Deadline: 3/17/17 12:00 noon

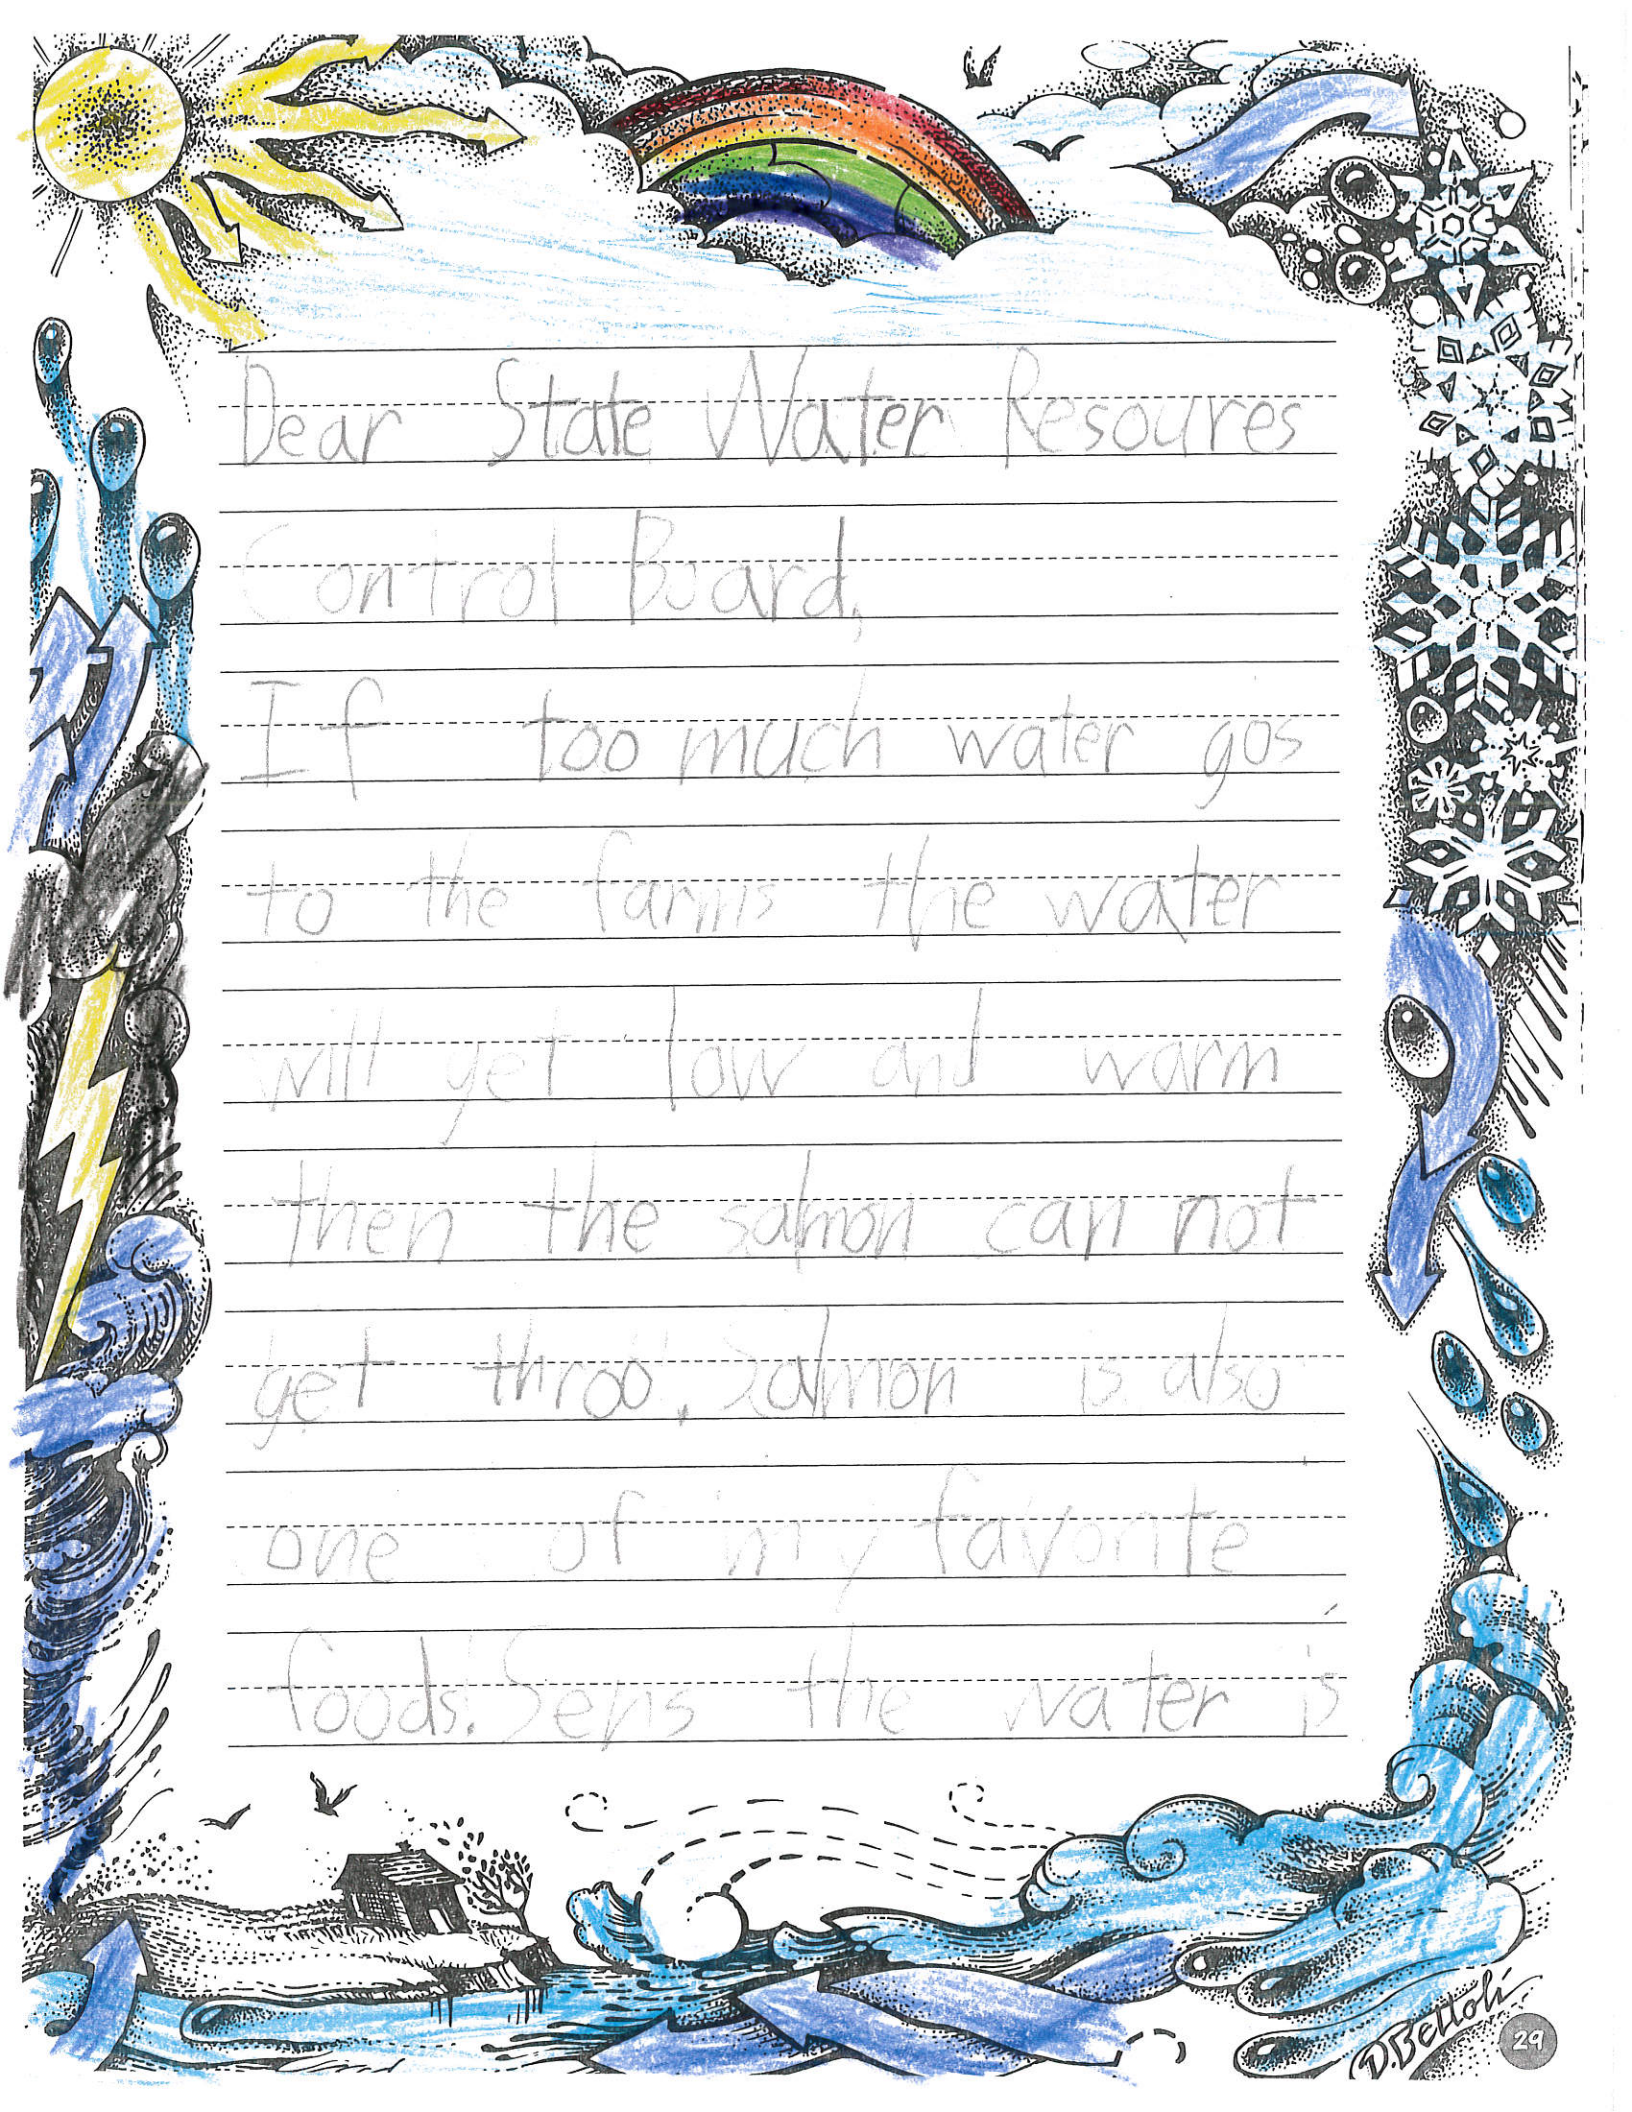

Dear State Water
Resources Control Board,
I don't think that all of
the water should be
for farming. When there
is not enough water
in the rivers and it
is hot an algael
bloom comes and it

might be toxic. 😡

From, Soliana

P.S My Classroom helps the earth
a lot. 😊

Dear State Water Resources

Control Board,

If too much water goes

to the farms the water

will get low and warm

then the salmon can not

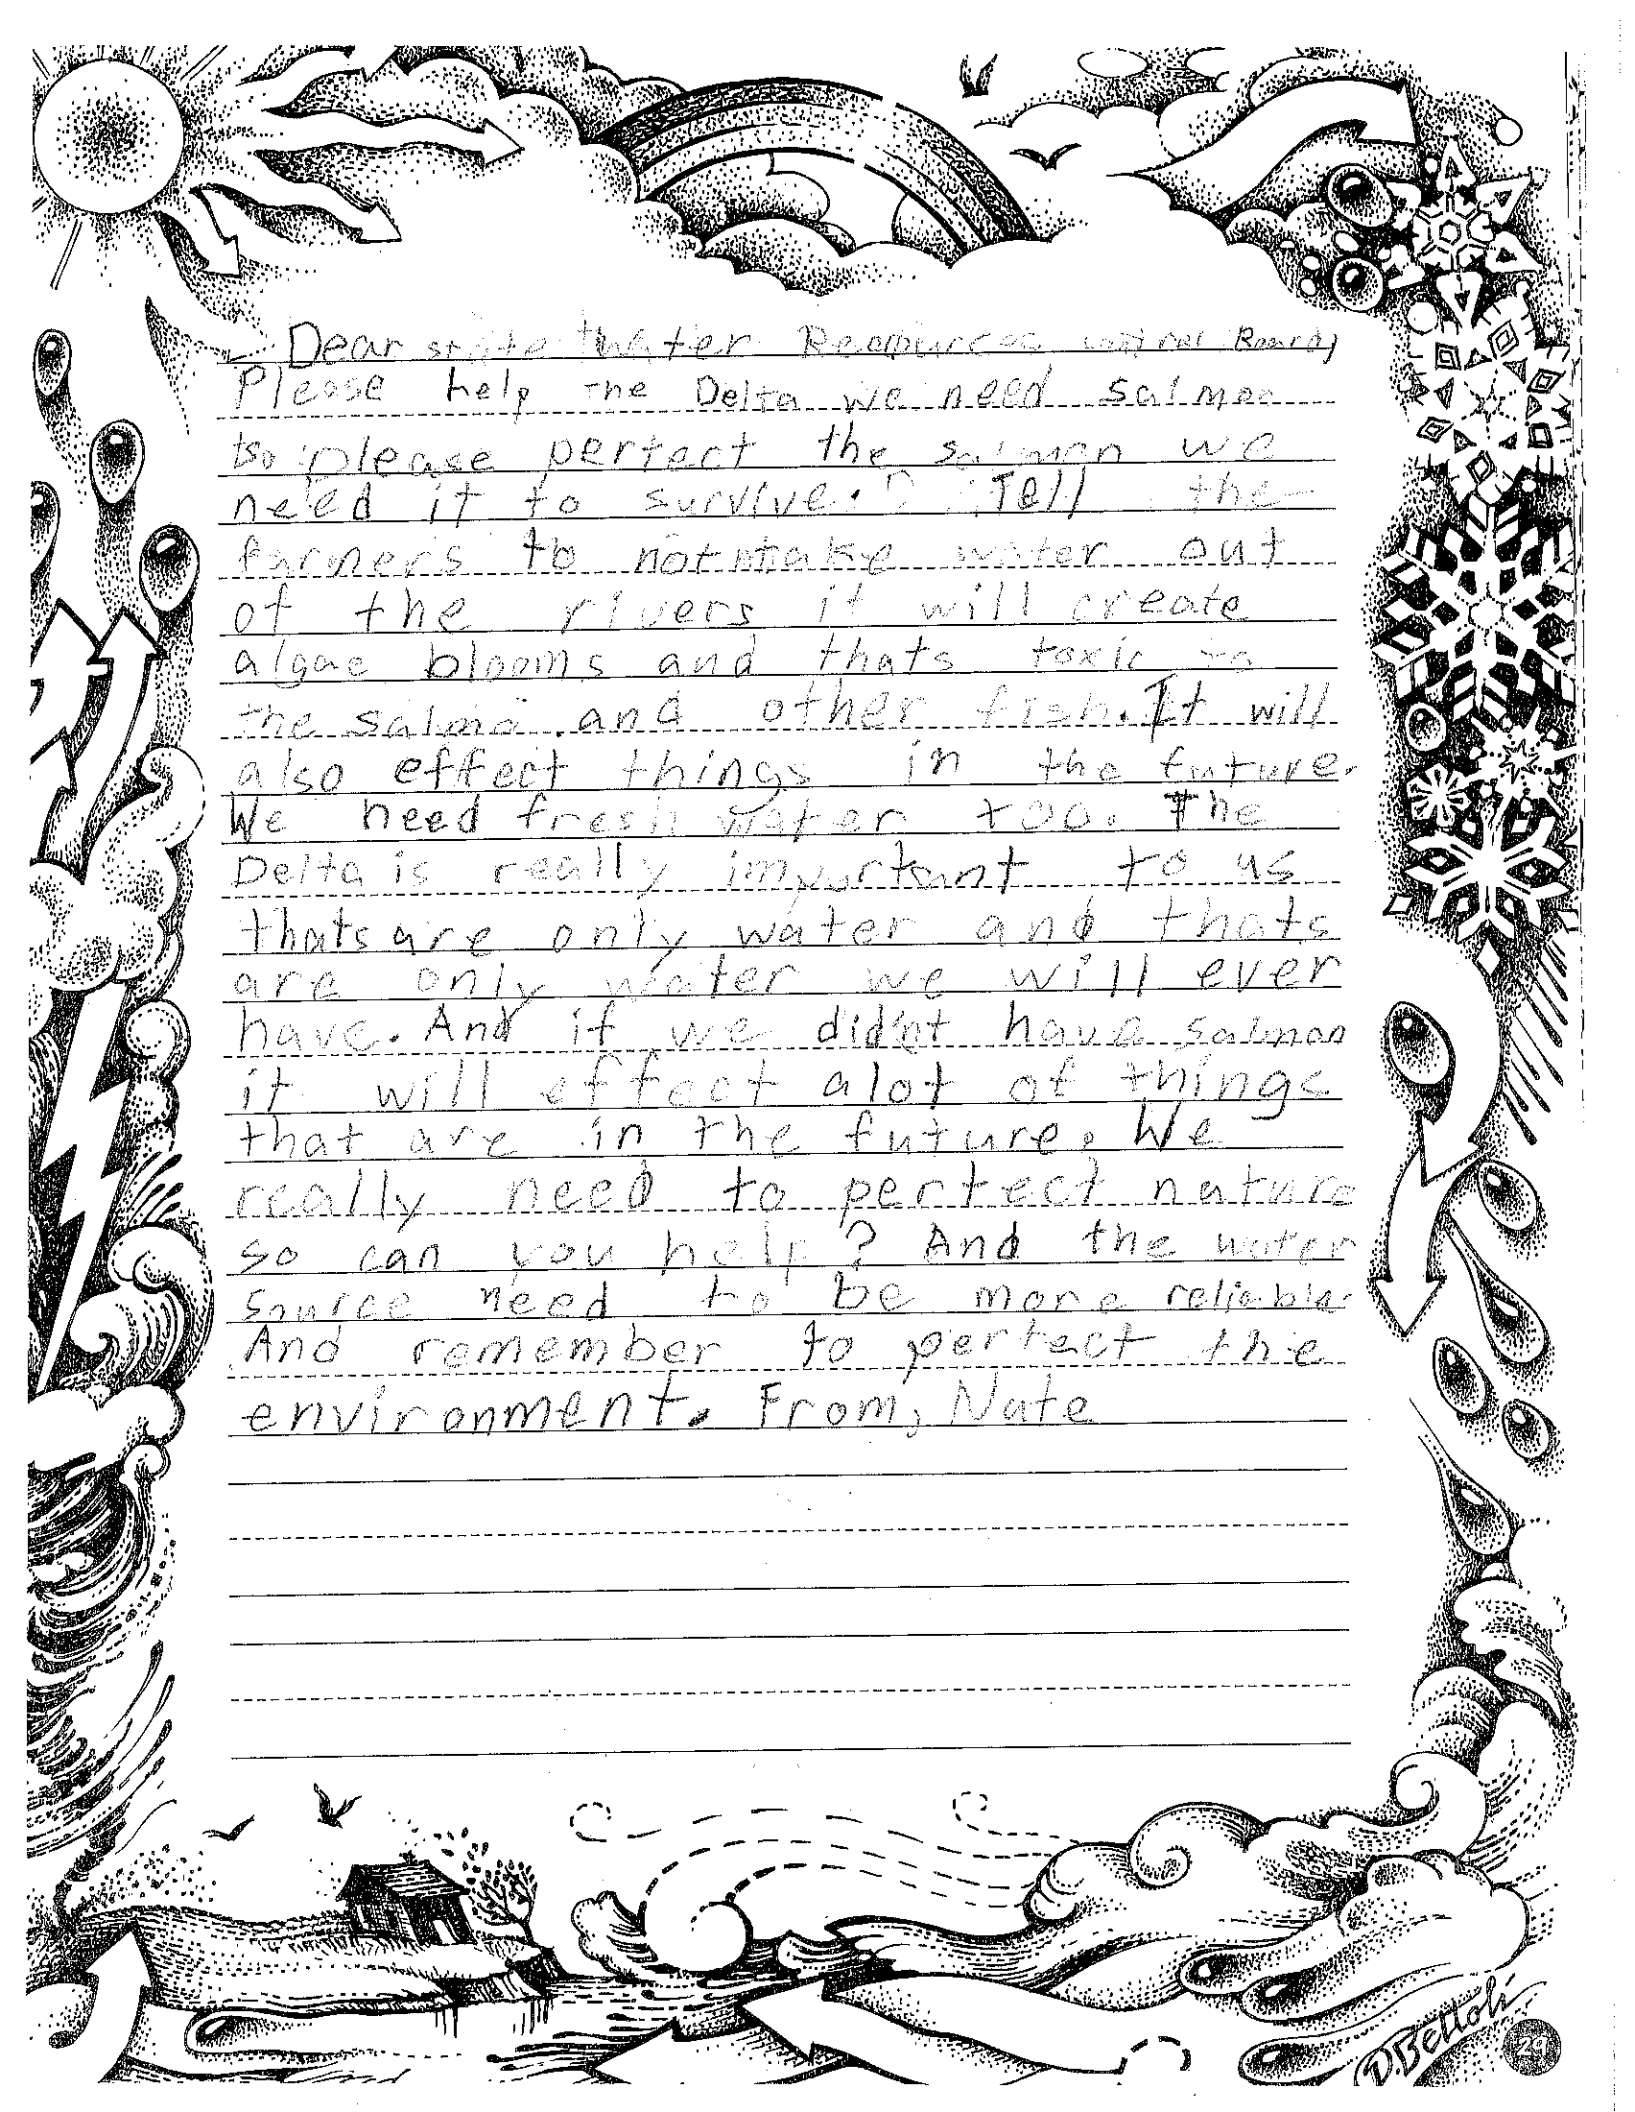

get throo', salmon is also

one of my favorite

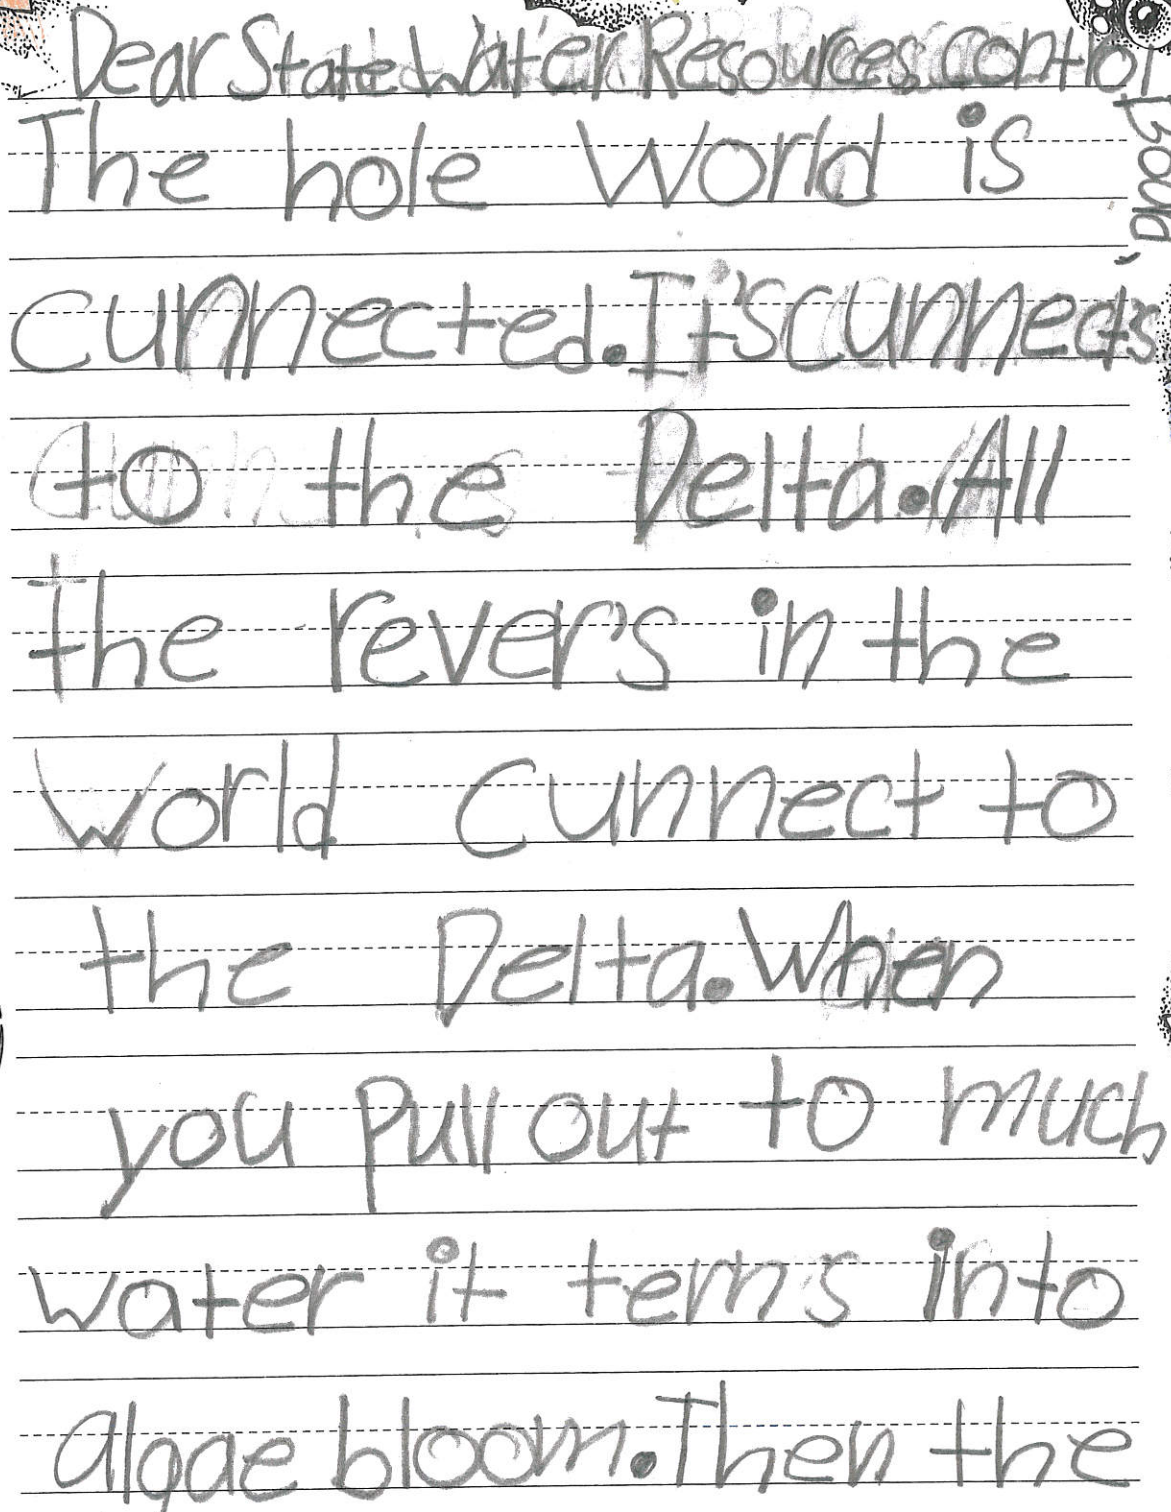

foods. Seps the water is

low and warm it will cause algae blooms. That can be toxic and can kill salmon. The good thing is that it will create nutrients for nature but if you let it lay there eggs then it will provide nutrients and alot more salmon. We can even take half of the salmon and it would not harm the salmon. Just keep the fresh water for the salmon. For the safe of extingtan!

From
Wool

Dear state water Resources control Board
Please help the Delta we need salmon
to please protect the salmon we
need it to survive. Tell the
farmers to not take water out
of the rivers it will create
algae blooms and thats toxic to
the salmon and other fish. It will
also effect things in the future.
We need fresh water too. The
Delta is really important to us
thats are only water and thats
are only water we will ever
have. And if we didnt have salmon
it will effect alot of things
that are in the future. We
really need to protect nature
so can you help? And the water
source need to be more reliable.
And remember to protect the
environment. From, Nate

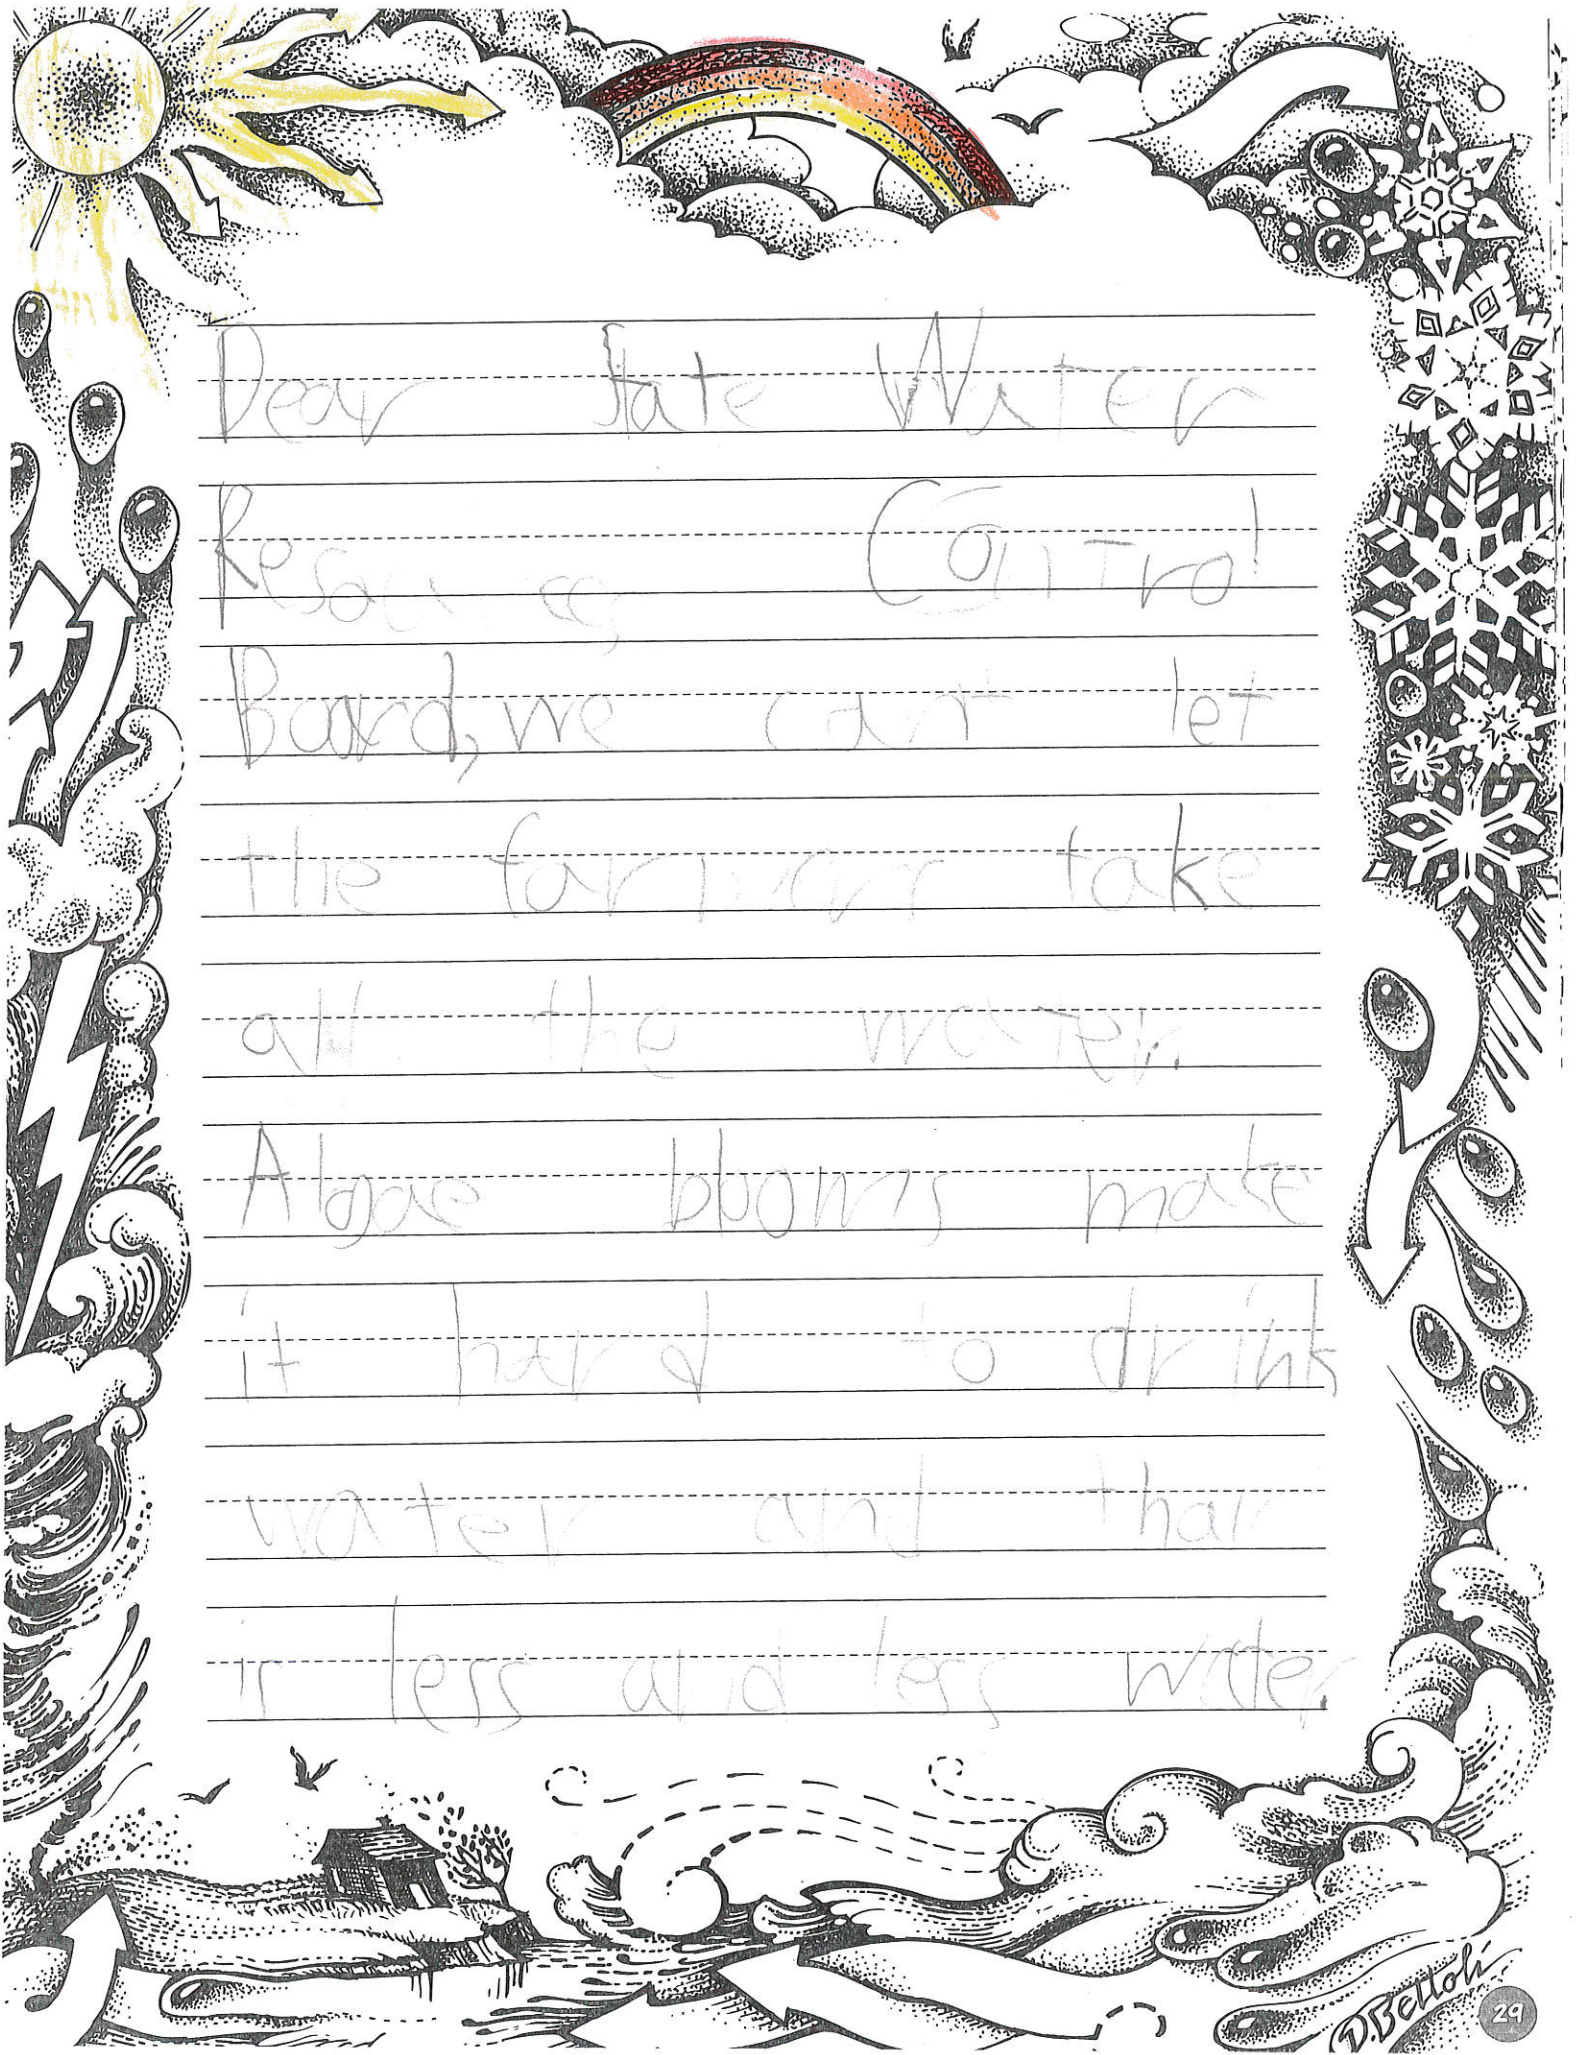

Dear State Water Resources Control
The hole world is
cunnected. It's cunnected
to the Delta. All
the rivers in the
world cunnect to
the Delta. When
you pull out to much
water it turns into
algae bloom. Then the

BOOD

algae bloom gose into the
Delta. we drink that water.
So Pleaes Pleaes STOP
Pulling out the water and
help the Earth!

