | (same) | (same) |
| Sulfate | SO4 | mg/L | (same) | (same) |
| Calcium | CA | mg/L | (same) | (same) |
| Magnesium | MG | mg/L | (same) | (same) |
| Potassium | K | mg/L | (same) | (same) |
| Sodium | NA | mg/L | (same) | (same) |
| Short List VOCs (Attachment A) | (various) | µg/L | (same) | (same) |
| 1,2,3-Trichloropropane per Method SRL-524M-TCP | TCPR123 | µg/L | Every 5 Years | (same) |

See Glossary for definitions of terms and abbreviations in table.

**3. Regular Visual Inspection**

The Discharger shall perform regular visual inspections at the Facility in accordance with **Table 26** (Criteria) and **Table 27** (Schedule). Results of these regular visual inspections shall be included in Semiannual Monitoring Reports per **Section E.1**.

**Table 26—Criteria for Regular Visual Inspections**

| Category | Criteria |
|---|---|
| Within Unit | • Evidence of ponded water at any point on unit outside of any contact storm water/leachate diversions structures on the active face of unit (record affected areas on map).<br>• Evidence of erosion and/or of day-lighted refuse. |

| Category | Criteria |
|---|---|
| Unit Perimeter | • Evidence of leachate seep.<br>• Estimated size of affected area (record on map) and flow rate.<br>• Evidence of erosion and/or of day-lighted refuse. |
| Receiving Waters | • Floating and suspended materials of waste origin—presence or absence, source and size of affected areas.<br>• Discoloration and turbidity—description of color, source and size of affected areas. |

**Table 27—Regular Visual Inspection Schedule**

| Category | Wet Season **(1 Oct. to 30 April)** | Dry Season **(1 May to 30 Sept.)** |
|---|---|---|
| Active Units | Weekly | Monthly |
| Inactive or Closed Units | Monthly | Quarterly |

**4. Annual Facility Inspections**

Prior to 30 September of each year, the Discharger shall inspect the Facility to assess repair and maintenance needs for drainage control systems, cover systems and groundwater monitoring wells; and preparedness for winter conditions (e.g., erosion and sedimentation control). If repairs are made as result of the annual inspection, problem areas shall be photographed before and after repairs. Any necessary construction, maintenance, or repairs shall be completed by 31 October. See **Section E.4** for Reporting Requirements.

**5. Major Storm Events**

Within seven days of any storm event capable of causing damage or significant erosion (Major Storm Event), the Discharger shall inspect the Facility for damage to any precipitation, diversion and drainage facilities, and all landfill side slopes. Necessary repairs shall be completed within 30 days of the inspection. The Discharger shall take photos of any problem

areas before and after repairs. See **Section E.5** for Reporting Requirements.

**6. Five-Year Iso-Settlement Surveys (Closed Landfills)**

Every five years, the Discharger shall conduct an iso-settlement survey of each closed landfill unit and produce an iso-settlement map accurately depicting the estimated total change in elevation of each portion of the final cover's low-hydraulic-conductivity layer. For each portion of the landfill, this map shall show the total lowering of the surface elevation of the final cover, relative to the baseline topographic map. (Title 27, § 21090, subd. (e)(1)-(2).) See **Section E.6** for Reporting Requirements.

## E. Reporting Requirements

**Table 28—Summary of Required Reports**

| Section | Report | Deadline |
|---|---|---|
| § 0 | Semiannual Monitoring Reports (SMRs) | **1 August**<br>(1 January to 30 June)<br>**1 February**<br>(1 July to 31 December) |
| § 0 | Annual Monitoring Reports (AMRs) | 1 February |
| § E.3 | Leachate Seep Reporting | Immediately upon Discovery of Seepage<br>(*staff notification*)<br>**Within 7 Days**<br>(*written report*) |
| § 0 | Annual Facility Inspection Reports | 15 November |
| § 0 | Major Storm Reporting | Immediately after Damage Discovery<br>(*staff notification*)<br>Within 14 Days of Completing Repairs<br>(*written report, photos*) |

| Section | Report | Deadline |
|---|---|---|
| § 0 | Survey and Iso-Settlement Mapping | **Every Five Years** (Next Due 1 September 2023) |
| § 0 | Financial Assurances Reports | 1 June |
| § 0 | Water Quality Protection Standard Reports | **Proposed Revisions** (excluding Concentration Limits) |

**1. Semiannual Monitoring Reports (SMRs)**

The Discharger shall submit Semiannual Monitoring Reports (SMRs) on 1 August (1 Jan. to 30 June) and 1 February (1 July to 31 Dec.). SMRs shall contain the following materials and information:

a. A statement affirming that all sampling activities referenced in the report were conducted in accordance with the approved SCAP (see § A.4).

