Discharger and Tentative Order Information

The City of Mt. Shasta (Discharger) is the owner and operator of the City of Mt. Shasta Wastewater Treatment Plant (Facility), located at 2500 Grant Road, Mt. Shasta, CA. The Facility provides sewerage services for the City of Mt Shasta, serving a population of approximately 3,223. The Facility provides treatment for an average dry weather flow of 0.8 million gallons per day of domestic wastewater. The Facility discharges treated wastewater to the Sacramento River, a water of the United States. The Facility's existing discharge points are located at the Sacramento River, a leachfield on property owned by the U.S. Department of Agriculture, Forest Service, and as recycled water used by the Mt. Shasta Resort Golf Course.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2017-0117, adopted by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 08 December 2017. An Order is proposed to renew the NPDES permit.

The tentative Order proposes effluent limitations and other requirements to implement the *State Policy for Water Quality Control: Toxicity Provisions* (as amended Oct. 5, 2021) ("Toxicity Provisions"). The Toxicity Provisions will take effect upon approval by U.S. EPA. If U.S. EPA does not approve the Toxicity Provisions before the public hearing, Central Valley Water Board staff will propose revisions to the tentative Order to remove these requirements and include monitoring requirements, and, as appropriate, effluent or receiving water limitations for chronic and acute toxicity based on the Basin Plan's narrative toxicity objective and the *Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California* (2005).
