

# Drought and Conservation Reporting Public Workshop

Eric Zúñiga, PE  
Drought Response Program Manager

Division of Drinking Water, July 13, 2023

# Overview

---

Welcome and Introductions –  
<http://video.calepa.ca.gov>

---

[Q & A Guidelines](#)

---

[Drought and Conservation Reporting Requirements](#)

---

[Reporting Awards](#)

---

[Future Enhancements](#)

---

[SAFER Clearinghouse - Drought Reporting Live Demo](#)

# POLL #1: Have you ever attended our previous Drought and Conservation Reporting Brown Bags?

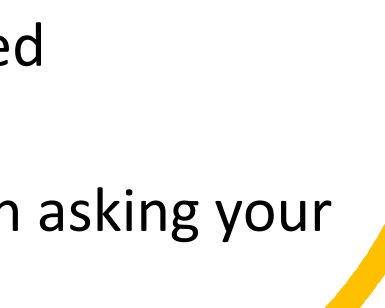

- Yes
- No

# POLL #2: What is your primary role in Drought and Conservation reporting?

- Interested party that is not responsible for reporting
- Collecting or reporting data into the portal
- Management in charge of staff who are reporting
- Regulatory staff

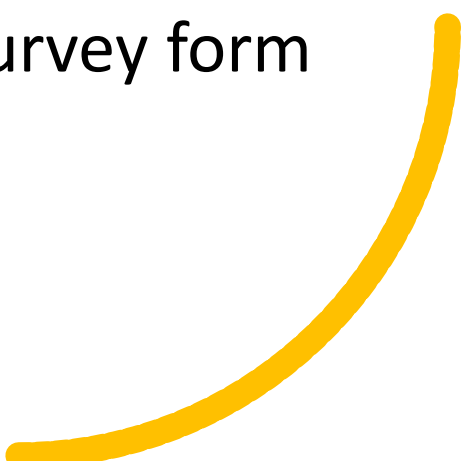

A large orange circle on the left side of the slide, partially cut off by the edge.

## • Q&A Guidelines

- We aim to create an open, respectful dialogue and provide helpful responses within the scope of this workshop.
  - Use the Q & A feature to have your question or comment placed in the queue.
  - We will get to as many questions as possible in the allotted time frame. Feel free to UPVOTE on questions instead of submitting a duplicate question.
  - Please keep questions succinct and relevant to the Drought and Conservation Reporting Portal Sections that are being presented and associated requirements.
  - Include your name and affiliation when asking your question.
- 
- A thick yellow curved line at the bottom right of the slide.

- Q&A  
Guidelines

- You will be muted unless called on to clarify your question.
  - If we go over on time, we may not get to all questions during this workshop.
  - Questions of a system-specific or technical nature about troubleshooting the portal may be better addressed through our email help desk at [ddw-drought@waterboards.ca.gov](mailto:ddw-drought@waterboards.ca.gov)
  - You can continue to submit questions after the workshop by filling out the survey form that will be sent out.
- 

Drought and  
Conservation  
Reporting  
Technical Order  
Requirements

Issued on January 1, 2023

Effort to consolidate existing,  
new, and duplicative  
requirements into the SAFER  
Clearinghouse

## Reducing Duplicative Reporting

Portal	Number of Water Systems Reporting
<b>Clearinghouse Drought Reporting</b>	274 water systems ultimately affected by orders  *some water outage systems still not flagged due to lack of water quantity data
<b>Electronic Annual Reporting (Duplicative)</b>	7,308
<b>DRINC Monthly Conservation Reporting (Duplicative)</b>	529
<b>SB552 reporting requirements for CWS and NTNC Schools that are water systems (NEW)</b>	2,715

# Drought and Conservation Reporting Requirements

All Community Water Systems are required to report, including wholesalers and urban water suppliers (2850 water systems)

All Non-Transient Non-Community Water Systems that are schools are required to report (388 water systems)

Launched January 2023: reporting on Water Shortage, Source Reporting, and Supply and Demand. Urbans and drought order systems also report on Supply Augmentation and Demand Reduction.