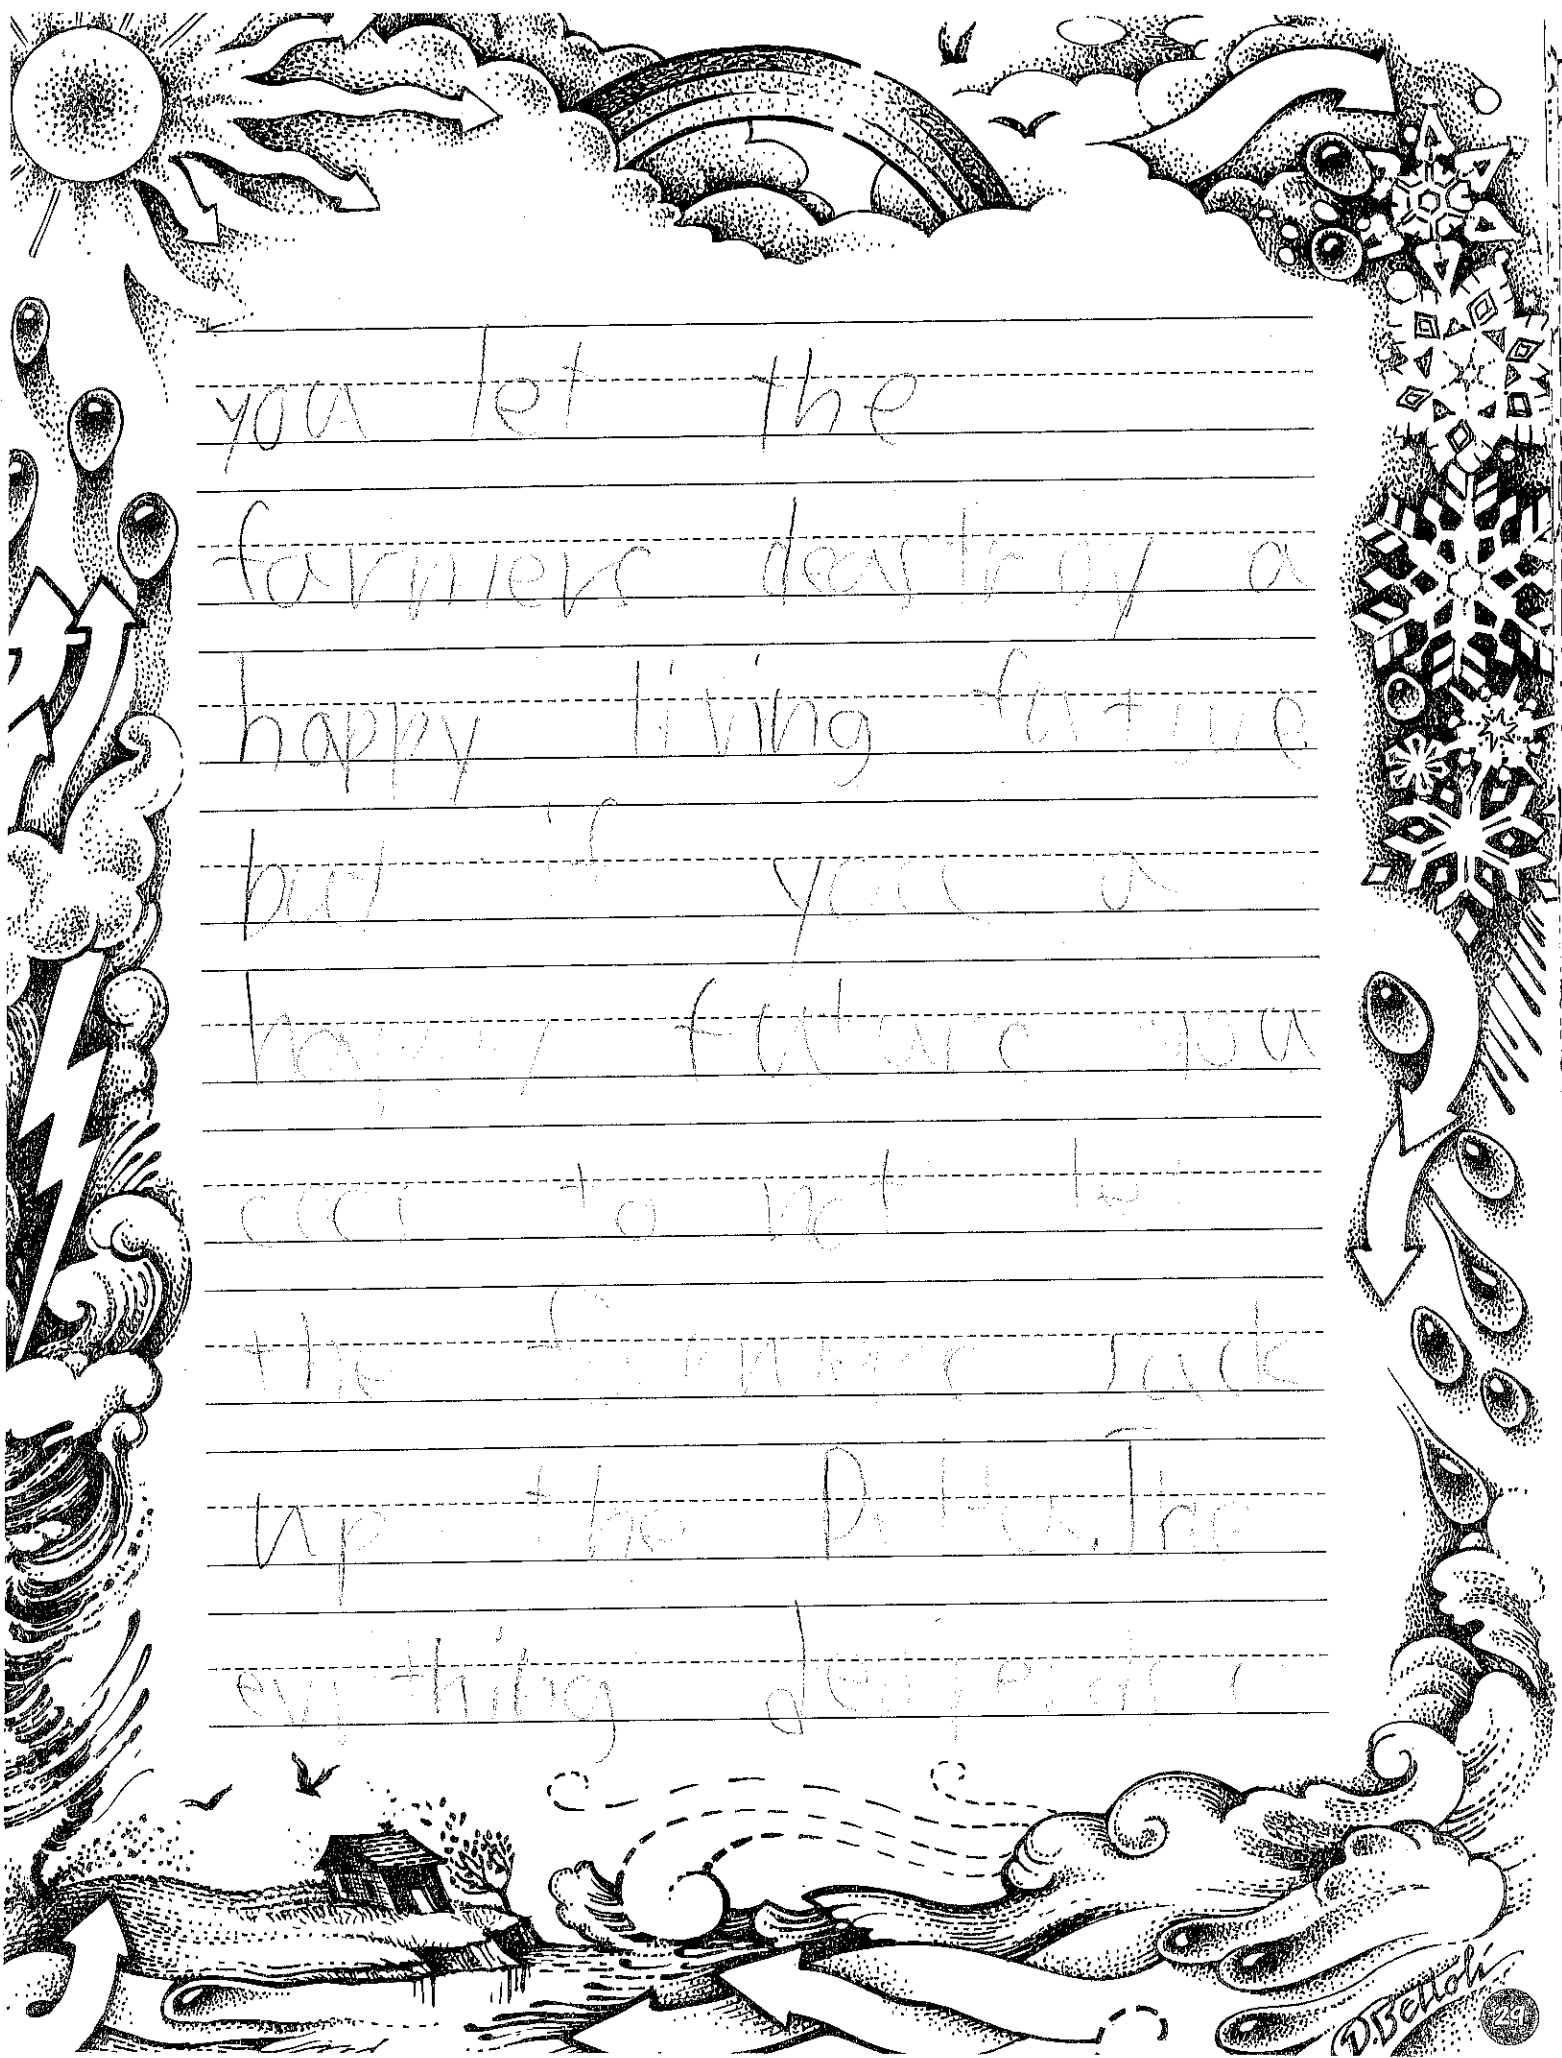

P
From,
Paige

Dear State Water
Resources Control
Board, we can't let
the farmers take
all the water.
Above bonuses make
it hard to drink
water and that
is less and less water.

The fishermen can
not fish for salmon
and the population
of the salmon is
decreasing. the
farmers are
destroying the
Delta. we need the
water to live

