Dear Doug:

Please include this as a response to the latest proposed Waiver changes.

I want to thank you for making the changes that will help the Lassen County Fire Safe Council move forward with assisting homeowners to protect their property.

I hope that you will offer some latitude in the burning of hand-piles within the Waterbody Buffer Zone, as that would greatly decrease hand-crew costs and allow for treatment within some of the thickest areas in the WUI.

Again, I appreciate your efforts to make this workable.
