DISCHARGER	FACILITY LOCATION	RECEIVING WATER
City of Simi Valley (Simi Valley Water Quality Control Plant)	600 West Los Angeles Ave, Simi Valley, CA 93065	Arroyo Simi

The City of Simi Valley (City) owns and operates the Simi Valley Water Quality Control Plant (WQCP), a Publicly Owned Treatment Works (POTW) located at 600 West Los Angeles Ave, Simi Valley, California. The Simi Valley WQCP is a tertiary wastewater treatment plant with a design capacity of 12.5 million gallons per day (MGD) and discharges an average monthly flow of 8 MGD from Discharge Pont 001 (Latitude 34.28200°, Longitude -118.81290°) and Discharge Point 002 (Latitude 34.28169°, Longitude -118.81350°) to Arroyo Simi. The Simi Valley WQCP serves an estimated population of 126,400 people in the City of Simi Valley and unincorporated sections of Ventura County. The discharge is regulated under waste discharge requirements contained in Order No. R4-2019-0135, adopted by the Los Angeles Regional Water Quality Control Board (Los Angeles Water Board) on November 14, 2019. Order No, R4-2019-0135 serves as a permit under the National Pollutant Discharge Elimination System (NPDES No. CA0055221). The Discharger filed a Report of Waste Discharge (ROWD) and applied for reissuance of Waste Discharge Requirements (WDRs) and NPDES permit on June 25, 2024. The application was deemed complete on July 22, 2024. On August 25, 2025, the City submitted a request for interim limits for TDS, chloride, and sulfate and proposed a schedule to bring the discharge into compliance. The Los Angeles Water Board is proposing to issue the City a Time Schedule Order to provide the City with additional time to comply with the effluent limitations for TDS, chloride, and sulfate.

On the basis of preliminary staff review and application of lawful standards and regulations, the Los Angeles Water Board tentatively proposes to issue a Time Schedule Order under the California Water Code section 13300.
