Attention: Ms. Lisa Scoralle

Subject: **Response to Comments for the Facility Waste Generation and Discharge Systems Report**
Crystal Geyser Roxane – Spring Water Bottling Facility
Response to Comments
1210 South US Highway 395
Olancha, California

Dear Ms. Scorale:

Geosyntec Consultants, Inc., (Geosyntec) on behalf of Crystal Geyser Roxane, LLC (CGR), hereby submits this Response to Comments for the CGR Spring Water Bottling Facility (Site) located at 1210 South U.S. Highway 395, near Olancha, California. The Lahonton Regional Water Quality Control Board (Water Board) provided comments regarding the *Facility Waste Generation and Discharge Systems Report*, (Facility Report) dated October 21, 2014, in the letter dated February 5, 2015. The following provides responses to the comments provided in the February 5, 2015 letter.

Comments/Additional Requirements

Comment 1. The Facility Report refers to "pH neutralization" processes that take place at numerous locations throughout the Olancha facilities. Please provide an appropriately scaled site plan that clearly depicts all locations where pH neutralization processes take place, including "in-line" neutralization locations. Please be sure that all elements shown on the plans are appropriately labeled and that all text is clearly legible at the scale provided, as some of the text on the Layout of Wastewater Discharge Systems plans provided was too small to be readable. Provide a table summarizing the chemicals/acids/bases/solutions that are used for neutralization at each location, along with the concentrations and quantities of each.

Response – Comment 1:

Scaled site plans of the wastewater discharge system plans are provided as **Sheets 1 through 5**, included with this letter. Please refer to **Sheets 3, 4, and 5** for the layout of the waste discharge

lines and neutralization tanks. A summary table of chemicals used for neutralization is provided in attached **Table 1**.

Comment 2. "Neutralization" is said to have been achieved when a waste solution reaches a pH value between 6 and 9. The "neutralized" wastes are then discharged to one of the three wastewater ponds at the site. In some cases, the wastes are neutralized "inline" during discharge. For your information, the Water Board's Water Quality Control Plan for the Lahontan Region (Basin Plan) establishes water quality objectives (standards) for numerous water quality parameters, including pH. The Basin Plan specifies that waste discharges cannot cause changes in normal ambient pH levels greater than 0.5 units for surface waters with a designated beneficial use of COLD. The water quality objective applies to the wetlands adjacent to the Fire Pond, and therefore, the Fire Pond discharge to those wetlands. The water quality objectives specified by the Basin Plan can be found online at http://www. waterboards,ca.govllahontan/water issues/programs/basin plan/docs/ch3 wgobjectives.Q.,dj.

Response – Comment 2:

Comment noted. Waste water discharges will be monitored to ensure that they comply with the Basin Plan. As required by the Water Board, CGR has been ordered to complete a Report of Waste Discharge (ROWD) application which will describe the appropriate waste water and receiving water monitoring in order to comply with the Basin Plan. As indicated in prior CGR correspondence, it should be noted that CGR does not believe that the location where discharge was occurring constituted a "wetland" as defined by the U.S. Army Corp of Engineers or U.S. Environmental Protection Agency. Nonetheless, the discharge location of the Fire Pond has been re-routed to a location south of the Fire Pond as shown on **Sheet 5** attached. The current Fire Pond discharge location is contained on CGR property and does not contain any wetlands or protected characteristics.

Comment 3. The Layout of Wastewater Discharge Systems plans show numerous floor "trench" drains throughout the facilities. Please provide as-built plans, including cross sections, showing the typical design and construction (including materials) of the floors, trench drains and underground plumbing systems, including plumbing/drainage system connections and other features. Be sure to specify the types of connections (e.g., flush-threaded piping, slip-collar joints, primer/glue) and any leak prevention/detection equipment, if any, (e.g., double-walled piping., etc.).

Response – Comment 3:

Sheets 3 through 5 provided with this letter display the layout, materials, and connections for the underground plumbing systems. The attached **Figure 1** provides a photo of a typical floor trench drain used at the Site. The trench drains are installed as PVC piping contained within the concrete slab foundation in the footprint of the factory building. The below grade conveyance piping sizes and materials outside of the factory footprint are provided in **Sheets 3 through 5**.

Comment 4. The Facility Report describes the valve distribution box (for directing wastewater flows to either the East Pond or the Arsenic Pond) as "fully-sealed". Please describe the type and method of seal provided and the manner in which leakage from the distribution box can/would be detected.

