PUBLIC NOTICE: PROPOSED PETROLEUM UNDERGROUND STORAGE TANK CASE CLOSURE

PUBLIC COMMENT PERIOD: 15 May through 14 July 2026 (60 days)

QUICK-N-SAVE #2; 2057 S. EL DORADO STREET, STOCKTON, SAN JOAQUIN COUNTY; LUST CASE #391086, GLOBAL ID #T0607700901

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) is asking for public comments. We plan to close the leaking tank case, known as Quick-N-Save #2. The property is located at 2057 S. El Dorado Street in Stockton, California.

In 1999 a leak was found in the underground fuel tanks at the property. In 1999 and 2001 the fuel tanks were removed from the ground. Testing showed that the leaked gasoline had contaminated the soil and groundwater. Between 2005 and 2022, workers carried out several cleanup actions that removed a large amount of gasoline contamination from soil and groundwater (approximately 195 pounds [32 gallons]).

Recently, the consultant hired by the person responsible for the leak concluded that the gasoline impacts remaining in the soil and groundwater do not pose a significant risk to human health, the environment, or future use of the property based on California's Low-Threat Closure Policy criteria. The remaining dissolved gasoline in groundwater is expected to naturally break down over time. Because the risk is low, the consultant recommended closing the case under California's Low-Threat Closure Policy. The Central Valley Water Board will review public comments before making a final decision. A map is attached which shows the property location and where the remaining dissolved gasoline is in groundwater.

FOR MORE INFORMATION

You can obtain additional information on the [State Water Resources Control Board's GeoTracker website](https://geotracker.waterboards.ca.gov/) (<https://geotracker.waterboards.ca.gov/>). Please contact Alan M. Buehler with the Central Valley Water Board if you have any comments or questions about this Public Notice or about the environmental cleanup activities at Quick-N-Save #2:
