

Dear Jeanine Townsend

Clerk to the State Water Board

I am a resident of Lake Tahoe who enjoys the beautiful surroundings. I am aware of the invasive aquatic weed problem that is continuing to worsen every year and want to support the limited use of herbicides to control these invasive weeds. I am concerned that if we don't do something soon the problem will get out of control. I appreciate the research that the Lahontan Staff has completed and feel it is critical to receive the support of the State Water Board in the use of aquatic herbicides.
