Subject: COMMENTS ON THE HEARING FOR PROPOSED REVISIONS TO THE 303(d) LIST FOR VENTURA COUNT BEACH BACTERIA
Date: Friday, January 25, 2019 09:11:19

Hi,

Please consider this as a comment on the subject item. It is unacceptable for a public hearing on this important water quality and human health topic to be held so far away from the stakeholders. This greatly limits the public's ability to attend, hear the information in person, and provide oral comments.

I know several interested parties that live in Ventura near these beaches and they are very disappointed that the hearing will be in Long Beach. They were hoping to attend in person to hear the discussion and potentially provide oral comments. What is behind the decision to have the meeting so far from Ventura where presumably the majority of the stakeholders reside?

Sincerely,
Craig Carlisle
