**NEW Well WATER QUALITY MONITORING SCHEDULE**  
Nontransient Noncommunity System, groundwater near development (NPSGD)  
**UPDATED - April 2018**

**Radiological Monitoring**

**Initial Monitoring Requirements**

<b>Radioactivity - Section 64442</b>	<b>MCL</b>	<b>Frequency</b>
Gross Alpha particle activity (excluding radon & uranium)	15 pCi/L	4 quarters initial monitoring * (9)
Total Radium (Radium-223, Radium-224 and Radium-226)	5 pCi/L	When (GA-Uranium) > 5 pCi/L (10)
Uranium	20 pCi/L	When GA > 5 pCi/L (10)
<b>Man Made Radioactivity - Section 64443</b>		
Tritium	20000 pCi/L	Not Required
Strontium	8 pCi/L	Not Required
Gross Beta	50 pCi/L	Not Required

\* If the results from the first 2 quarters of initial monitoring are below the detection limit for the purposes of reporting (DLR), the final 2 quarters of initial monitoring may be waived.

**9. Routine Monitoring**

a) Subsequent monitoring frequency for Gross Alpha is based on last sample collected.

<b>Gross Alpha</b>	<b>Monitoring Frequency</b>
Less than 3 pCi/L	1 sample every 9 years
$\geq 3$ and $\leq 7.5$ pCi/L	1 sample every 6 years
$> 7.5$ and $\leq 15$ pCi/L	1 sample every 3 years

**10. Triggered Monitoring**

A frequency is generally not assigned to total radium or uranium as the monitoring for these constituents is dependent on the gross alpha results.

- a) If the Gross Alpha particle activity is less than or equal to 5 pCi/L, analysis for Uranium is not required.
- b) If the Gross Alpha particle activity for any single sample is greater than 5 pCi/L, analysis for Uranium in that same sample is required. If any single sample for Uranium is greater than 20 pCi/L, monitor at least 4 quarters for Uranium.
- c) If the Gross Alpha particle activity is  $> 5$  pCi/L, analysis for uranium may be used to estimate the total radium activity. If GA - Uranium  $> 5$ , analyze for total radium from the same sample or contact your district office. If GA - Uranium  $< 0$ , report only the GA and Uranium results.

**Important** - The analysis for any or all of the constituents noted above should be from **the same sample**. On the chain-of-custody, uranium can be noted as: 'Hold Uranium (only analyze if GA  $> 5$ pCi/L)'.

**Contact your district office if the MCL is exceeded, or for clarification on monitoring frequencies.**
