Dear Sirs;

As residents of Lake Tahoe Keys we have seen the invasive weed problem grow. We are asking that you permit the Tahoe Keys association to use every reasonable and proven tool available to control the spread and work towards eradication of this invasive species of weed.

It is vital to attack this problem now. The problem will only get worse with time. We thank the State Water Board for recognizing the need to act and allow our Association to use every reasonable tool to control and eradicate this growing concern.

Thank you,

A handwritten signature in black ink, appearing to read "Martha Oghess".