and if you
choose to let the
farmers destroy
the Delta you

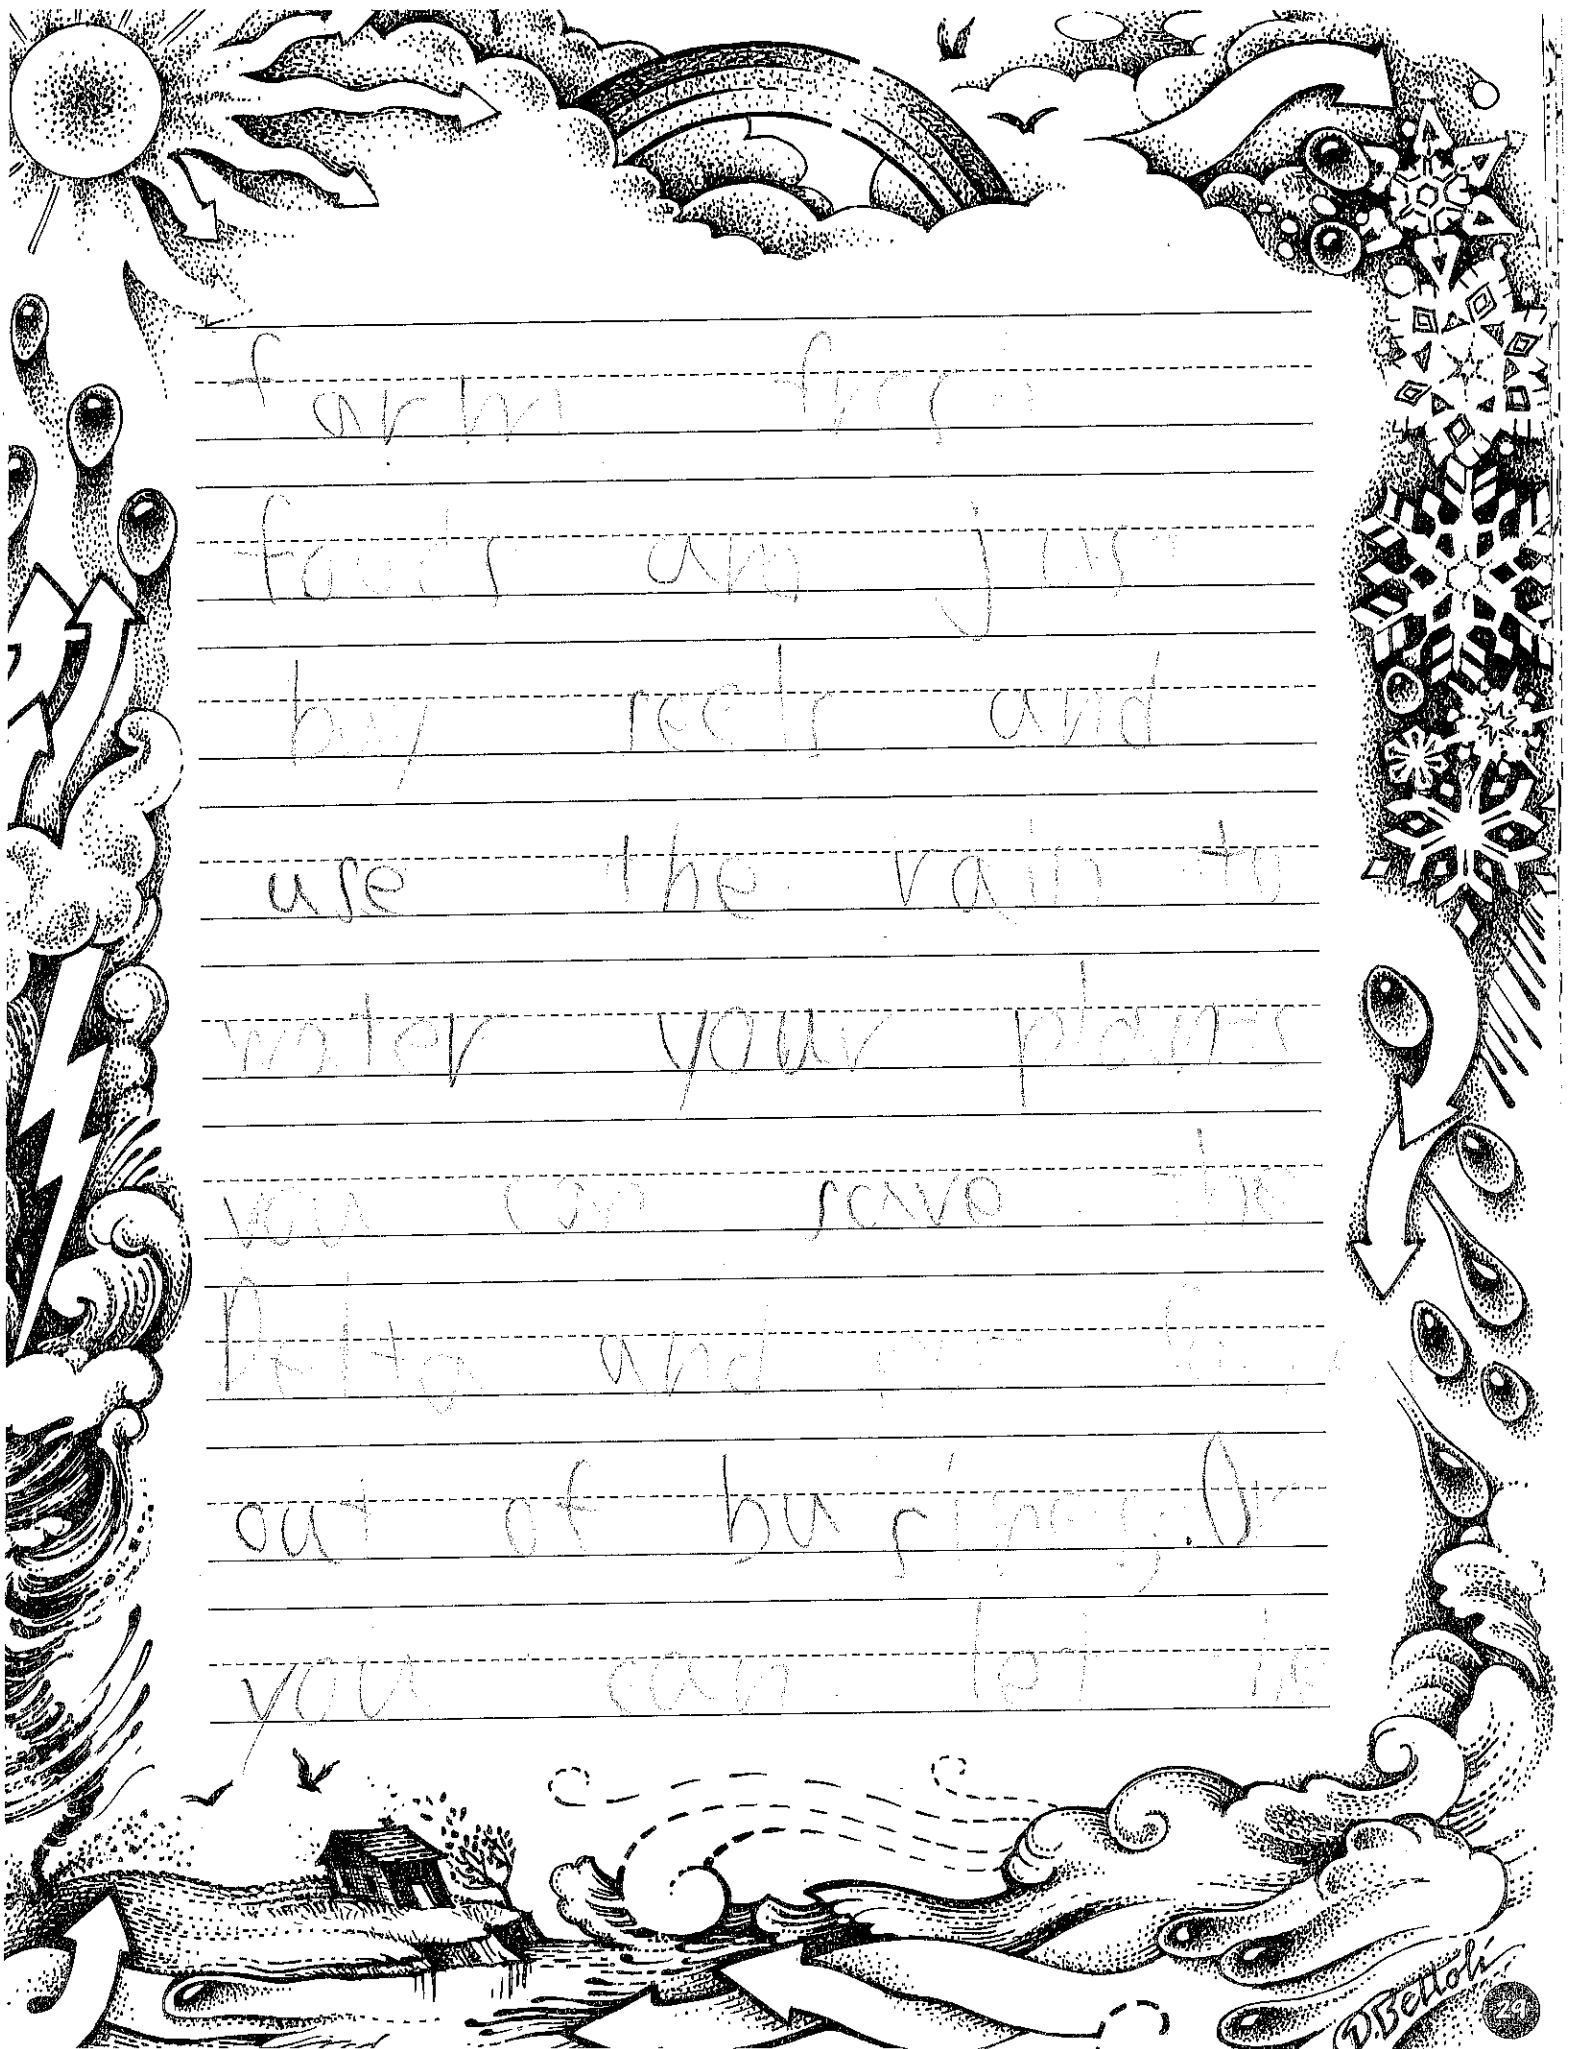

you let the
farmers destroy a
happy living future
but if you a
happy future you
can't let
the farmers rack
up the debt. The
everything depends on

this choice, the pearls,
the kids your Home,

and many others.
your friends depend
on that one choice.

