The Facility is a groundwater extraction and treatment system designed to remove volatile organic compounds from groundwater with a permitted flow of 0.25 million gallons per day.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2021-0006, issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 18 February 2021. An Order is proposed to renew the NPDES permit. The proposed permit carries forward the current effluent limits for arsenic, total petroleum hydrocarbons, and volatile organic compounds and removes effluent limits for barium, electrical conductivity, and acute whole effluent toxicity.