# Monthly Reporting Frequencies & Deadlines

Reporting Period	Schools conducting Monthly Drought & Conservation Reporting	Monthly Deadline for 2022 Drought Order Reporting	Monthly Deadline for Urban Retail Water Supplier Reporting
Jan-23	April 30, 2023	February 7, 2023	April 30, 2023
Feb-23		March 7, 2023	
Mar-23		April 7, 2023	
Apr-23	July 31, 2023	May 7, 2023	May 31, 2023
May-23		June 7, 2023	June 30, 2023
Jun-23		July 7, 2023	July 31, 2023
Jul-23	October 31, 2023	August 7, 2023	August 31, 2023
Aug-23		September 7, 2023	September 30, 2023

# Data Reported

---

Section	Description
Water Shortage	Per month, water systems are required to report if they are experiencing, or about to experience, a severe water shortage. Information about the system's Water Shortage Contingency Plan is also collected.
Source Reporting	Per month, water systems are required to submit their monthly source production volumes and information regarding their sources' current capacity.
Supply & Demand	Per month, water systems are required to report their total monthly potable and non-potable supply (production) and demand (delivery) volumes. This information is broken down by source water types and customer classifications.
Supply Augmentation	Per month, water systems are required to provide information on supply augmentation activities if they are pursuing any.
Demand Reduction	Per month, water systems are required to provide information on demand reduction activities if they are pursuing any.

# POLL #3: What part(s) of the portal do you need more guidance on? (Check all that apply)

- Registering for an account
- Navigating the portal
- Entering data
- Using batch templates
- Certifying and submitting
- Understanding definitions

# Use of the Data

DATA QUALITY REVIEWS TO ENSURE  
GOOD DECISIONS ARE BEING MADE

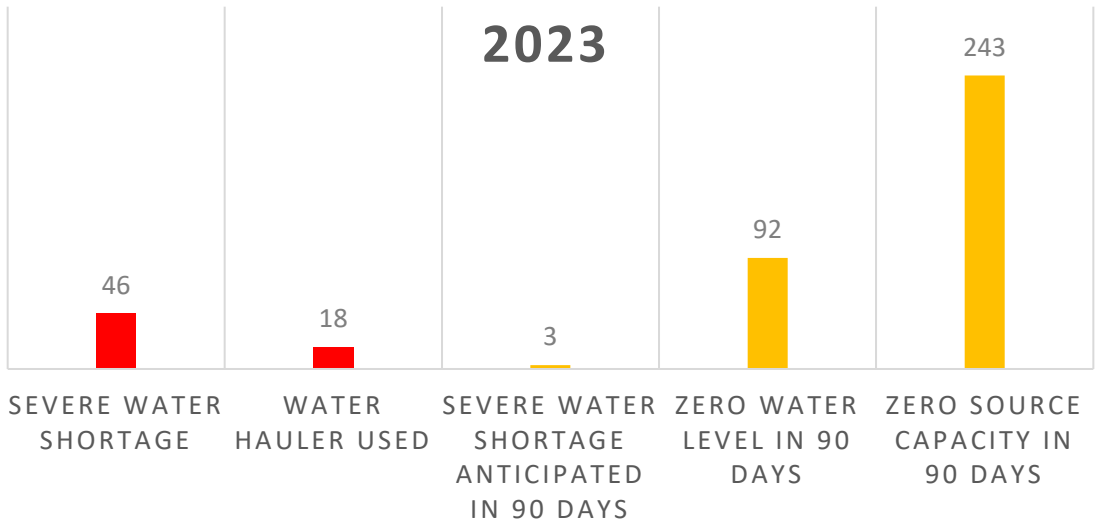

SOURCE CAPACITY EVALUATIONS  
COMPARING REPORTED SOURCE  
CAPACITY AND REPORTED PRODUCTION.