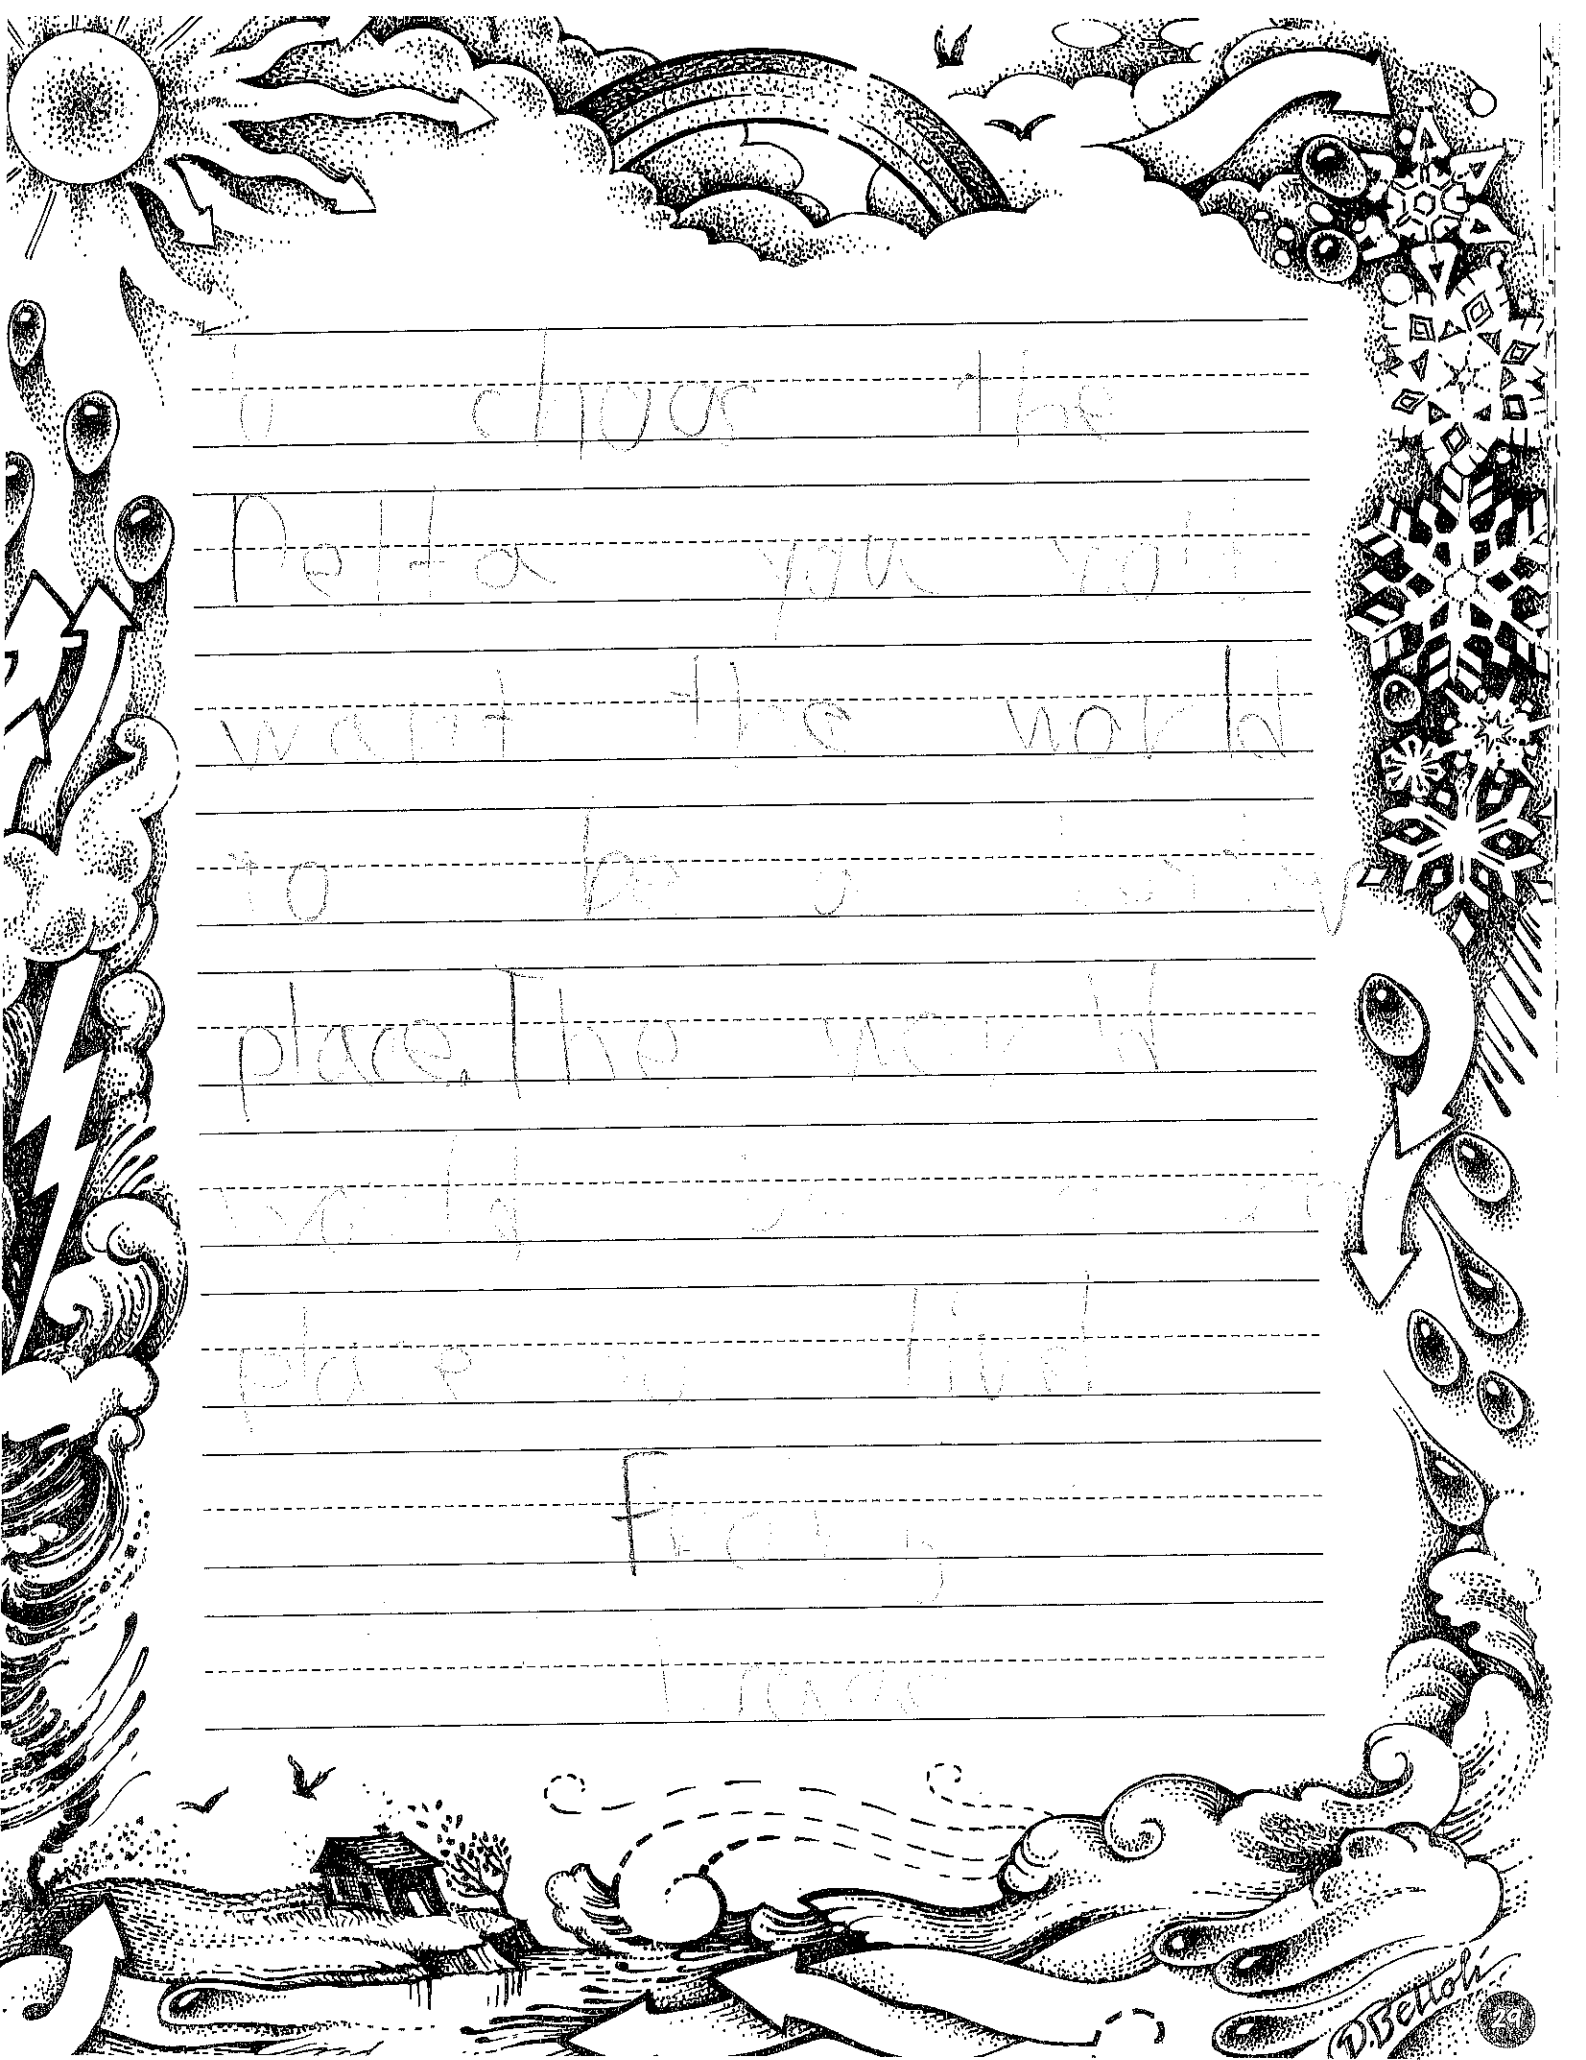

I know you
think that you
will starve but
if you don't buy
any

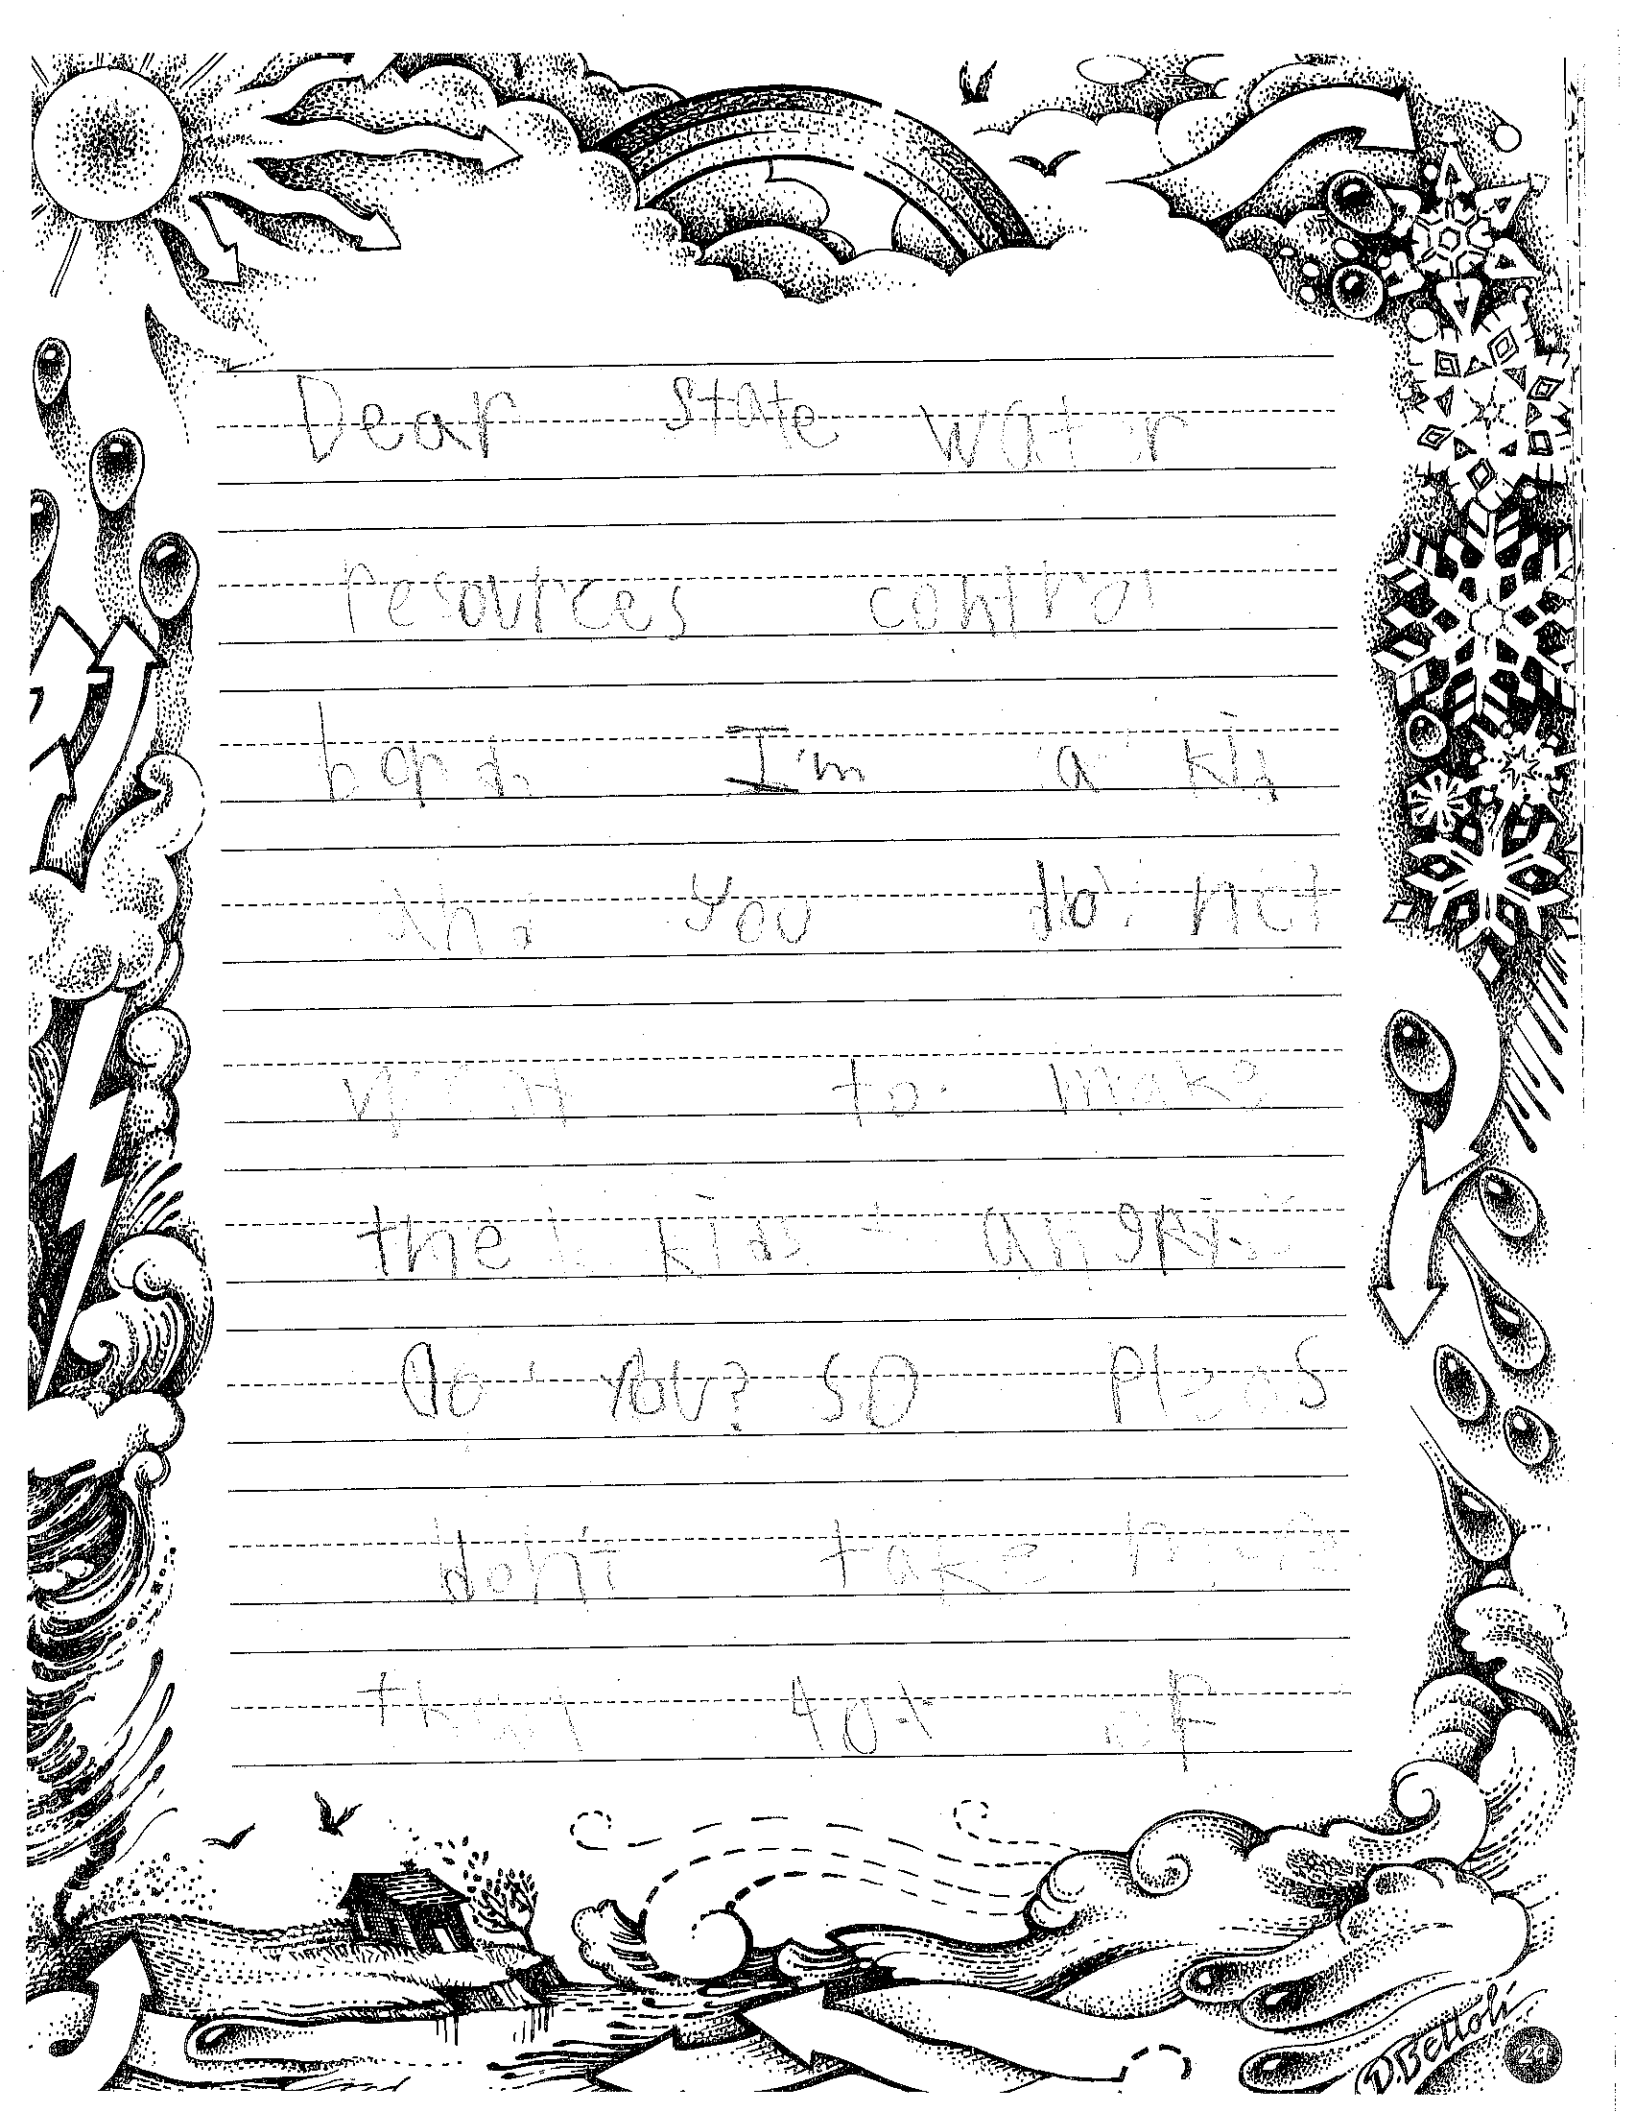

farm fresh
foods are just
buy reets and
use the rain to
water your plants
you can save the
delta and get
out of bur piping. Or
you can let the

lose the job or
use the rain
to help the
environment. If
you care about
the environment,
the world, fishing,
the Delta, the fish,
then you will
want

In chaos the
Delta you would
want the world
to be a better
place. The world
would be a
place to live
freely
happily

Dear State water

resources control

board. I'm a kid

and you don't get

what to make

the kids - an \$100

do you? so please

don't take more

than 40% of

The Fresh Water from
the Delta
Do you like all those
Yummy fish from that
Pond? Because when you
do that you make
all those

Diy Beavers Yummy Fish
they can't
have their babies because
the water is too warm
and too dry