Response – Comment 4:

Sheet 6 provided with this letter shows the details of the valve distribution box including construction notes and seals/connections to distribution piping connected to and leaving from the box. According to CGR staff, the distribution box is constructed of concrete and sealed with a steel cover surrounding the box, and the box is visually inspected by CGR staff for leaks upon each filter regeneration process. CGR staff have indicated that there is no visual evidence of historical leakage from the valve distribution box. A photograph of the exterior/sidewall of the valve distribution box is shown on **Figure 2**.

Comment 5. Provide an appropriately scaled map showing the locations of the 12 industrial cooling towers at the site and identify the specific discharge location(s) for each. Clearly depict any and all location(s) where the cooling tower wastewater discharges directly to the ground, whether such discharges presently occur or have historically occurred in the past. For each location of direct discharge to ground, provide associated dates/time frames of discharges at each location.

Response – Comment 5:

The locations of the cooling towers at the Site and their respective discharge locations are shown and labeled on **Sheets 3 through 5**. All cooling towers are installed within concrete secondary containment basins. The secondary containment basins have floor drains that collect the cooling tower discharge water and transmit the water to the East Pond. Contrary to previous assertions otherwise by CGR staff, we have further investigated the historical discharge practices of these cooling towers and water generated from them do not discharge to the ground surface at any location.

Comment 6. Collect a representative, discrete sample of industrial cooling tower wastewater discharge and submit the sample for laboratory analysis of the list of constituents identified in Investigative Order No. R6V-2014-0063. Specifically, the cooling tower unit selected for sampling and analysis (and direct-push/hydropunch boring per Condition 7, below) should be one of the units that discharges to the ground. If no such units currently discharge to ground, this sample can be collected and results reported at a later date when such discharge is active and available for sampling.

Response – Comment 6:

Waste water discharge from the cooling towers is collected in drains from secondary containment pads located beneath the cooling towers. Water that discharges from the cooling towers is transmitted via below grade piping as shown on Sheets 3 – 5 to the East Pond. A

representative sample of the cooling tower wastewater discharge was collected on March 19, 2015, and analyzed for the list of constituents identified in the Investigative Order No. R6V-2014-0063. The results of detected compounds from this sample are provided in the attached **Table 2**.

Comment 7. Include one additional direct-push/hydropunch boring at the location of waste discharge to ground for the cooling tower unit specified per Condition 6, above. Conduct the same sampling and analyses for the additional boring as specified in the Site Investigation Work Plan for the other direct-push/hydropunch borings identified for the Phase 1 investigation.

Response – Comment 7:

An additional direct-push/hydropunch boring location has been included and the same sampling and analyses as specified in the Supplemental Site Investigation Work Plan has been performed. Please reference the *Phase 1 Site Groundwater Investigation Report* for the Olancha Spring Water Bottling Facility for the CT-1 boring samples (sample number CT-1-20150108) collected in January 2015.

Comment 8. The Facility Report also states that the ion exchange resin for the water "softeners" of each cooling tower unit is regenerated regularly and automatically (page 6) with a sea salt solution to remove retained calcium. Please describe and illustrate the location(s) where such regeneration wastewater is discharged.

Response – Comment 8:

The ion exchange resin for the water softeners is regenerated in the “water softener rooms” in both the northern and southern building of the Site. The water softener rooms for the northern and southern Site factory buildings are shown on Sheets 4 and 5, respectively. The waste water generated during water softener regeneration is transmitted to the East Pond via trench drains and underground pipe.

Comment 9. The site plans/figures in the Facility Report identify a number of monitoring wells at the site. Please provide, in the Phase 1 investigation report, available well construction/design details for these existing monitoring wells (well depths, casing types, well elevations, sanitary seals (types/depths/thicknesses), well screen, filter pack media, screened intervals, etc.), and groundwater monitoring data (depths to water, groundwater flow direction, gradient, etc.). Additionally, please include well stabilization parameter measurements, well sampling forms, and any laboratory chemical analytical results of samples collected from these wells for water quality analyses, if available. Depending on the data received, and the results of the Phase 1 investigation, staff may require these wells to be monitored, purged and sampled for laboratory analysis at a later date.

Response – Comment 9:

A summary of pertinent monitoring well data at the Site is included as **Table 3**. Available water quality data within the last 2 years is provided as Appendix A.