b. Map(s)/aerial photograph(s) depicting locations of all observation stations, monitoring points referenced in the report.

c. In tabulated format, all monitoring data required to be reported on a semiannual basis, including Groundwater Conditions and Monitoring Parameters. (See **Section E.9.b** for additional requirements.)

d. For each groundwater monitoring point referenced in the SMR:

i. The times each water level measurement was taken;

ii. The type of pump or other device used to purge and elevate pump intake level relative to screening interval;

iii. The purging methods used to stabilize water in the well bore before sampling (including pumping rate);

iv. The equipment and methods used for monitoring pH, temperature and electrical conductivity (EC) during purging activity, and the results of such monitoring;

v. Methods for disposing of purged water; and

vi. The type of device used for sampling, if different than the one used for purging.

e. Evaluation of concentrations for all Constituent Parameters and Five-Year COCs (when analyzed), comparison to current Concentration Limits, and results of any Retesting Procedures per **Section B.4.h**.

f. In the event of a verified exceedance of Concentration Limit(s), any actions taken per Section J of the SPRRs (*Response to Release*) for wells and/or constituents not already specifically addressed in Corrective Action Monitoring under this MRP.

g. Evaluation as to effectiveness of existing leachate monitoring and control facilities, and runoff/run-on control facilities.

h. For lined landfill units, a summary of any instances where leachate on the landfill liner system exceeded a depth of 30 cm (excluding the leachate sump), and information about the required notification and corrective action in Section E.13 of the SPRRs (*Standard Facility Specifications*).

i. Summaries of all Regular Visual Inspections conducted per **Section D3** during the reporting period.

j. For closed landfills, summaries of inspections, leak searches and final cover repairs conducted in accordance with an approved Post-Closure Maintenance Plan per Standard Provisions G.26-29 (*Standard Closure and Post-Closure Maintenance Specifications*).

k. Laboratory statements of results of all analyses evaluating compliance with the WDRs.

l. For any Corrective Action systems at the Facility, tabulated summaries of:

i. Operating hours;
ii. Monthly runtimes and downtimes; and
iii. Shutdowns, including start/stop dates and causes.

## 2. Annual Monitoring Reports (AMRs)

On 1 February of each year,[10] the Discharger shall submit an Annual Monitoring Report (AMR) containing following materials and information:

a. In tabulated format, all monitoring data for which annual reporting is required under this MRP. (See **Section E.9.b** for additional requirements for monitoring reports.)

b. Graphs of historical trends for all Monitoring Parameters and Five-Year COCs (if such analyses were performed) with respect to each monitoring point over the five prior calendar years.[11]

c. An evaluation of Monitoring Parameters with regard to the cation/anion balance, and graphical presentation of same in a Stiff diagram, Piper graph or Schoeller plot.

d. All historical monitoring data for which there are detectable results, including data for the previous year, shall be submitted in tabular form in a digital file.

e. For each groundwater well, quarterly hydrographs showing the elevation of groundwater with respect to the top and bottom of the screened interval, and the elevation of the pump intake,

f. A comprehensive discussion of the Facility's compliance record, and the result of any corrective actions taken or planned which may be needed to attain full compliance with the WDRs.

g. For landfill units, a map showing the areas and elevations of each unit where filling was completed during the previous calendar year;

---

[10] The Annual Monitoring Report may be combined with the Semiannual Monitoring Report for 1 July through 31 December of the same year, provided that the combination is clearly indicated in the title.

[11] Each graph shall contain individual data points (not mean values) and be appropriately scaled to accurately depict statistically significant trends or variations in water quality.

comparison to final closure design contours; and projected years in which each discrete module are expected to be filled.

h. A summary of the monitoring results, indicating any changes made or observed since the previous AMR.

i. A discussion on the results of Annual LCRS Testing conducted in accordance with **Section D.1.a**.

j. When required per **Section B.4.g** of this Order, periodic updates to the Concentration Limits for all Monitoring Parameters and WQPS Monitoring Points.

k. To assess the progress of ongoing Corrective Action at the Facility, the Discharger shall estimate the following and report in the Annual Monitoring Report (including method of calculations) in the format below:

**Table 29—Estimated VOC Mass Removal**

| Zone | Amount Removed During Year (Lbs) | Cumulative Amount Removed (Lbs) |
|---|---|---|
| Waste Mass | | |
| Shallow | | |
| Other | | |

**3. Leachate Seep Reporting**

Upon discovery of seepage from any disposal area within the Facility, the Discharger shall immediately notify the Central Valley Water Board via telephone or email; and within seven days, submit a written report with the following information:

a. Map(s) depicting the location(s) of seepage;

b. Estimated flow rate(s);

c. A description of the nature of the discharge (e.g., all pertinent observations and analyses);

d. Verification that samples have been submitted for analyses of the Monitoring Parameters in **Table 24** (*Physical Parameters*) and **Table 25** (*Constituent Parameters*), and an estimated date that the results will be submitted to the Central Valley Water Board; and

e. Corrective measures underway or proposed, and corresponding time schedule.