they lay their eggs
they need cold water
and in warm water

they even take
can a bee take
algae blooms with their

Now much more water
you're taking out of
the Delta because when

You take water it makes

the water warm ^{are made} kids

how ^{are made} alone humans and

if that happens your

crop might die but if

your crops have food

and you eat that

food you and other

people might even die

from. you know

your just making

it so you can't get

the most you can

you know soon you

won't have

Water

ANX

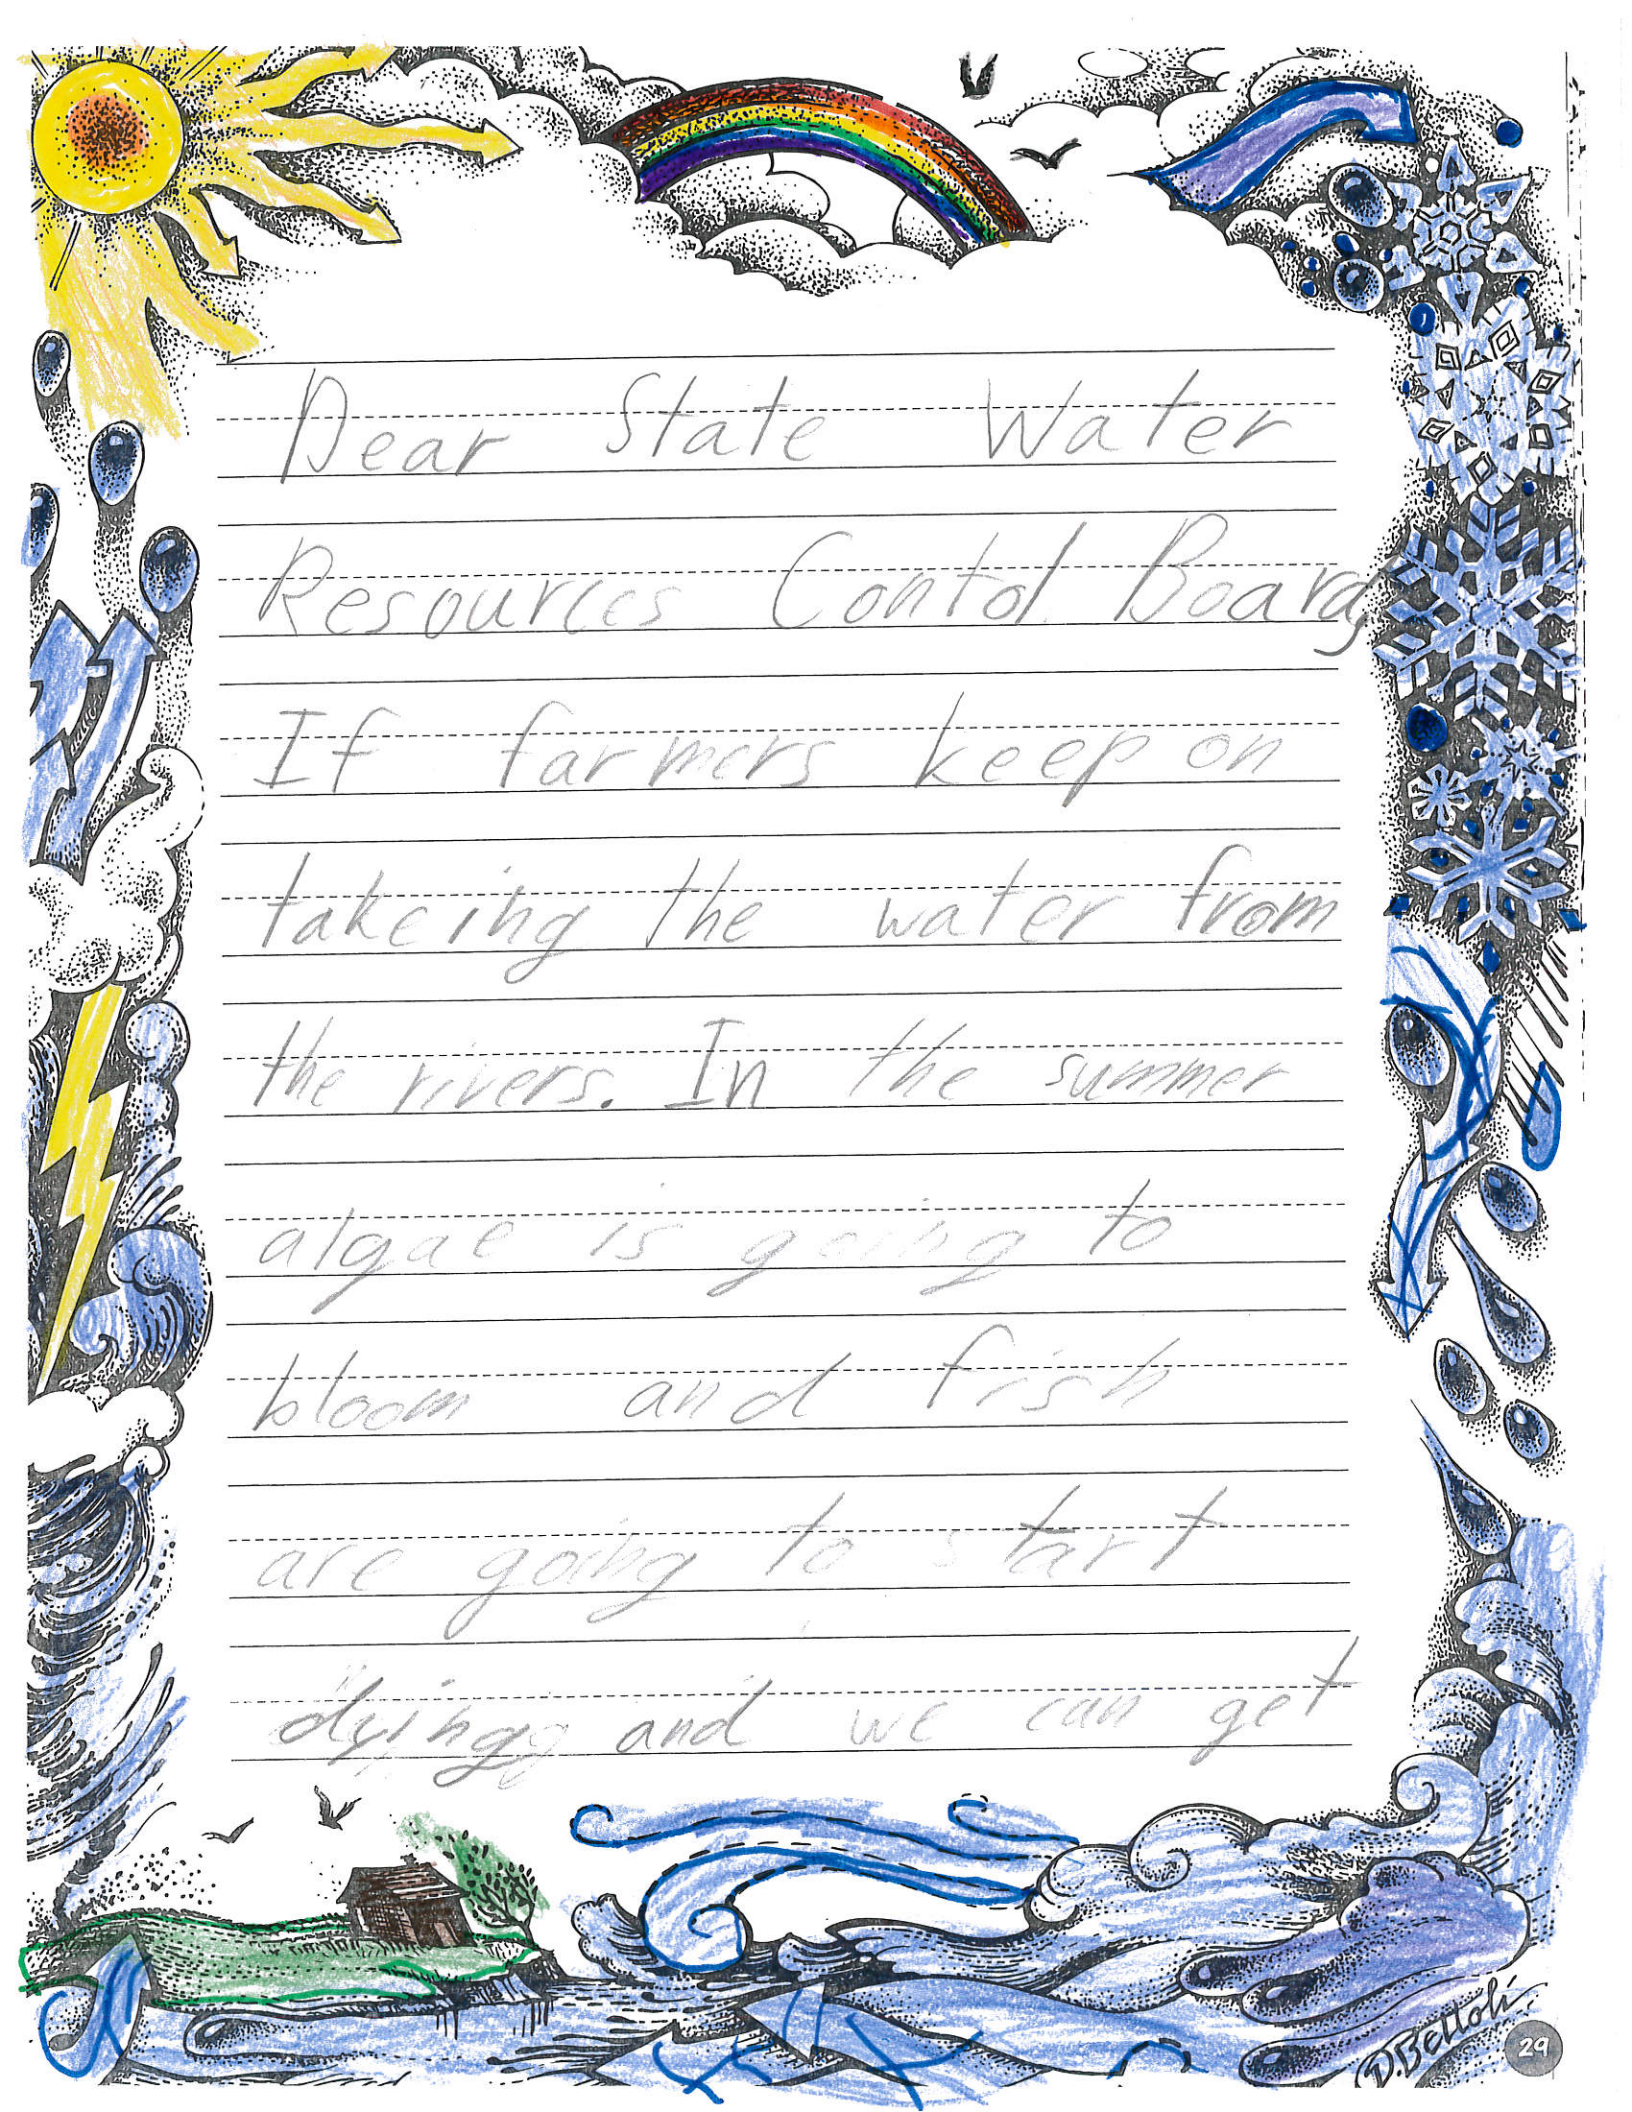

MOR

Remember

extinction

is

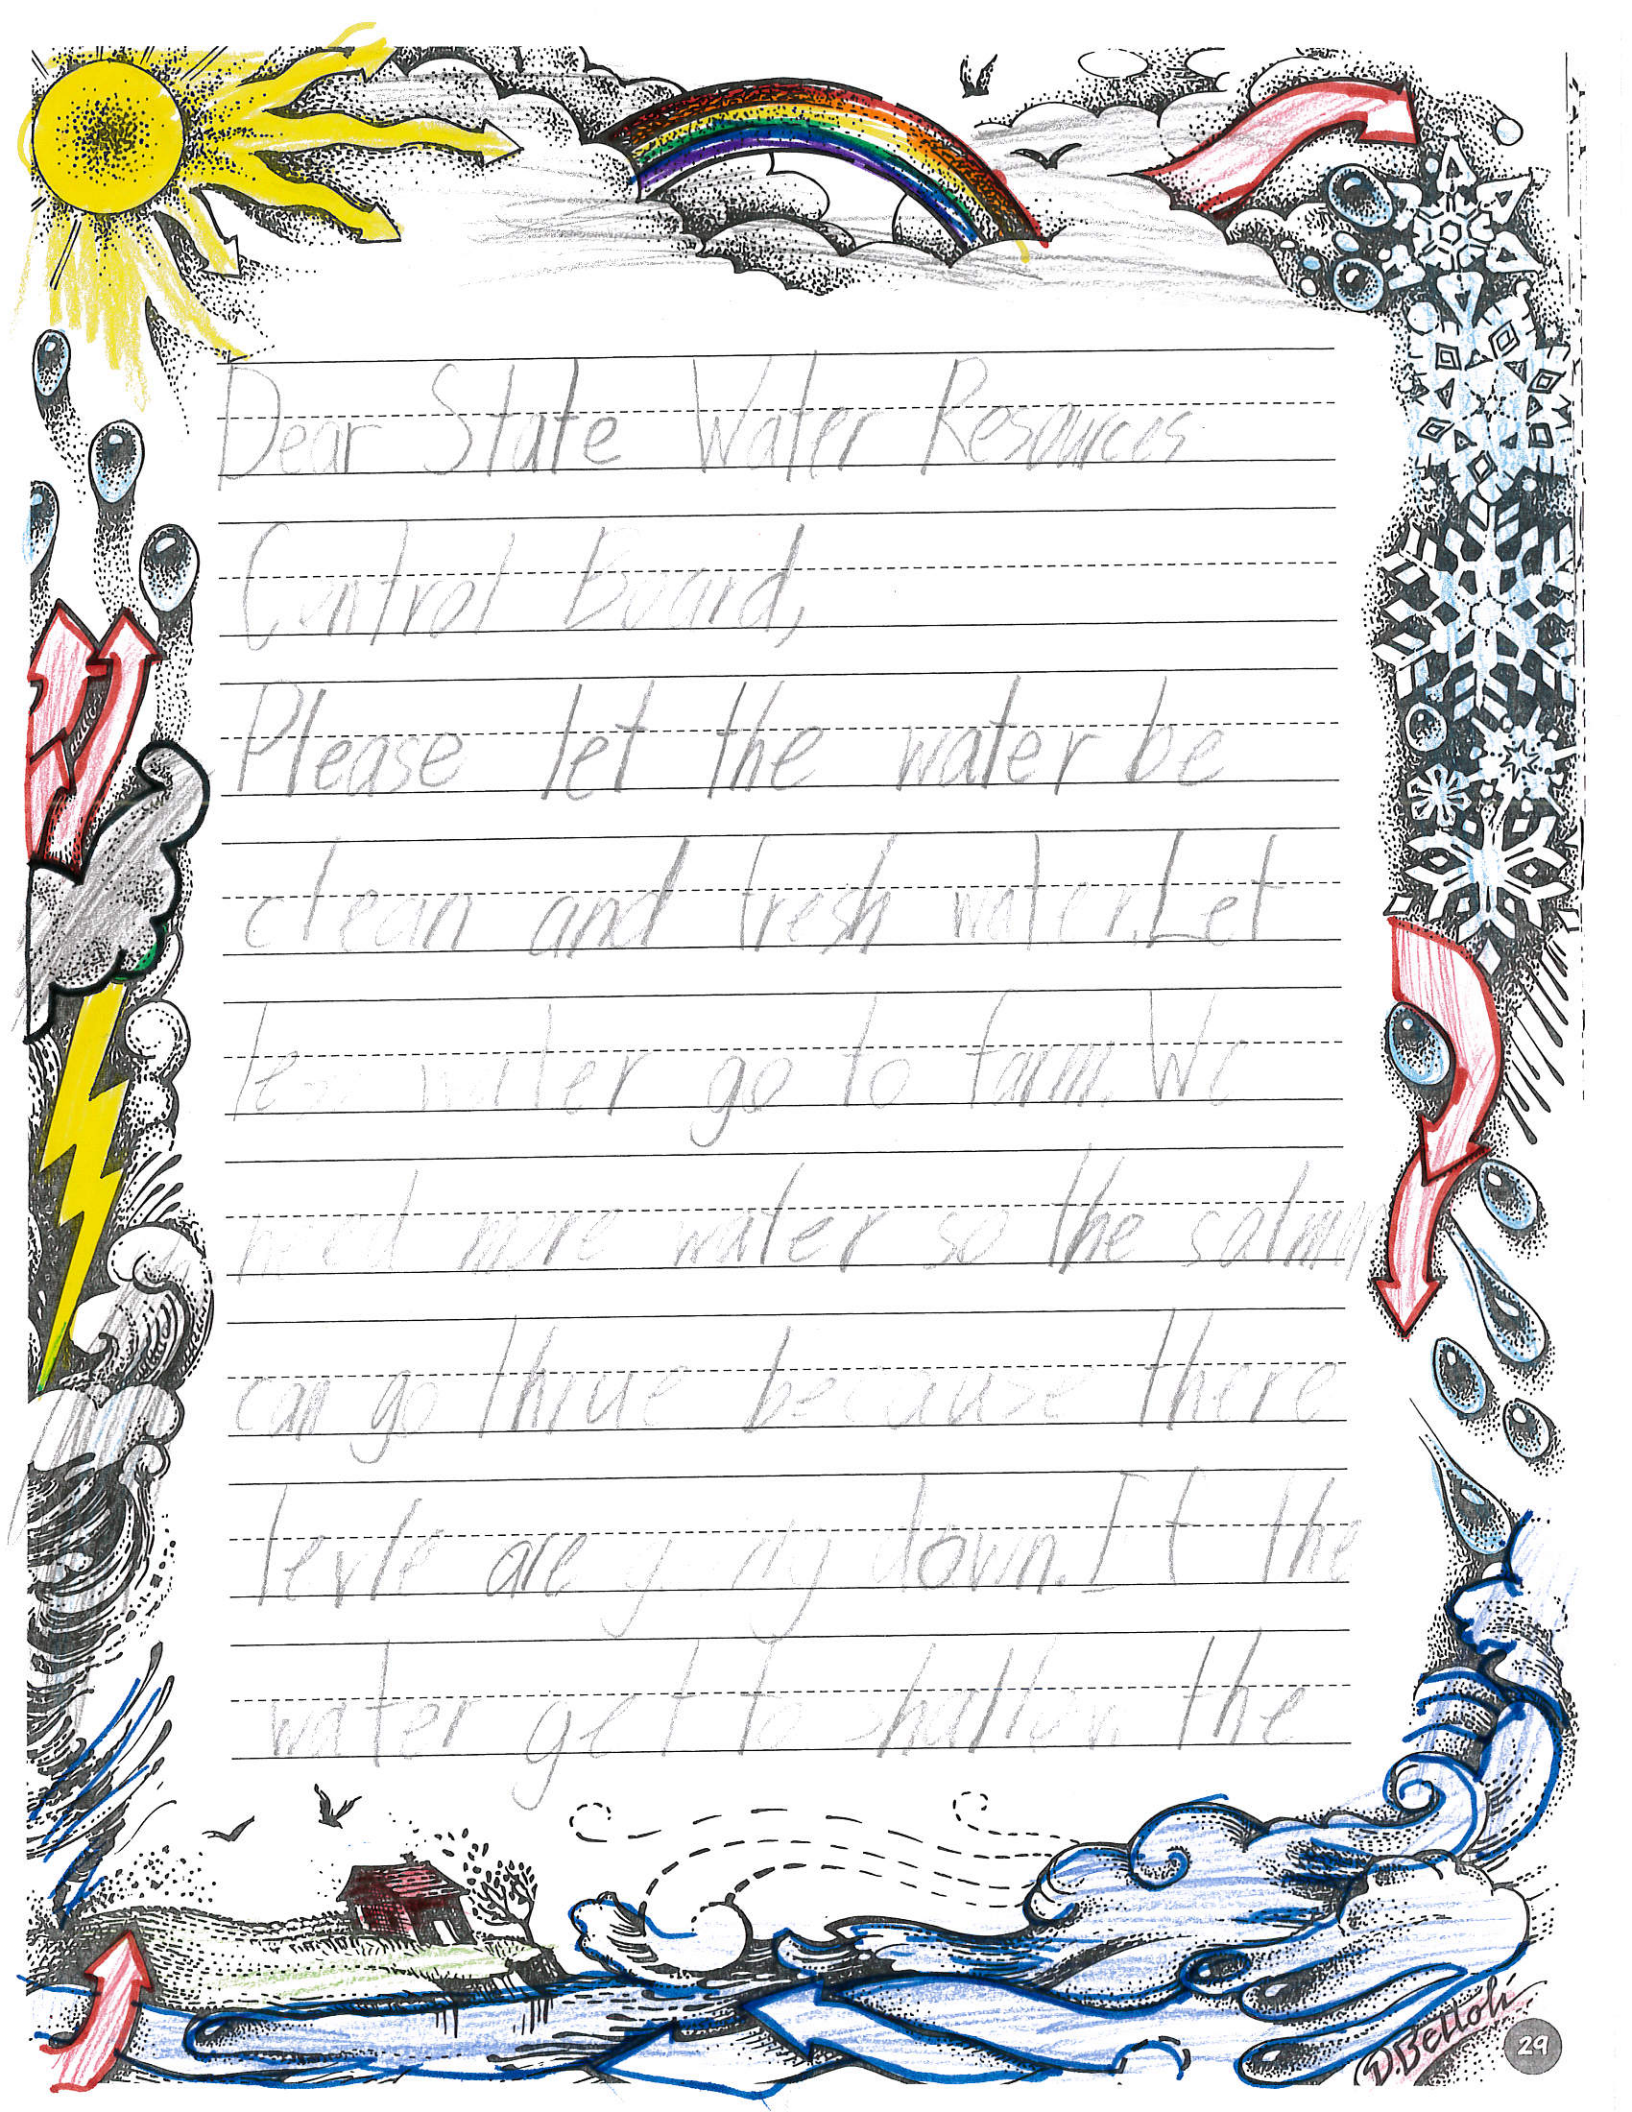

connected

Dear State Water
Resources Control Board,
If farmers keep on
taking the water from
the rivers. In the summer
algae is going to
bloom and fish
are going to start
dying and we can get

poisoned and could sley when people
drink the water. Because the
algae could still be in there.

