

JAMES CROOK, Ph.D., P.E.

An environmental engineer with more than 40 years of experience in both consulting and state agency environments. Developed and executed a broad range of engineering services for water and wastewater agencies in the public and private sectors in the United States and abroad. Has authored more than 100 technical papers and reports, and is an internationally recognized expert in the area of water reclamation and reuse. Has technical expertise and experience in many facets of environmental engineering, including public health, treatment technology, research, project planning and implementation, regulations and permitting, and quality assurance/quality control. Helped develop water reuse regulations for Spain, Kuwait, and several states, including California, Florida, Massachusetts, North Carolina, Virginia, and Washington. Among his service on many expert panels and committees, was Chair of the National Research Council Committee (NRC) on the Evaluation of the Viability of Augmenting Potable Water Supplies with Reclaimed Water and served on NRC Committee on the Assessment of Water Reuse as an Approach for Meeting Future Water Supply Needs. Currently serves on the American Water Works Association, International Water Association, and Water Environment Federation Water Reuse Committees.