Comment 10. Please send complete copies of all CG Roxane's submittals to date (Facility Waste Generation and Discharge Systems Report, Site Investigation Work Plan and its supplement), as well as all future correspondence, to each of the following for their review and files: California Department of Toxic Substances Control, Attn: Dave Stuck; lnyo County Environmental Health Department, Attn: Marvin Moskowitz; and California Department of Fish and Wildlife, Attn: Heidi Calvert.

Response – Comment 10:

Copies of reports, work plans, and related documentation will be sent to the listed interested parties. If you have any questions related to this letter, report, or other issues, please do not hesitate to call Ryan Smith at 805 897 3800.

Sincerely,
Geosyntec Consultants

Mark Grivetti, P.G., C.Hg.
Principal Hydrogeologist

Ryan Smith
Project Geologist, P.G., C.Hg.

# of Samples	Tests	Bottles - Qty for each sample, type & preservative if a	UN DOT #
7	@ANIONS28, @ANIONS48, Alkalinity in CaCO3 units, Fluoride, PH (H3=past HT not compliant), Specific Conductance, Arsenic dissolved ICAP/MS, Turbidity	1 125ml poly no preservative	
1	@ICP, @ICPMS, Mercury	1 250ml acid rinsed 1ml HNO3 (18%)	UN2031
6	@ICP, @ICPMS, Mercury	1 500ml acid poly 2ml HNO3 (18%)	UN2031
7	Bromide by 300.1	1 60mL poly 0.60mL 5% EDA sol'n	
7	Surfactants	1 500ml poly no preservative	
7	Total Dissolved Solid (TDS)	1 500ml poly TDS - no preservative	

Comments

SHIPPING: Please deliver by Friday 02/15 - 7 separate kits.

LOGIN: Please make note when logging in that As and Br are for the low-level versions (0.2 & 2.0 ug/L respectively). GMMST22 includes pH, sodium, and Turbidity is added.

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.
Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com.FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery,misdelivery,or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim.Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental,consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss.Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

DATE OF REPORT: Quarter 1, 2012
REPORT #: 219-10958, 219-11143
LABORATORY ID#: 388631, WE03904

NOTE:
"*" indicates that maximum levels have been exceeded, or in the case of pH, is either too high or too low
"ND" indicates that none of this analyte has been detected at or above the specified detection level
"MCL" indicates maximum contaminant level as established by EPA and/or FDA or state
"RL" indicates laboratory reporting limit for method
Units results are reported in mg/L unless other wise noted

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.
Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com.FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery,misdelivery,or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim.Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental,consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss.Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

LCS1	Aluminum Total ICAP/MS		200	199	ug/L	100	(85-115)		

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

CLIENT: Crystal Geyser Roxane
1210 S. State Hwy #395, PO Box Drawer A
Olancha, CA 93549

DATE OF REPORT: Quarter 1, 2012
REPORT #: 219-10963, 219-11148
LABORATORY ID#: 389330, WE03907

NOTE:
"*" indicates that maximum levels have been exceeded, or in the case of pH, is either too high or too low
"ND" indicates that none of this analyte has been detected at or above the specified detection level
"MCL" indicates maximum contaminant level as established by EPA and/or FDA or state
"RL" indicates laboratory reporting limit for method
Units results are reported in mg/L unless other wise noted

Report: 428305
Project: CGR-OLANCHA
Group: General Mineral & Bromide

Laboratory certifies that the test results meet all **TNI NELAP** requirements unless noted in the Comments section or the Case Narrative. Following the cover page are Hits Reports, Comments, QC Summary, QC Report and Regulatory Forms. This report shall not be reproduced except in full, without the written approval of the laboratory.

STATE CERTIFICATION LIST

State	Certification Number	State	Certification Number
Alabama	41060	**Mississippi**	Certified
Alaska	CA00006	**Montana**	Cert 0035
Arizona	AZ0778	**Nevada**	CA00006-2012-1
Arkansas	Certified	**New Hampshire**	2959-11
California – NELAP	01114CA	**New Jersey**	CA 008
California – ELAP	1422	**New Mexico**	Certified
Colorado	Certified	**New York**	11320
Connecticut	PH-0107	**North Carolina**	06701
Delaware	CA 006	**North Dakota**	R-009
Florida	E871024	**Oregon**	CA 200003-010

The following samples were received from you on **March 14, 2013**. They have been scheduled for the tests listed below each sample. If this information is incorrect, please contact your service representative. Thank you for using Eurofins Eaton Analytical.