Love, Nica

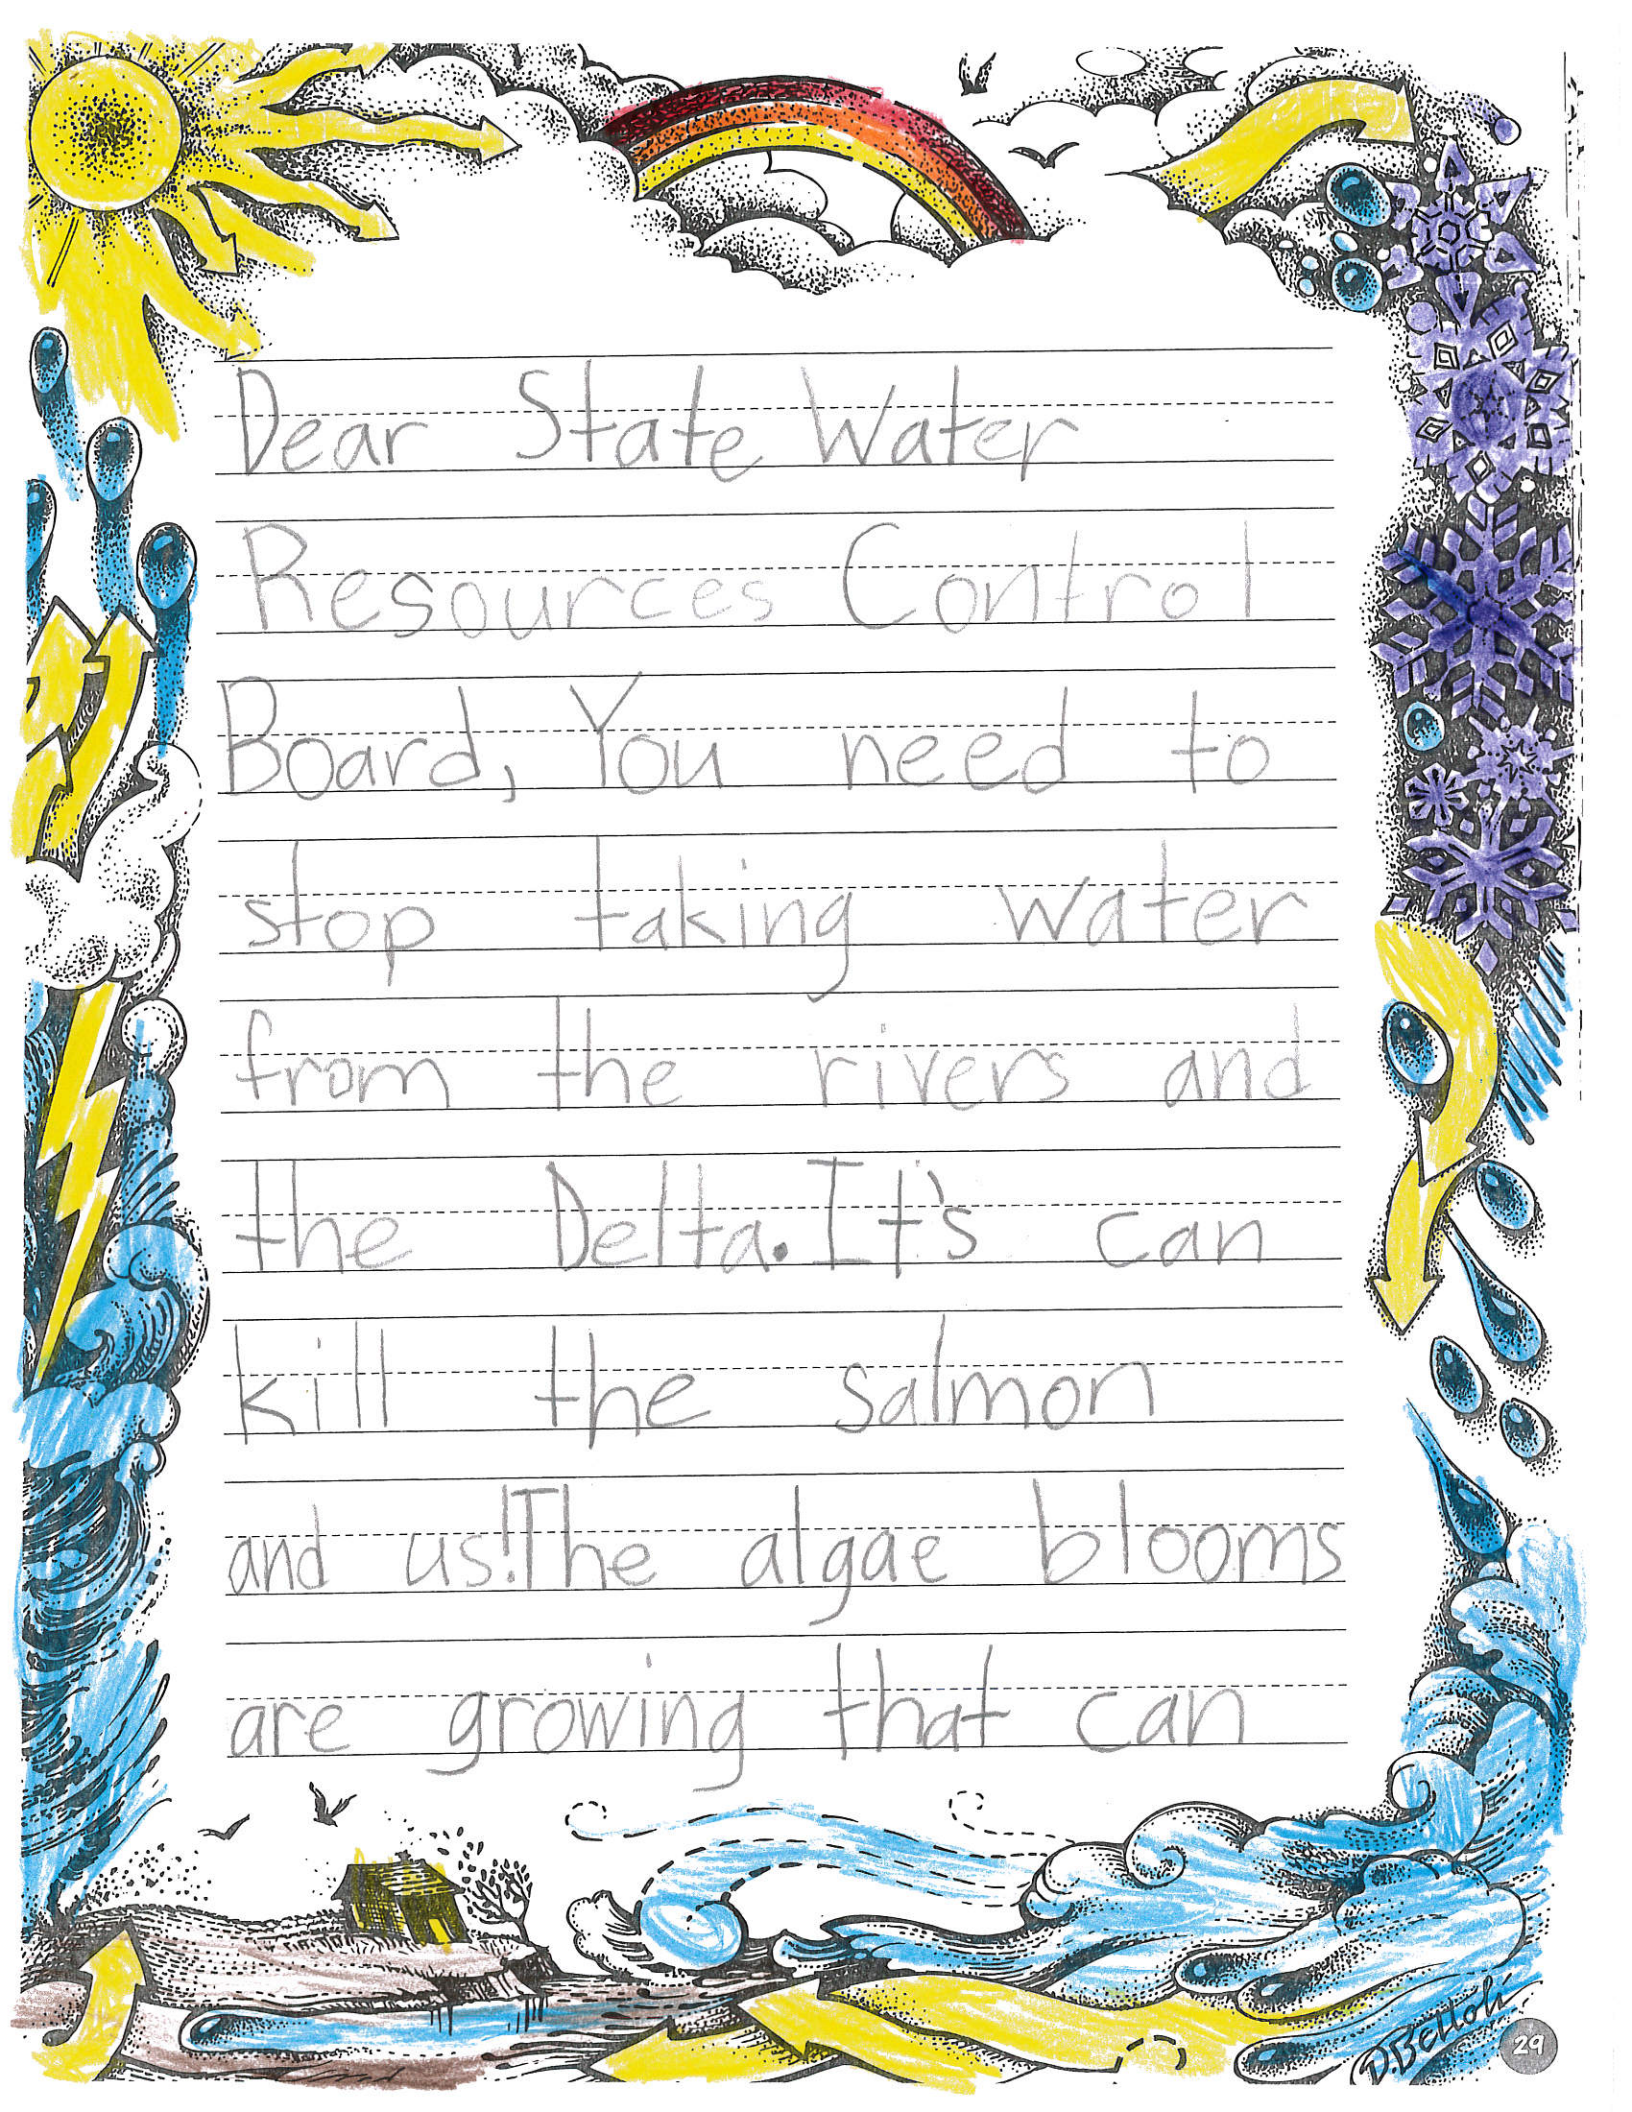

Dear State Water Resources
Control Board,
Please let the water be
clean and fresh water. Let
less water go to farm. We
need more water so the salmon
can go thru because there
levels are going down. If the
water get to shallow the

algae will bloom and that can be
toxic for the animals and us!
It might change the future.

Love,

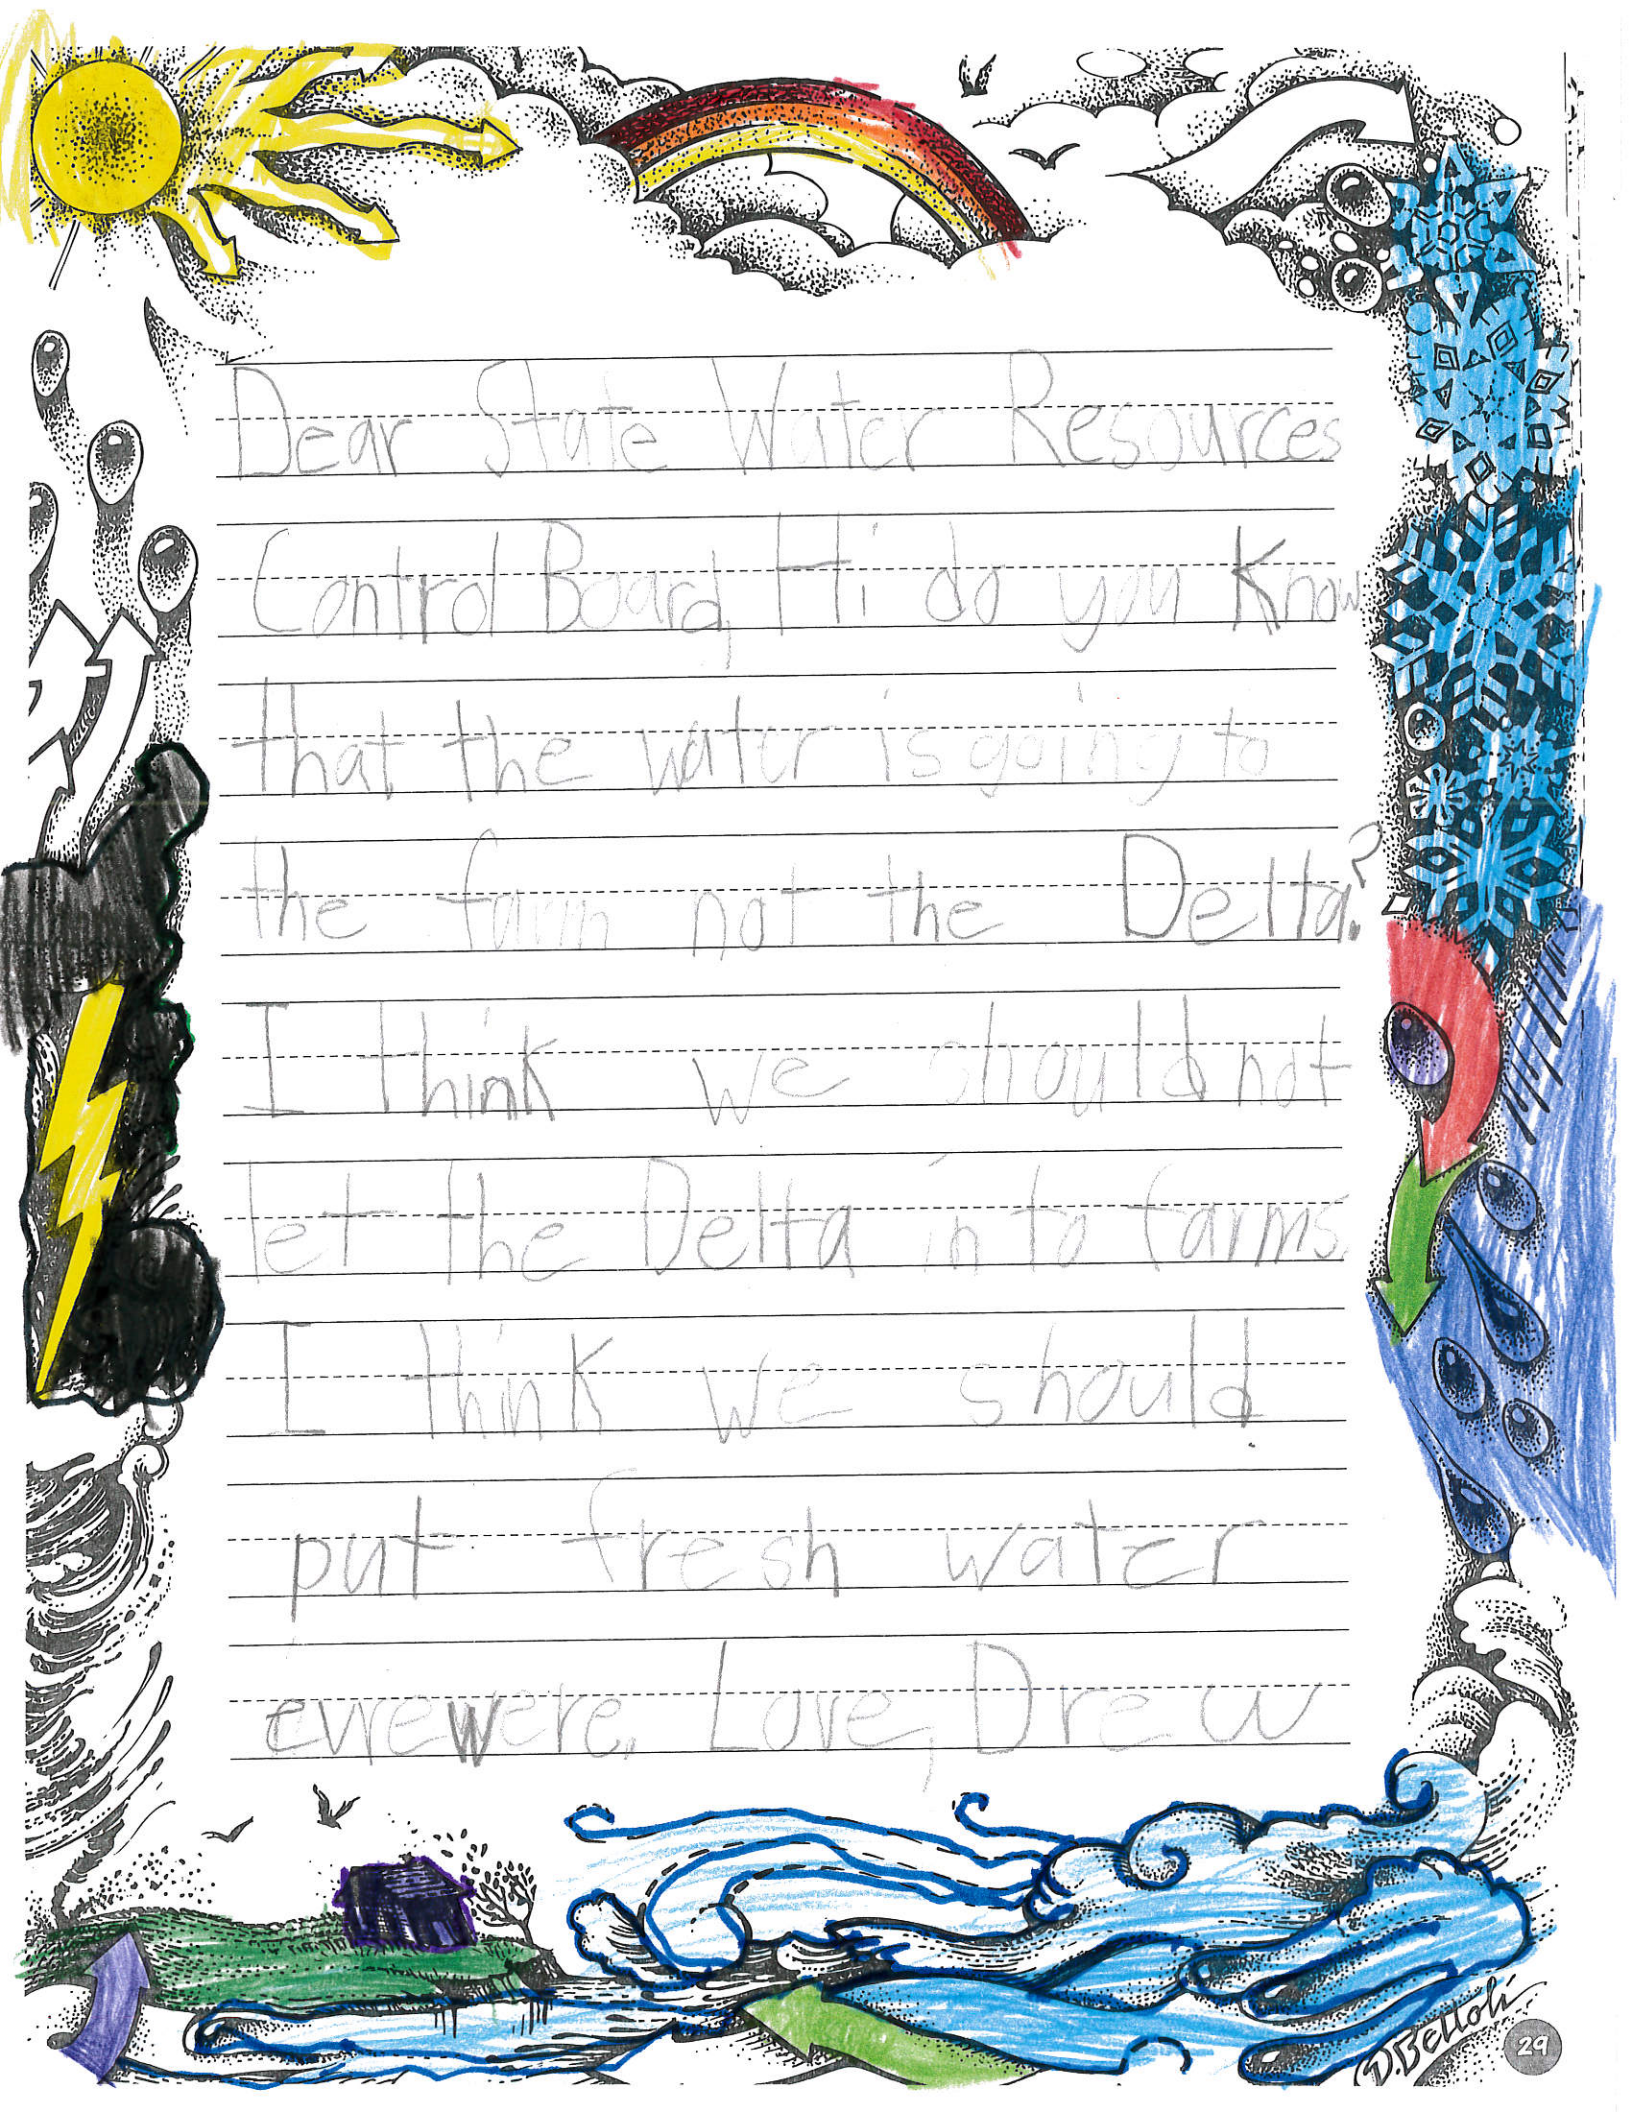

Nina

Dear State Water
Resources Control
Board, You need to
stop taking water
from the rivers and
the Delta. It's can
kill the salmon
and us! The algae blooms
are growing that can

poison our water. Remember,
everything is connected.

