NOTICE OF APPLICABILITY (NOA); LOW THREAT GENERAL WASTE DISCHARGE REQUIREMENTS ORDER R5-2013-0074; FAMILY ENTERTAINMENT ZONE CONSTRUCTION DEWATERING PROJECT; SAN JOAQUIN COUNTY

Our office received a Notice of Intent (NOI) on 25 January 2017, from Knife River Construction (hereinafter Discharger) for the Family Entertainment Zone Construction Dewatering Project (Project). Based on the information in the NOI, Central Valley Regional Water Quality Control Board (Central Valley Water Board) staff has determined that the project meets the required conditions for approval under the General Order for *Dewatering and Other Low Threat Discharges to Surface Waters* (Low Threat General Order). This project is hereby assigned Low Threat General Order R5-2013-0074-160 and National Pollutant Discharge Elimination System (NPDES) Permit No. CAG995001. Please reference unique Order **R5-2013-0074-160** in all future correspondence and documents.

The enclosed Low Threat General Order may also be viewed at the following web address: http://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/general_orders/r5-2013-0074.pdf. You are urged to familiarize yourself with the contents of the entire document. The Low Threat General Order prescribes mandatory discharge monitoring and reporting requirements. The project activities shall be operated in accordance with the requirements contained in this NOA, the Low Threat General Order, and with the information submitted by the Discharger.

CALIFORNIA TOXICS RULE / STATE IMPLEMENTATION POLICY MONITORING

The Low Threat General Order incorporates the requirements of the California Toxics Rule (CTR) and the State Water Resources Control Board's (State Water Board), *Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California, 2005*, also known as the State Implementation Policy (SIP). Screening levels for CTR constituents are found in Attachment B of the Low Threat General Order. Review of your water quality data in comparison to the CTR screening values showed no reasonable potential to cause or contribute to an instream exceedance of the CTR criteria in the French Camp Outlet Canal.

PROJECT DESCRIPTION

The Discharger is under contract with the City of Manteca to construct the Project, which is located in the City of Manteca near the westerly dead end of Daniels Street. The Project consists of installing 4,000 linear feet (LF) of 4 inch diameter sewer pipe, 2,000 LF of 18 inch

KARL E. LONGLEY ScD, P.E., CHAIR | PAMELA C. CREEDON P.E., BCEE, EXECUTIVE OFFICER

11020 Sun Center Drive #200, Rancho Cordova, CA 95670 | www.waterboards.ca.gov/centralvalley

Family Entertainment Zone Construction Dewatering Project

diameter water line, and 1,000 LF of 54 inch diameter storm drain. Construction dewatering operations will be needed to install the 4,000 LF of sewer pipe. The Project includes the installation of 80 temporary dewatering wells at a depth of 50 feet along the alignment of the sewer pipeline to extract the groundwater.

The extracted groundwater will be disposed through discharge to approximately 70 acres of agricultural fields owned by the City of Manteca and to the South San Joaquin Irrigation District's French Camp Outlet Canal, a water of the United States. The Project began in November 2016 with the extracted groundwater being discharge to land per a 14 November 2016 NOA issued to the City of Manteca under General Order 2003-003-DWQ, Statewide Discharge Requirements for Discharges to Land with a Low Threat to Water Quality (Order 2003-0003-DWQ-0156). In accordance with this NOA the Discharger may begin discharging extracted groundwater to the French Camp Outlet Canal. The discharge rate to the French Camp Outlet Canal is expected to be approximately 1.3 million gallons per day, and will occur for less than four months.

This NOA only applies to the surface water discharges to the French Camp Outlet Canal. Discharges to land will continue to be regulated by Order 2003-0003-DWQ-0156 per the NOA issued for this project on 14 November 2016.

MONITORING AND REPORTING

The Discharger must notify Central Valley Water Board staff 24 hours 1) before the start of each new discharge, 2) as soon as noncompliance is anticipated, and 3) when the discharge ceases.

The Discharger must submit quarterly reports, as described in Attachment E, Section X of the Low Threat General Order, even if there is no discharge or receiving water flow during the reporting quarter, until the Discharger formally requests that coverage under the Order be terminated.

Monitoring Locations – The Discharger shall monitor the effluent and the French Camp Outlet Canal at the specified locations as follows:

Table E-1. Monitoring Station Locations

Discharge Point Name	Monitoring Location Name	Monitoring Location Description
001	EFF-001	A location where a representative sample of the effluent can be collected prior to discharging to the French Camp Outlet Canal
--	RSW-001	The French Camp Outlet Canal, approximately 50 feet upstream from the point of discharge.
--	RSW-002	The French Camp Outlet Canal, approximately 50 feet downstream from the point of discharge.

Effluent Monitoring – When discharging to the French Camp Outlet Canal, the Discharger shall monitor the effluent at EFF-001 as follows:

Table E-3. Effluent Monitoring – Discharges Less than 4 Months in Duration

Parameter	Units	Sample Type	Minimum Sampling Frequency ^{1,2}	Required Analytical Test Method
Biochemical Oxygen Demand (5-Day @ 20 °C)	mg/L	Grab	2/Month	3
Chlorine, Total Residual	mg/L	Grab	1/Discharge Event	3,4,5
Electrical Conductivity @ 25 °C	µmhos/cm	Grab	2/Month	3
pH	standard units	Grab	2/Month	3
Settleable Solids	mL/L	Grab	2/Month	3
Total Suspended Solids	mg/L	Grab	2/Month	3

¹ If the discharge is intermittent rather than continuous, then on the first day of each such intermittent discharge, the Discharger shall monitor and record data for all of the constituents listed above, after which the frequencies of analysis given in the schedule shall apply for the duration of each such intermittent discharge. In no event shall the Discharger be required to monitor and record data more often than twice the frequencies listed in the table.

