

Summary of Changes to GIS Demand methodology Documents

- Item # 29 - ARCGIS Pro POD QAQC Project package
GIS preprocessing file was changed from a project template file to a project package file (.ppkx) and subfolders were renamed to reflect the new file type.
- Item # 42 - GIS Pre-Processing Procedures Part 1
Updated Section 8 of the document suggesting saving GIS project as a project package file.
- Item # 43 - GIS Pre-Processing Procedures Part 2
Updated section 7, instructions on how add a field domain to the QAQC table.
Updated Section 9, clarification on how to append the POD_ID field onto the final MAX MAF table.
- Note added to GIS Overview document and GIS Pre-Processing Procedures Part 1 warning of data discrepancies that may arise between the GIS pre-processing and subsequent analysis unless eWRIMS data used in both are obtained on the same day.