Sample #	Sample ID	Sample Date
201303150105	OW7D	03/13/2013 1115

@ANIONS28	@ANIONS48	@ICP
@ICPMS	Agressiveness Index-Calculated	Alkalinity in CaCO3 units
Anion Sum - Calculated	Bicarb.Alkalinity as HCO3,calc	Carbon Dioxide,Free(25C)-Calc.
Carbonate as CO3, Calculated	Cation Sum - Calculated	Cation/Anion Difference
Fluoride	Hydroxide as OH, Calculated	Langelier Index - 25 degree
Langlier Index at 60 degrees C	Mercury	PH (H3=past HT not compliant)
pH of CaCO3 saturation(25C)	pH of CaCO3 saturation(60C)	Specific Conductance
Surfactants	Total Dissolved Solid (TDS)	Total Hardness as CaCO3 by ICP
Arsenic dissolved ICAP/MS	Bromide by 300.1	Freight - Outbound
Turbidity		

Test Description

@ANIONS28 -- Chloride, Sulfate by EPA 300.0

@ANIONS48 -- Nitrate, Nitrite by EPA 300.0

@ICP -- ICP Metals

@ICPMS -- ICPMS Metals

# of Samples	Tests	Bottles - Qty for each sample, type & preservative if a	UN DOT #
7	@ANIONS28, @ANIONS48, Alkalinity in CaCO3 units, Fluoride, PH (H3=past HT not compliant), Specific Conductance, Arsenic dissolved ICAP/MS, Turbidity	1 125ml poly no preservative	
1	@ICP, @ICPMS, Mercury	1 250ml acid rinsed 1ml HNO3 (18%)	UN2031
6	@ICP, @ICPMS, Mercury	1 500ml acid poly 2ml HNO3 (18%)	UN2031
7	Bromide by 300.1	1 60mL poly 0.60mL 5% EDA sol'n	
7	Surfactants	1 500ml poly no preservative	
7	Total Dissolved Solid (TDS)	1 500ml poly TDS - no preservative	

Comments

SHIPPING: Please deliver by Friday 02/15 - 7 separate kits.

LOGIN: Please make note when logging in that As and Br are for the low-level versions (0.2 & 2.0 ug/L respectively). GMMST22 includes pH, sodium, and Turbidity is added.

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.
Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com.FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery,misdelivery,or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim.Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental,consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss.Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Dear George Castaneda,

Thank you for selecting BSK Analytical Laboratories for your analytical testing needs. We have prepared this report in response to your request for analytical services. Enclosed are the results of analyses for samples received by the laboratory on 01/18/2011 10:00.

If additional clarification of any information is required, please contact your Client Services Representative, Renea Rangell at (800) 877-8310 or (559) 497-2888.

Case Narrative

Work Order Information

Client Name:	Crystal Geyser	**Submitted by:**	Manuel Luna
Client Code:	Cryst6296	**Shipped by:**	Fed Ex
Work Order:	A1A1063	**COC Number:**	
Project:	General	**TAT:**	10
		PO #:	

Sample Receipt Conditions

Cooler: **Default Cooler** **Temp. °C:** 3

Containers Intact
COC/Labels Agree
Received On Blue Ice
Packing Material - Other
Sample(s) were received in temperature range.
Initial receipt at BSK-FAL

Certificate of Analysis

01/28/2011

Notes:

- The Chain of Custody document and Sample Integrity Sheet are part of the analytical report.
- Any remaining sample(s) for testing will be disposed of one month from the final report date unless other arrangements are made in advance.
- Sample(s) received, prepared, and analyzed within the method specified criteria unless otherwise noted within this report.
- The results relate only to the samples analyzed in accordance with test(s) requested by the client on the Chain of Custody document. Any analytical quality control exceptions to method criteria that are to be considered when evaluating these results have been flagged and are defined in the data qualifiers section.
- All results are expressed on wet weight basis unless otherwise specified.
- All positive results for EPA Methods 504.1, 502.2, and 524.2 require the analysis of a Field Reagent Blank (FRB) to confirm that the results are not a contamination error from field sampling steps. If Field Reagent Blanks were not submitted with the samples, this method requirement has not been performed.
- Results contained in this analytical report must be reproduced in its entirety.
- Samples collected by BSK Analytical Laboratories were collected in accordance with the BSK Sampling and Collection Standard Operating Procedures.
- BSK Analytical Laboratories certifies that the test results contained in this report meet all requirements of the NELAC Standards for applicable certified drinking water chemistry analyses unless qualified or noted in the Case Narrative.
- Analytical data contained in this report may be used for regulatory purposes to meet the requirements of the Federal or State drinking water, wastewater, and hazardous waste programs.
- J-value is equivalent to DNQ (Detected, not quantified) which is a trace value. A trace value is an analyte detected between the MDL and the laboratory reporting limit. This result is of an unknown data quality and is only qualitative (estimated). Baseline noise, calibration curve extrapolation below the lowest calibrator, method blank detections, and integration artifacts can all produce apparent DNQ values, which contribute to the un-reliability of these values.
- (1) - Residual chlorine and pH analysis have a 15 minute holding time for both drinking and waste water samples as defined by the EPA and 40 CFR 136. Waste water and ground water (monitoring well) samples must be field filtered to meet the 15 minute holding time for dissolved metals. Samples submitted to the laboratory have been analyzed outside of this holding time requirement.
- * - This is not a NELAP accredited analyte.
- Summations of analytes (i.e. Total Trihalomethanes) may appear to add individual amounts incorrectly, due to rounding of analyte values occurring before or after the total value is calculated, as well as rounding of the total value.
- (2) The digestion used to produce this result deviated from EPA 200.2 by excluding hydrochloric acid in order to produce acceptable recoveries for affected metals.
- (2C) Result reported from secondary analytical column.
- RL Multiplier is the factor used to adjust the reporting limit (RL) due to variations in sample preparation procedures and dilutions required for matrix interferences.

Dear George Castaneda,

Thank you for selecting BSK Analytical Laboratories for your analytical testing needs. We have prepared this report in response to your request for analytical services. Enclosed are the results of analyses for samples received by the laboratory on 01/13/2011 10:00.

If additional clarification of any information is required, please contact your Client Services Representative, Renea Rangell at (800) 877-8310 or (559) 497-2888.

BSK Analytical Laboratories
Engineering & Laboratories

Certificate of Analysis

01/25/2011

Notes:

- The Chain of Custody document and Sample Integrity Sheet are part of the analytical report.
- Any remaining sample(s) for testing will be disposed of one month from the final report date unless other arrangements are made in advance.
- Sample(s) received, prepared, and analyzed within the method specified criteria unless otherwise noted within this report.
- The results relate only to the samples analyzed in accordance with test(s) requested by the client on the Chain of Custody document. Any analytical quality control exceptions to method criteria that are to be considered when evaluating these results have been flagged and are defined in the data qualifiers section.
- All results are expressed on wet weight basis unless otherwise specified.
- All positive results for EPA Methods 504.1, 502.2, and 524.2 require the analysis of a Field Reagent Blank (FRB) to confirm that the results are not a contamination error from field sampling steps. If Field Reagent Blanks were not submitted with the samples, this method requirement has not been performed.
- Results contained in this analytical report must be reproduced in its entirety.
- Samples collected by BSK Analytical Laboratories were collected in accordance with the BSK Sampling and Collection Standard Operating Procedures.
- BSK Analytical Laboratories certifies that the test results contained in this report meet all requirements of the NELAC Standards for applicable certified drinking water chemistry analyses unless qualified or noted in the Case Narrative.
- Analytical data contained in this report may be used for regulatory purposes to meet the requirements of the Federal or State drinking water, wastewater, and hazardous waste programs.
- J-value is equivalent to DNQ (Detected, not quantified) which is a trace value. A trace value is an analyte detected between the MDL and the laboratory reporting limit. This result is of an unknown data quality and is only qualitative (estimated). Baseline noise, calibration curve extrapolation below the lowest calibrator, method blank detections, and integration artifacts can all produce apparent DNQ values, which contribute to the un-reliability of these values.
- (1) - Residual chlorine and pH analysis have a 15 minute holding time for both drinking and waste water samples as defined by the EPA and 40 CFR 136. Waste water and ground water (monitoring well) samples must be field filtered to meet the 15 minute holding time for dissolved metals. Samples submitted to the laboratory have been analyzed outside of this holding time requirement.
- * - This is not a NELAP accredited analyte.
- Summations of analytes (i.e. Total Trihalomethanes) may appear to add individual amounts incorrectly, due to rounding of analyte values occurring before or after the total value is calculated, as well as rounding of the total value.
- (2) The digestion used to produce this result deviated from EPA 200.2 by excluding hydrochloric acid in order to produce acceptable recoveries for affected metals.
- (2C) Result reported from secondary analytical column.
- RL Multiplier is the factor used to adjust the reporting limit (RL) due to variations in sample preparation procedures and dilutions required for matrix interferences.