**4. Annual Facility Inspection Report**

By 15 November, the Discharger shall submit a report with results of the Annual Facility Inspection per **Section 0**. The report shall discuss any repair measures implemented, any preparations for winter, and include photographs of any problem areas and repairs.

**5. Major Storm Event Reports**

Immediately following each post-storm inspection described in **Section 0**, the Discharger shall notify Central Valley Water Board staff of any damage or significant erosion (upon discovery). Subsequent repairs shall be reported to the Central Valley Water Board (together with before and after photos of the repaired areas) within 14 days of completion.

**6. Survey and Iso-Settlement Map (Closed Landfill Units)**

The Discharger shall submit all iso settlement maps prepared in accordance with **Section D.6**. (Title 27, § 21090, subd. (e).) The next maps are due on 1 September 2023.

**7. Financial Assurances Report**

**By 1 August 2022**, The Discharger shall prepare and submit a report regarding financial assurances and the financial assurance mechanism used to support corrective action. The Report shall include a complete Pledge of Revenue Agreement package describing types of revenue that the Discharger ensures will be available in a timely manner to pay for postclosure maintenance or corrective action and include copies of the items required in Title 27, § 22245.

By 1 June of each year, the Discharger shall submit a copy of the annual financial assurances report due to the California Department of Resources Recycling and Recovery (CalRecycle) that updates the financial

assurances for closure, post-closure maintenance, and corrective action. (See WDRs Order.)

**8. Water Quality Protection Standard Report**

Any proposed changes[12] to the Water Quality Protection Standard (WQPS) components (§ B.4), other than periodic update of the Concentration Limits (§ B.4.g), shall be submitted in a WQPS Report for review and approval. The report shall be certified by a "Qualified Professional" (§ B), and contain the following:

a. *Potentially Affected Waterbodies*—An identification of all distinct bodies of surface water and groundwater potentially affected by a WMU release (including, but not limited to, the uppermost aquifer and any permanent or ephemeral zones of perched groundwater underlying the Facility);

b. *Map of Monitoring Points*—A map of all groundwater, surface water[13] and unsaturated zone monitoring points (including all background/upgradient and Point of Compliance monitoring points);

c. *Groundwater Movement*—An evaluation of perennial direction(s) of groundwater movement within the uppermost zone(s);

d. *Statistical Method for Concentration Limits*—A proposed statistical method for calculating Concentration Limits for Monitoring Parameters and Five-Year COCs (see § 0) detected in at least 10 percent of the background data (naturally-occurring constituents) using a statistical procedure from subdivisions (e)(8)(A)-(D) or (e)(8)(E) of Title 27, § 20415; and

---

[12] If subsequent sampling of the background monitoring point(s) indicates significant water quality changes due to either seasonal fluctuations or other reasons unrelated to onsite waste management activities, the Discharger may request modification of the WQPS.

[13] To the extent that surface water monitoring is included in the Detection Monitoring Program.

e. *Retesting Procedure*—A retesting procedure to confirm or deny measurably significant evidence of a release (Title 27, §§ 20415(e)(8)(E), 20420(j)(1)-(3)).

## 9. General Reporting Provisions

### a. Transmittal Letters

Each report submitted under this MRP shall be accompanied by a Transmittal Letter providing a brief overview of the enclosed report, as well as the following:

i. Any violations found since the last report was submitted, a description of all actions undertaken to correct the violation (referencing any previously submitted time schedules for compliance), and whether the violations were corrected; and

ii. A statement from the submitting party, or its authorized agent, signed under penalty of perjury, certifying that, to the best of the signer's knowledge, the contents of the enclosed report are true, accurate and complete.