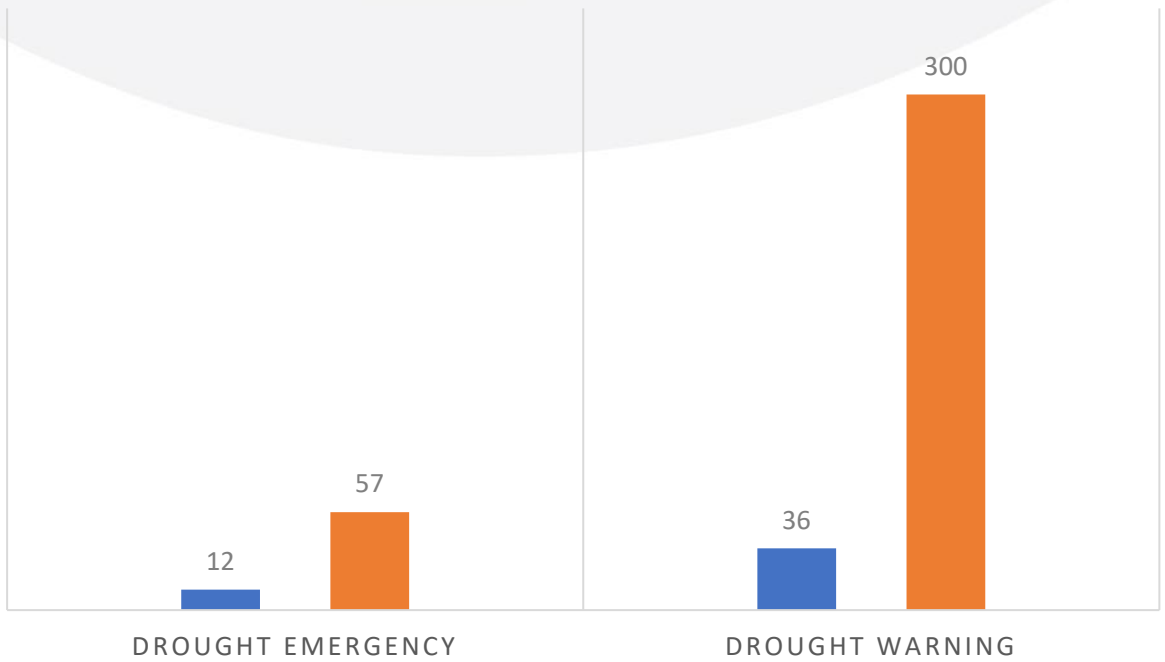

# Use of the Data

## POTENTIAL CHANGES TO DROUGHT TRIAGE

### FLAGGED DROUGHT SYSTEMS IN 2023

■ End of 2022 ■ 1st Quarter 2023

# Example - Russian River Watershed

# Example - Russian River Watershed

# **SUPERIOR** **REPORTING AWARD**

WATER GUARDIAN

Completed all three reporting periods on time

Submitted Water Levels and did not mark Not Available

195 Water Systems received this award

# Superior Reporting Highlights

Whale Gulch Elementary School – 60 population NTNC school water system

7 total schools received this award

Mojave Water District – Wholesaler water system serves 316,866 customers indirectly.

9 total wholesalers received this award

City of Modesto – Large Urban Utility serving 70,240 connections

Almost 50 urban water suppliers received this award

Jonata Homeowners Association – Small HOA serving 35 people

About 150 small water suppliers received this award

# HONORABLE MENTION AWARD

DROUGHT RESPONDER

Completed all three reports on  
time

144 Systems

# POLL #4: What is your biggest challenge with meeting reporting requirements?

- Awareness of requirements
- Accessing the portal
- Collecting all the required data
- Entering data into the portal
- Meeting deadlines
- Resource limitations (i.e. staff time, money, knowledge, etc.)

# Other Enhancements on the Horizon

Aggregated reporting for May 2023

Data export ability for water systems and regulatory staff to download their data in bulk from the application

Visualizations of data accessible to regulators and water systems

# POLL #5: What are your most anticipated expected features? (Check all that apply)

- Elimination of more duplicative reporting
- Reporting data export
- Visualization and flags for submitted data
- Improved dashboard to access reporting
- Screening criteria to increase or decrease frequency of reporting
- Contact management system

# EAR Reporting Transitions

Annual reporting of supply and demand and source inventory data anticipated to be replaced in the EAR for 2024.