Notice: Payment for services rendered as noted herein are due in full within 30 days from when invoiced. If not so paid, account balances are deemed delinquent. Delinquent balances are subject to monthly service/re-billing charges and interest calculated at 1 1/2 % per month, 18% per annum. BSK & Associates shall be entitled to recover on delinquent accounts, costs of collections, including attorneys' fees incurred prior to or in litigation whether concluded by judgement, settlement, compromise or otherwise. The person signing for the client/Company expressley acknowledges that they are either the Client or authorized agent to the Client, and the Client agrees to be responsible for payment for analytical services on this Chain of Custody. Any modification of the analysis requested, either type or quantities, will be noted and agreed upon this Chain of Custody. The turn around time for any samples received after 3:00 pm will begin the next business day.

Dear George Castaneda,

Thank you for selecting BSK Analytical Laboratories for your analytical testing needs. We have prepared this report in response to your request for analytical services. Enclosed are the results of analyses for samples received by the laboratory on 01/14/2011 09:30.

If additional clarification of any information is required, please contact your Client Services Representative, Renea Rangell at (800) 877-8310 or (559) 497-2888.

BSK Analytical Laboratories
Engineering Laboratories

Certificate of Analysis

01/27/2011

Notes:

- The Chain of Custody document and Sample Integrity Sheet are part of the analytical report.
- Any remaining sample(s) for testing will be disposed of one month from the final report date unless other arrangements are made in advance.
- Sample(s) received, prepared, and analyzed within the method specified criteria unless otherwise noted within this report.
- The results relate only to the samples analyzed in accordance with test(s) requested by the client on the Chain of Custody document. Any analytical quality control exceptions to method criteria that are to be considered when evaluating these results have been flagged and are defined in the data qualifiers section.
- All results are expressed on wet weight basis unless otherwise specified.
- All positive results for EPA Methods 504.1, 502.2, and 524.2 require the analysis of a Field Reagent Blank (FRB) to confirm that the results are not a contamination error from field sampling steps. If Field Reagent Blanks were not submitted with the samples, this method requirement has not been performed.
- Results contained in this analytical report must be reproduced in its entirety.
- Samples collected by BSK Analytical Laboratories were collected in accordance with the BSK Sampling and Collection Standard Operating Procedures.
- BSK Analytical Laboratories certifies that the test results contained in this report meet all requirements of the NELAC Standards for applicable certified drinking water chemistry analyses unless qualified or noted in the Case Narrative.
- Analytical data contained in this report may be used for regulatory purposes to meet the requirements of the Federal or State drinking water, wastewater, and hazardous waste programs.
- J-value is equivalent to DNQ (Detected, not quantified) which is a trace value. A trace value is an analyte detected between the MDL and the laboratory reporting limit. This result is of an unknown data quality and is only qualitative (estimated). Baseline noise, calibration curve extrapolation below the lowest calibrator, method blank detections, and integration artifacts can all produce apparent DNQ values, which contribute to the un-reliability of these values.
- (1) - Residual chlorine and pH analysis have a 15 minute holding time for both drinking and waste water samples as defined by the EPA and 40 CFR 136. Waste water and ground water (monitoring well) samples must be field filtered to meet the 15 minute holding time for dissolved metals. Samples submitted to the laboratory have been analyzed outside of this holding time requirement.
- * - This is not a NELAP accredited analyte.
- Summations of analytes (i.e. Total Trihalomethanes) may appear to add individual amounts incorrectly, due to rounding of analyte values occurring before or after the total value is calculated, as well as rounding of the total value.
- (2) The digestion used to produce this result deviated from EPA 200.2 by excluding hydrochloric acid in order to produce acceptable recoveries for affected metals.
- (2C) Result reported from secondary analytical column.
- RL Multiplier is the factor used to adjust the reporting limit (RL) due to variations in sample preparation procedures and dilutions required for matrix interferences.

