Discharger and Tentative Order Information

The City of Lathrop (Discharger) is the owner of the Consolidated Treatment Facility (Facility), located at 18800 Christopher Way, Lathrop, CA 95330. The Facility provides sewerage service for the communities in the western and southern portions of the City of Lathrop, the Crossroads Commercial Center area, and Lathrop Gateway Business Park and serves a population of approximately 13,200. The design average dry weather flow capacity of the Facility is 2.5 million gallons per day. The Facility is authorized to discharge tertiary treated municipal and industrial wastewater to the San Joaquin River, a water of the United States within the Sacramento-San Joaquin Delta. The Facility's discharge point is located at the east side bank of San Joaquin River approximately a mile and a quarter south of the River Highlands Parkway Bridge.

The Discharger is ceasing discharges of wastewater to land to maximize the beneficial use of recycled water mainly through landscape irrigation and construction uses. The remaining effluent will be discharged via the surface water outfall to the San Joaquin River. The distribution and use of recycled water is regulated under the State Water Board Water Quality Order WQ 2016-0068-DDW, Water Reclamation Requirements for Recycled Water Use R5-2016-0028-02.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2022-0004 (NPDES permit), issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 17 February 2022. An Order is proposed to amend the NPDES permit to include recycled water production specifications and monitoring, biosolids handling specifications and monitoring, a groundwater limitation, and clarifications to pyrethroids pesticides baseline monitoring requirements per the 2017 Basin Plan Amendment for Control of Pyrethroid Pesticide Discharges.