Compiled from monthly reporting periods to reduce annual reporting burden

# Feedback Received

Not Available

Water Loss

Billing cycle mismatch

Batch Upload

Duplicative Reporting

# POLL #6 How much time does your water system need to provide not available and preliminary data

- Seven days after the reporting month
- The month after the reporting month
- A quarter after the reporting month
- A year after the reporting month
- Will not have the data in the foreseeable future

# POLL #7 Have you created an account in the SAFER Clearinghouse yet?

- Yes, I'm in!
  - Yes, but I am waiting for approval or are having difficulties accessing the portal.
  - Not yet, still working on it
  - Do not need an account
- 
- <https://drought.waterboards.ca.gov>

10 Minute Break

# SAFER Clearinghouse Portal - Drought Reporting LIVE DEMO

1

Registering  
and accessing  
account

2

Starting a  
new report

3

Entering data  
on each tab

4

Using batch  
templates

5

Attesting and  
submitting  
report

# POLL #8 How useful are the available guidance materials and resources?

- Very useful
- Somewhat useful
- Not very useful
- Haven't used them
- What guidance materials?

**List the guidance materials that would be most helpful:**

# Resources

- Website:  
[https://www.waterboards.ca.gov/drinking\\_water/certlic/drinkingwater/clearinghouse\\_drought\\_conservation\\_reporting.html](https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/clearinghouse_drought_conservation_reporting.html)
  - User Guide
  - Frequently Asked Questions
  - Quick Reference Guide to creating a new account
  - Brownbag training video
  - Reporting Deadlines
  - and much more...
- Link to survey will be emailed out
- Please contact us at [ddw-drought@waterboards.ca.gov](mailto:ddw-drought@waterboards.ca.gov)

# POLL #9: Which communication method(s) work best for sharing information regarding Drought and Conservation Reporting? (Check all that apply)

- Email
- Training webinars and brown bags
- Board meeting updates
- Website

# POLL #10: How satisfied are you with the level of technical support available?

- Very satisfied
- Somewhat satisfied
- Not very satisfied
- I have not requested any technical support

# POLL #11: How likely are you to attend future webinars on Drought and Conservation reporting?

- Very likely
- Somewhat likely
- Not likely
- Not attending, I got this

# POLL #12: How would you rate the ease of use of the SAFER Clearinghouse for reporting?

- Better than other state reporting systems
- On par with other state reporting systems
- One of the worst reporting systems I have used

Thank you for attending  
our workshop!

## WATER SHORTAGE

Reported By: Kristyn Abhold

	PREVIOUS REPORTING PERIOD	CURRENT REPORTING PERIOD 09/01/2022 – 09/30/2022	No Change <input type="checkbox"/>
<p>Experiencing a severe water shortage:*</p> <p>A water shortage can be described as an inability of a water system to meet with the demand of the system. This can be documented by a loss of pressure (less than 5 psi), inadequate supply to customers, or some other threat to health and safety such as the reliance on hauled, bottled, or contaminated water to meet system demand.</p>	<p><b>System can auto-fill previous report's data if "no change"</b></p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No</p>	<input type="checkbox"/>
<p>Estimated date of when a severe water shortage may begin: * <a href="#">?</a></p>		<p><input type="text" value=""/></p> <p><input checked="" type="checkbox"/> Severe water shortage not expected</p>	<input type="checkbox"/>
<p>Do you have a Water Shortage Contingency Plan (or Drought Planning Elements)?: * <a href="#">?</a></p>		<p><input checked="" type="radio"/> Yes <input type="radio"/> No</p>	<input type="checkbox"/>
<p>Website link to Water Shortage Contingency Plan: * <a href="#">?</a></p>		<p><input type="text" value=""/></p> <p><input checked="" type="checkbox"/> Water Shortage Contingency Plan Not Available Online</p>	<input type="checkbox"/>

# Greater Flexibility – Reporting, Reminders, Editing

- Systems will receive email notifications and reminders of Report due dates, past-due notifications, etc.
- Systems can report preliminary data but must provide final data by the end of the calendar year.
- Systems will be able to access submitted Reports and make edits to data.
