
Central Valley Regional Water Quality Control Board

PUBLIC NOTICE

Former Paul's Cleaners
1301 Florin Road, Sacramento, California

Proposed No Further Action Determination

Public Comment Period:

20 March 2026 – 20 April 2026

PUBLIC NOTICE:

The public is invited to comment. No Further Action is requested for the Former Paul's Cleaners environmental cleanup site. Former Paul's Cleaners was at 1301 Florin Road, Sacramento, Sacramento County, California. Figure 1 is a map showing the location of the property.

CASE SUMMARY:

The property is a shopping center. There used to be a dry cleaner business at the property. The dry cleaner used the solvent PCE to clean clothes. PCE leaked into soil and groundwater at the property. PCE can be of concern in air or drinking water.

Cleanup at the property removed PCE from soil vapor and from groundwater. There is still some PCE in soil vapor beneath buildings at the property, but at levels low enough for safe use of the property. PCE in groundwater around the building is below the California Maximum Contaminant Level for drinking water. At two monitoring locations PCE is still present at higher levels, but these levels are decreasing. Remaining PCE does not threaten any drinking water wells.

PCE in soil vapor under the buildings and in groundwater are at low enough levels that they do not pose a risk to humans or the environment under the current property use. The no further action will include a Land Use Covenant (LUC). The LUC will be added to the property's deed. The LUC will limit land use commercial business uses.