² The first sample shall be collected at the start of discharge.

³ Pollutants shall be analyzed using the analytical methods described in 40 CFR Part 136.

⁴ A handheld field meter may be used, provided the meter utilizes a USEPA-approved algorithm/method and is calibrated and maintained in accordance with the manufacturer's instructions. A calibration and maintenance log for each meter used for monitoring required by this Monitoring and Reporting Program shall be maintained at the Facility.

⁵ Total chlorine residual must be monitored with a method sensitive to and accurate at a reporting level of 0.08 mg/L, or any more stringent reporting level included in a final statewide policy or standard for total residual chlorine.

Receiving Water Monitoring – When discharging to surface water, the Discharger shall monitor, or provide monitoring data, for the receiving water at RSW-001 and RSW-002 as follows:

Table E-5. Receiving Water Monitoring – Discharges Less than 4 Months in Duration

Parameter	Units	Sample Type	Monitoring Frequency	Required Analytical Test Method
Dissolved Oxygen	mg/L	Grab	2/Week	1
Electrical Conductivity @ 25 °C	µmhos/cm	Grab	2/Week	1
pH	standard units	Grab	2/Week	1
Temperature	°F	Grab	2/Week	1
Turbidity	NTU	Grab	2/Week	1

¹ Pollutants shall be analyzed using the analytical methods described in 40 CFR Part 136.

In conducting the receiving water sampling, a log shall be kept of the receiving water conditions throughout the reach bounded by RSW-001 and RSW-002. Attention shall be given to the presence or absence of:

- a. Floating or suspended matter
- b. Discoloration
- c. Bottom deposits
- d. Aquatic life
- e. Visible films, sheens, or coatings
- f. Fungi, slimes, or objectionable growths
- g. Potential nuisance conditions

Notes on receiving water conditions shall be summarized in the monitoring report.

Monitoring Report Submittals - Monitoring in accordance with the Low Threat General Order shall begin upon initiation of discharge. Monitoring reports shall be submitted to the Central Valley Water Board on a quarterly basis, beginning with the first Quarter 2017. This report shall be submitted by 1 May 2017. If monitoring samples were not obtained within 24 hours of initiation of the discharge, the Discharger must document the reasons in the corresponding monitoring report. If the discharge has not begun there is no need to monitor. However, a monitoring report must be submitted stating that there has been no discharge. Table E-6, below, summarizes the monitoring report due dates required under the Low Threat General Order. Quarterly monitoring reports must be submitted until your coverage is formally terminated in accordance with the Low Threat General Order, even if there is no discharge during the reporting quarter.

Table E-6. Monitoring Periods and Reporting Schedule

Sampling Frequency	Monitoring Period Begins On	Quarterly Report Due Date
1/Discharge Event, Continuous, 2/Week, 1/Month, 2/Month, 1/Quarter	1 February 2017	1 May (1 Jan – 31 Mar) 1 Aug (1 Apr – 30 Jun) 1 Nov (1 Jul – 30 Sep) 1 Feb, of following year (1 Oct – 31 Dec)

GENERAL INFORMATION AND REQUIREMENTS

The Central Valley Water Board shall be notified immediately if any effluent limit violation is observed during implementation of the project.

Discharge of material other than what is described in the application is prohibited. The required annual fee (as specified in the annual billing you will receive from the State Water Resources Control Board) shall be submitted until the discharge is terminated. To terminate coverage under the Low Threat General Order, the Discharger must submit written notification to the Central Valley Water Board that the discharge regulated by this Low Threat General Order has ceased and is no longer necessary. If a timely written request is not received, then the Discharger will be required to pay additional annual fees as determined by the State Water Resources Control Board.

ENFORCEMENT

Failure to comply with the Low Threat General Order may result in enforcement actions, which could include civil liability. Effluent limitation violations are subject to discretionary penalties of up to \$10,000 per violation and to Mandatory Minimum Penalties (MMPs) of \$3,000 per violation. In addition, late monitoring reports are subject to both discretionary and mandatory penalties. When discharges do not occur during a quarterly report monitoring period, the Discharger must still submit a quarterly monitoring report indicating that no discharge occurred to avoid being subject to enforcement actions.

COMMUNICATION

All documents, including monitoring reports, response to inspections, written notifications, and documents submitted to comply with this NOA and the Low Threat General Order, should be submitted to the NPDES Compliance unit, attention Genevieve Sparks. Ms. Sparks can be reached at (916) 464-4821 or Genevieve.Sparks@waterboards.ca.gov.

We have transitioned to a paperless office, therefore, please convert all documents to a searchable Portable Document Format (pdf) and email them to centralvalleysacramento@waterboards.ca.gov. Please include the following information in the email: Attention: NPDES Compliance section; Discharger: Knife River Construction; Facility: Family Entertainment Zone Construction Dewatering Project; County: San Joaquin County; and the CIWQS place ID 832069 in the body of the email. Documents that are 50 megabytes or larger must be transferred to a DVD, or flash drive and mailed to our office, attention "ECM Mailroom-NPDES". Please include the attached Monitoring Report Transmittal Form as the first page of each monitoring report.

Any person aggrieved by this action of the Central Valley Water Board may petition the State Water Board to review the action in accordance with California Water Code section 13320 and California Code of Regulations, title 23, sections 2050 and following. The State Water Board must receive the petition by 5:00 p.m., 30 days after the date of this NOA, except that if the thirtieth day following the date of this Order falls on a Saturday, Sunday, or state holiday, the petition must be received by the State Water Board by 5:00 p.m. on the next business day. Copies of the law and regulations applicable to filing petitions may be found on the internet at: http://www.waterboards.ca.gov/public_notices/petitions/water_quality or will be provided upon request.
