

Introduction

Non-consumptive Diversion

The purpose of this survey is to request an exemption for non-consumptive use from curtailment under the Russian River Emergency Regulations. If you do not have a non consumptive use, please do not complete this survey.

At the end of this survey, you must certify that all the information entered into the form is true and correct to the best of your knowledge under penalty of perjury. Please keep this in mind while filling out the form.

To navigate this survey, use the "Next" and "Prev" buttons to move forward or backward. On the final page, instead of a "Next" button you will see a "Finish and Submit" button which will complete your survey. Your responses to each page will be saved when you continue to the next page.

If you encounter any issues, technical or otherwise, feel free to contact the State Water Resource Control Board at (phone no.) or (email address).

Description and Certification

Select which of the following applies: *

- I certify that the diversion is used solely for hydropower and that my water right includes hydropower as a purpose of use. The discharge is returned to the Russian River or its tributaries and water is not held in storage.
- I certify that the water right provides for a diversion dedicated to instream uses for the benefit of fish and wildlife pursuant to Water Code section 1707 (including those that divert water to a different location for subsequent release) and that the location of release is hydraulically connected to the Russian River or its tributaries.
- I certify that the diversion is a substitution of releases approved by the Deputy Director of the Division of Water Rights, the California Department of Fish and Wildlife, and the Executive Officer of the North Coast Regional Board, of either stored water or groundwater into the Russian River or tributary thereof for the benefit of fish and wildlife such that there is not a net decrease in stream flow as a result of the diversion at the next downstream USGS gage. The rate of releases must be measured daily using a device or measurement method approved by the Deputy Director and provided to the Deputy Director on a monthly basis. On the next page I will upload attachments as needed on the following page.
- Other (please describe the nature of the diversion and how it is non-consumptive below)

Describe the non-consumptive use and explains, with supporting evidence, how the diversion and use do not decrease downstream flows in the applicable watershed. You may submit supporting attachments on the following page.

You must complete this section regardless of if you selected other or a specific non-consumptive use

(5000 character max.)
