PROJECT LOCATION AND DESCRIPTION

Donner Lake Land Trust, Inc. (Discharger) is planning on performing a well pumping test on a domestic well to be added to the Webber Lake Campground water supply system. The campground is located at Highway 89/Fiberboard Road in Sierraville, California. The domestic well will be tested for approximately 4 to 10 days. The well would be discharging approximately 10 gallons per minute for an estimated 6 hours per day; a total of 3,600 gallons per day will be applied to land. The total discharge is estimated at 14,400 to 36,000 gallons.

The well water will be discharged to 3.25 acres of open forest land owned by the Discharger. The water will be allowed to infiltrate, and best management practices will be used to minimize runoff, such as the use of straw waddles, straw bales, and/or silt fencing.