### b. Monitoring Data and Reports

#### i. Electronic Submission via GeoTracker

All reports with monitoring data (e.g., SMRs and AMRs) shall be submitted electronically via the State Water Board's Geotracker Database (https://geotracker.waterboards.ca.gov). After uploading a report, the Discharger shall notify Central Valley Water Board staff via email at CentralVallySacramento@WaterBoards.ca.gov. The following information shall be included in the body of the email:

| | |
|---|---|
| Attention: | Title 27 Compliance & Enforcement Unit |
| Report Title: | [*Title of Report*] |
| GeoTracker Upload ID: | [*Number*] |
| Facility Name: | Buena Vista Landfill |
| County: | Amador County |
| CIWQS Place ID: | 210700 |

**ii. Data Presentation and Formatting**

In reporting monitoring data, the Discharger shall arrange the data in tabular form so that the date, the constituents, the concentrations, and the units are readily discernible. Additionally, data shall be summarized in a manner that clearly illustrates compliance/noncompliance with WDRs.

**iii. Non-Detections / Reporting Limits**

Unless the reporting limits (RL) are specified in the same table, non-detections and sub-RL concentrations shall be reported as "< [limit]" (e.g., "< 5 µg/L").

**iv. Units**

Absent specific justification, all monitoring data shall be reported in the units specified herein.

**c. Compliance with SPRRs**

All reports submitted under this MRP shall comply with applicable provisions of the SPRRs, including those in Section I (Standard Monitoring Specifications) and Section J (Response to Release).

**d. Additional Requirements for Monitoring Reports**

Every monitoring report submitted under this MRP (e.g., SMRs [§ E.1], AMRs [§ E.2]) shall include a discussion of relevant field and laboratory tests, and the results of all monitoring conducted at the site shall be reported to the Central Valley Water Board in accordance with the reporting schedule above for the calendar period in which samples were taken or observations made.

## F. Record Retention Requirements

The Discharger shall maintain permanent records of all monitoring information, including without limitation: calibration and maintenance records; original strip chart recordings of continuous monitoring instrumentation; copies of all reports required by this MRP; and records of all data used to complete the application for WDRs. Such records shall be legible, and show the following for each sample:

1. Sample identification and the monitoring point or background monitoring point from which it was taken, along with the identity of the individual who obtained the sample;

2. Date, time and manner of sampling;

3. Date and time that analyses were started and completed, and the name of the personnel and laboratory performing each analysis;

4. A complete list of procedures used (including method of preserving the sample, and the identity and volumes of reagents used);

5. A calculation of results; and

6. The results of all analyses, as well as the MDL and PQL for each analysis (all peaks shall be reported).

## LIST OF ATTACHMENTS

Attachment A—Volatile Organic Compounds, Short List
Attachment B—Dissolved Inorganics (Five-Year COCs)
Attachment C—Volatile Organic Compounds, Extended List (Five-Year COCs)
Attachment D—Semi-Volatile Organic Compounds (Five-Year COCs)
Attachment E—Chlorophenoxy Herbicides (Five-Year COCs)
Attachment F—Organophosphorous Compounds (Five Year COCs)

## ENFORCEMENT

If, in the opinion of the Executive Officer, the Discharger fail to comply with the provisions of this Order, the Executive Officer may refer this matter to the Attorney General for judicial enforcement, may issue a complaint for administrative civil liability, or may take other enforcement actions. Failure to comply with this Order may result in the assessment of Administrative Civil Liability of up to $10,000 per violation, per day, depending on the violation, pursuant to the Water Code, including §§ 13268, 13350 and 13385. The Central Valley Water Board reserves its right to take any enforcement actions authorized by law.

## ADMINISTRATIVE REVIEW

Any person aggrieved by this Central Valley Water Board action may petition the State Water Board for review in accordance with Water Code §n 13320 and California Code of Regulations, title 23, § 2050 et seq. To be timely, the petition must be received by the State Water Board by 5:00 pm on the 30th day after the date of this Order; if the 30th day falls on a Saturday, Sunday or state holiday, the petition must be received by the State Water Board by 5:00 pm on the next business day. The law and regulations applicable to filing petitions are available on the State Water Board website

(http://www.waterboards.ca.gov/public_notices/petitions/water_quality). Copies will also be provided upon request.

# ATTACHMENT A—VOLATILE ORGANIC COMPOUNDS, SHORT LIST

## USEPA Method 8260B, Short List

| Constituent | Geotracker Code |
|---|---|
| Acetone | ACE |
| Acrylonitrile | ACRAMD |
| Benzene | BZ |
| Bromochloromethane | BRCLME |
| Bromodichloromethane | BDCME |
| Bromoform (Tribromomethane) | TBME |
| Carbon disulfide | CDS |
| Carbon tetrachloride | CTCL |
| Chlorobenzene | CLBZ |
| Chloroethane (Ethyl chloride) | CLEA |