Certifications:

State of California - CDPH - ELAP	1180
State of California - CDPH - NELAP	04227CA
State of New Mexico - NMED-DWB	
State of Nevada - NDEP	CA000792009A

Definitions and Flags for Data Qualifiers

mg/L:	Milligrams/Liter (ppm)	M:	Method Detection Limit	MDA:	Min. Detected Activity
mg/Kg:	Milligrams/Kilogram (ppm)	RL:	Reporting Limit	MPN:	Most Probable Number
µg/L:	Micrograms/Liter (ppb)		:DL x Dilution	CFU:	Colony Forming Unit
µg/Kg:	Micrograms/Kilogram (ppb)	ND:	None Detected at RL	Absent:	Less than 1 CFU/100mLs
%:	Percent Recovered (surrogates)	pCi/L:	Picocuries per Liter	Present:	1 or more CFU/100mLs
		NR:	Non-Reportable	RL Mult:	RL Multiplier

MS02 Matrix spike recovery was low; the associated blank spike recovery was acceptable.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

The following samples were received from you on **March 13, 2013**. They have been scheduled for the tests listed below each sample. If this information is incorrect, please contact your service representative. Thank you for using Eurofins Eaton Analytical.

Sample #	Sample ID	Sample Date
201303140168	OW8D	03/12/2013 1330

@ANIONS28	@ANIONS48	@ICP
@ICPMS	Agressiveness Index-Calculated	Alkalinity in CaCO3 units
Anion Sum - Calculated	Bicarb.Alkalinity as HCO3,calc	Carbon Dioxide,Free(25C)-Calc.
Carbonate as CO3, Calculated	Cation Sum - Calculated	Cation/Anion Difference
Fluoride	Hydroxide as OH, Calculated	Langelier Index - 25 degree
Langlier Index at 60 degrees C	Mercury	PH (H3=past HT not compliant)
pH of CaCO3 saturation(25C)	pH of CaCO3 saturation(60C)	Specific Conductance
Surfactants	Total Dissolved Solid (TDS)	Total Hardness as CaCO3 by ICP
Arsenic dissolved ICAP/MS	Bromide by 300.1	Freight - Outbound
Turbidity		

Test Description

@ANIONS28 -- Chloride, Sulfate by EPA 300.0

@ANIONS48 -- Nitrate, Nitrite by EPA 300.0

@ICP -- ICP Metals

@ICPMS -- ICPMS Metals

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.
Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com.FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery,misdelivery,or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim.Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental,consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss.Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

LCS2	Sulfate		50	51.6	mg/L	103	(90-110)	20	0.39

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

The following samples were received from you on **March 13, 2013**. They have been scheduled for the tests listed below each sample. If this information is incorrect, please contact your service representative. Thank you for using Eurofins Eaton Analytical.

Sample #	Sample ID	Sample Date
201303140169	OW8U	03/12/2013 1130

@ANIONS28	@ANIONS48	@ICP
@ICPMS	Agressiveness Index-Calculated	Alkalinity in CaCO3 units
Anion Sum - Calculated	Bicarb.Alkalinity as HCO3,calc	Carbon Dioxide,Free(25C)-Calc.
Carbonate as CO3, Calculated	Cation Sum - Calculated	Cation/Anion Difference
Fluoride	Hydroxide as OH, Calculated	Langelier Index - 25 degree
Langlier Index at 60 degrees C	Mercury	PH (H3=past HT not compliant)
pH of CaCO3 saturation(25C)	pH of CaCO3 saturation(60C)	Specific Conductance
Surfactants	Total Dissolved Solid (TDS)	Total Hardness as CaCO3 by ICP
Arsenic dissolved ICAP/MS	Bromide by 300.1	Freight - Outbound
Turbidity		

Test Description

@ANIONS28 -- Chloride, Sulfate by EPA 300.0

@ANIONS48 -- Nitrate, Nitrite by EPA 300.0

@ICP -- ICP Metals

@ICPMS -- ICPMS Metals

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.

Spike recovery is already corrected for native results.
Spikes which exceed Limits and Method Blanks with positive results are highlighted by Underlining.
Criteria for MS and Dup are advisory only, batch control is based on LCS. Criteria for duplicates are advisory only, unless otherwise specified in the method.
RPD not calculated for LCS2 when different a concentration than LCS1 is used.
RPD not calculated for Duplicates when the result is not five times the MRL (Minimum Reporting Level).
(S) - Indicates surrogate compound.
(I) - Indicates internal standard compound.
