
State Water Resources Control Board

October 25, 2024

Subject: Order WR 2024-0006-DWR, Addendum 2: Temporary Suspension of All Curtailments in Shasta River Watershed through October 31, 2024

To: Shasta River Watershed Water Right Holders (sent to water right holders for which the Board has email addresses) and Interested Parties on Scott-Shasta Drought E-mail List

The State Water Resources Control Board (State Water Board or Board) is suspending all curtailments for water rights in the Shasta River watershed until the end of the month. This means that the water right diverters, which are noted in Attachment A to this addendum, may divert under their priority of right through October 31, 2024 unless otherwise amended or superseded prior to this date.

Background: On June 7, 2024, the State Water Board issued a curtailment order ([Order WR 2024-0006-DWR](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/docs/2024/shasta-order-WR-2024-0006-DWR.pdf)¹) to water right holders in the Shasta River watershed, including all post-Adjudication appropriative surface water rights and appropriative groundwater rights described in section 875.5, subdivision (b)(1)(A) of the [Emergency Regulation](#)², as well as more senior appropriative rights with priority dates of or junior to November 25, 1912, as described in section 875.5, subdivision (b)(1)(B). On June 21, 2024, the Board noticed the most junior water rights with a priority of or junior to January 1, 1958, that they must cease diversions immediately. On July 3, 2024 an Addendum was issued reinstating conditional curtailments for water rights with a priority date of or junior to January 1, 1958, in the Shasta River watershed.

Flows at the [Yreka United States Geological Survey \(USGS\) gage](#) have been generally meeting the minimum instream flow requirements established in the Emergency Regulation since September 10, 2024. The flow at the Yreka USGS gage as of 2:00 pm today is 126 cubic feet per second (cfs) and has been greater than the October minimum flow requirement of 105 cfs throughout October. Based on current flows and recent flow trends, the precipitation forecast through the end of October, and discussion with the Scott Valley and Shasta Valley Watermaster District (Watermaster) it is appropriate to temporarily suspend curtailments for all water rights in the Shasta River watershed through the end of October.

¹ URL: https://www.waterboards.ca.gov/drought/scott_shasta_rivers/docs/2024/shasta-order-WR-2024-0006-DWR.pdf

² URL: https://www.waterboards.ca.gov/drought/scott_shasta_rivers/docs/2024/scott-shasta-reg-2024.pdf

This Addendum amends [Order WR 2024-0006-DWR](#) for water users in the Shasta River watershed. The Addendum **temporarily suspends all curtailments of water rights in the Shasta River watershed and will expire at 11:59 pm on Thursday, October 31, 2024**, unless otherwise extended or curtailments are reimposed sooner. The State Water Board will be monitoring weather forecasts and stream gages to determine if suspensions should be extended, or if curtailments are needed. Water diverters in Attachment A shall monitor flows at the [Yreka USGS gage](#) and their email for correspondence from the State Water Board.

Livestock Diversions

The Emergency Regulation includes provisions related to inefficient surface water diversions for livestock watering. The following provisions apply to everyone who diverts surface water for livestock from September 1, 2024, through January 31, 2025 (expiration of the current Regulation). **The inefficient livestock watering requirement applies to all surface water diversions, no matter what priority. The following criteria needs to be met in the Shasta River watershed before diverting surface water for livestock:**

1. The diverter shall notify the State Water Board by email to: ScottShastaDrought@waterboards.ca.gov with: their Name, Water Right Number and point of diversion, anticipated diversion amount(s), and their plans to track compliance and maintain records.
2. There are no active curtailments in the respective watershed. With this suspension, there are no active curtailments in the Shasta River watershed through October 31, 2024, unless this addendum is amended or superseded.
3. The California Department of Fish and Wildlife (CDFW) has made determinations that flows have been sufficient to stimulate salmon migration.
 - a. After September 1st for fall-run Chinook salmon³; and/or
 - b. After November 1st for coho salmon.
4. For diversions on tributaries below Dwinnell Dam, the relevant tributary is and remains connected to the mainstem.
5. Except for diversions upstream of Dwinnell Dam, diversions are operated to **bypass 90 percent of flow** at the point of diversion, except that when flows in the Shasta River are greater than 220 cfs at the Yreka USGS gage the diversions may operate to bypass 80 percent of flow.
6. The diversions are limited further if necessary to avoid disturbing redds.

³ As discussed later in this addendum, CDFW notified the Board that there had been sufficient flow to stimulate fall-run Chinook salmon migration in the Shasta River watershed on October 24, 2024. Note a similar determination for coho salmon has not been made and livestock diversions under this provision of the Emergency Regulation must cease by November 1, 2024 unless all conditions in Emergency Regulation section 875.7(b) are met.

On October 24, 2024, CDFW notified the State Water Board that it had made the determination that there has been sufficient flow to stimulate fall-run Chinook salmon migration into the Shasta River. With the temporary suspension of curtailments in the watershed, inefficient surface diversions for livestock are permissible when the remaining criteria are met. The Addendum and suspension of curtailments expires at 11:59 pm October 31, 2024. Inefficient livestock diversions must cease when the curtailment suspension expires or curtailments are otherwise reinstated in the Shasta River watershed.

If you have questions regarding this email, please contact staff by email to: ScottShastaDrought@waterboards.ca.gov or leave a message at our dedicated Scott River and Shasta River Emergency Regulation phone line at: (916) 327-3113.

Sincerely,

Erik Ekdahl
Deputy Director
Division of Water Rights

¹ You exercise an appropriative groundwater right when you: (1) do not own (or rent or lease) land overlying the basin that you use the water on; (2) own overlying land but use the water on non-overlying land; or (3) sell or distribute the water to someone else. The priority date for an appropriative groundwater right is the date when the groundwater well was constructed and water was first used for a non-overlying use. You may exercise an overlying groundwater right, which is not curtailed by this order.