From,
Piper

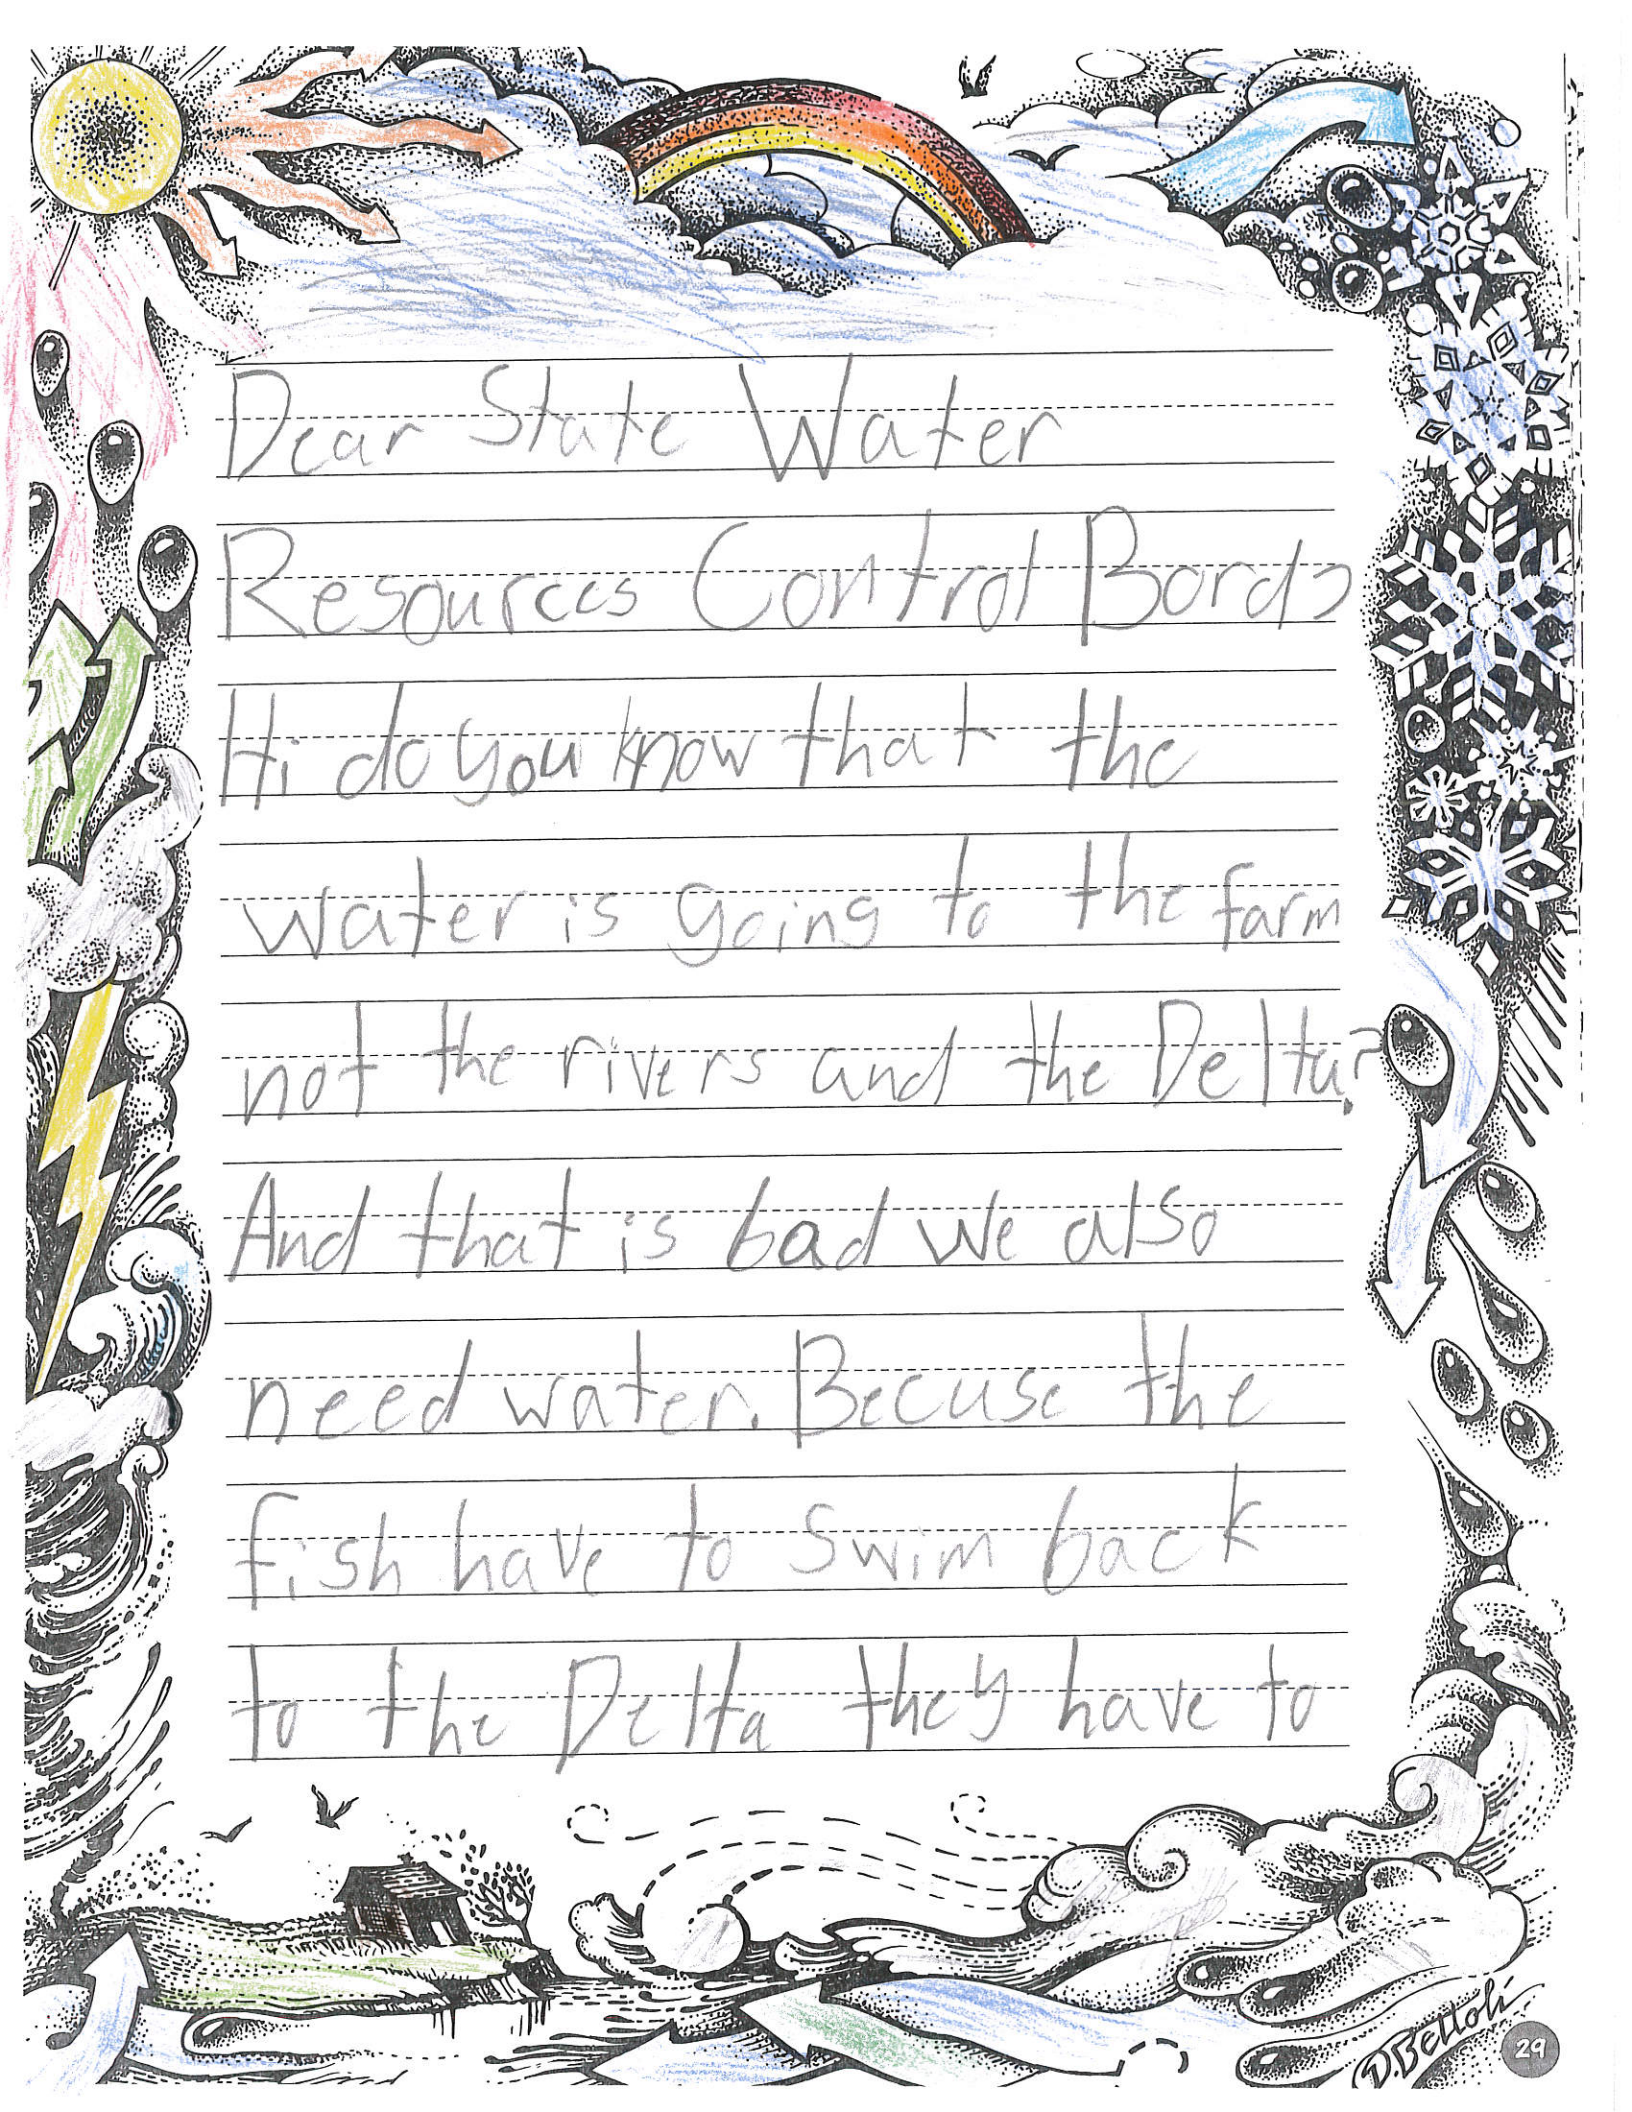

Dear State Water Resources
Control Board, Hi do you know
that the water is going to
the farm not the Delta?
I think we should not
let the Delta into farms
I think we should
put fresh water
everywhere, Love, Drew

Dear State Water
Resources Control Board
Hi do you know that the
water is going to the farm
not the rivers and the Delta
And that is bad we also
need water. Because the
fish have to swim back
to the Delta they have to

lay there eggs and then the mother fish was to pick

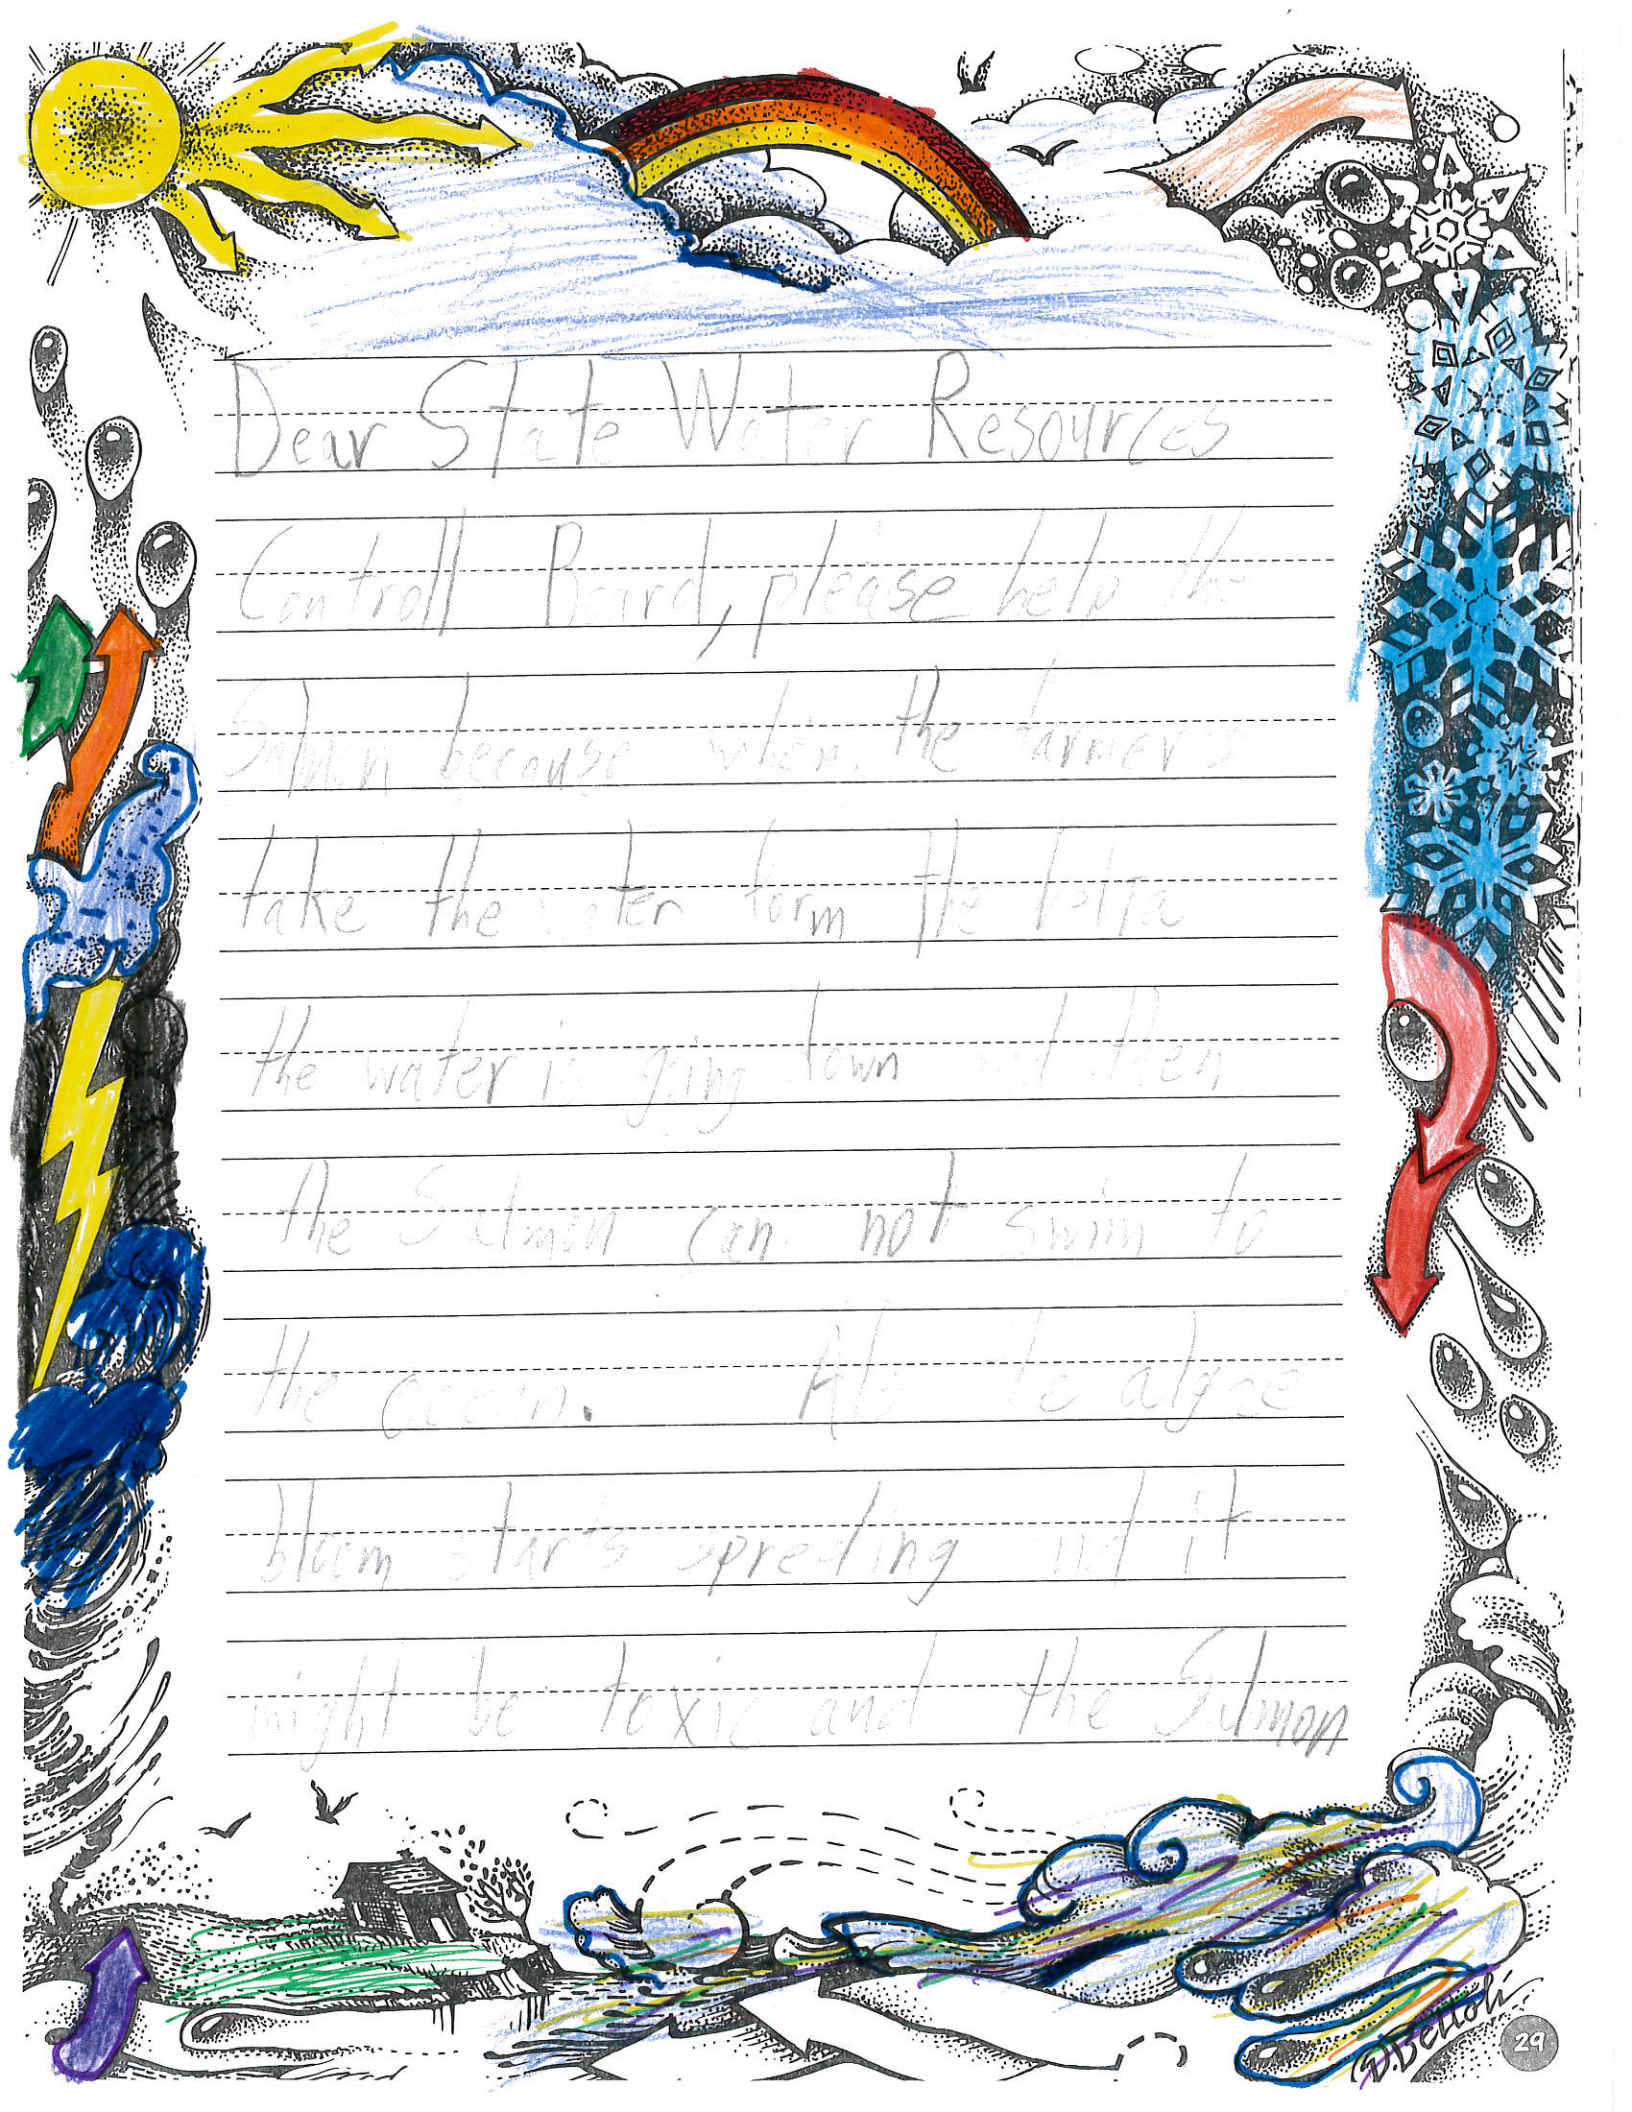

ROMA
Bentley

Dear state Water Resources Control
If the fish die we
die! So do not take out
309,62.563 nets of
water from the
Delta because every
pound of water
that you are taking
out is one step closer
to dying! So please help

the salmon! Also take less water
from the Delta. If you
take 300,62,563 water the futur
will be a disaster but if
you get less it will be a big,
good, and beautiful world but if
you want to trash it do what
you're doing. **BUT PLEASE DO NOT!**
SO help you salmon and the
Futur!

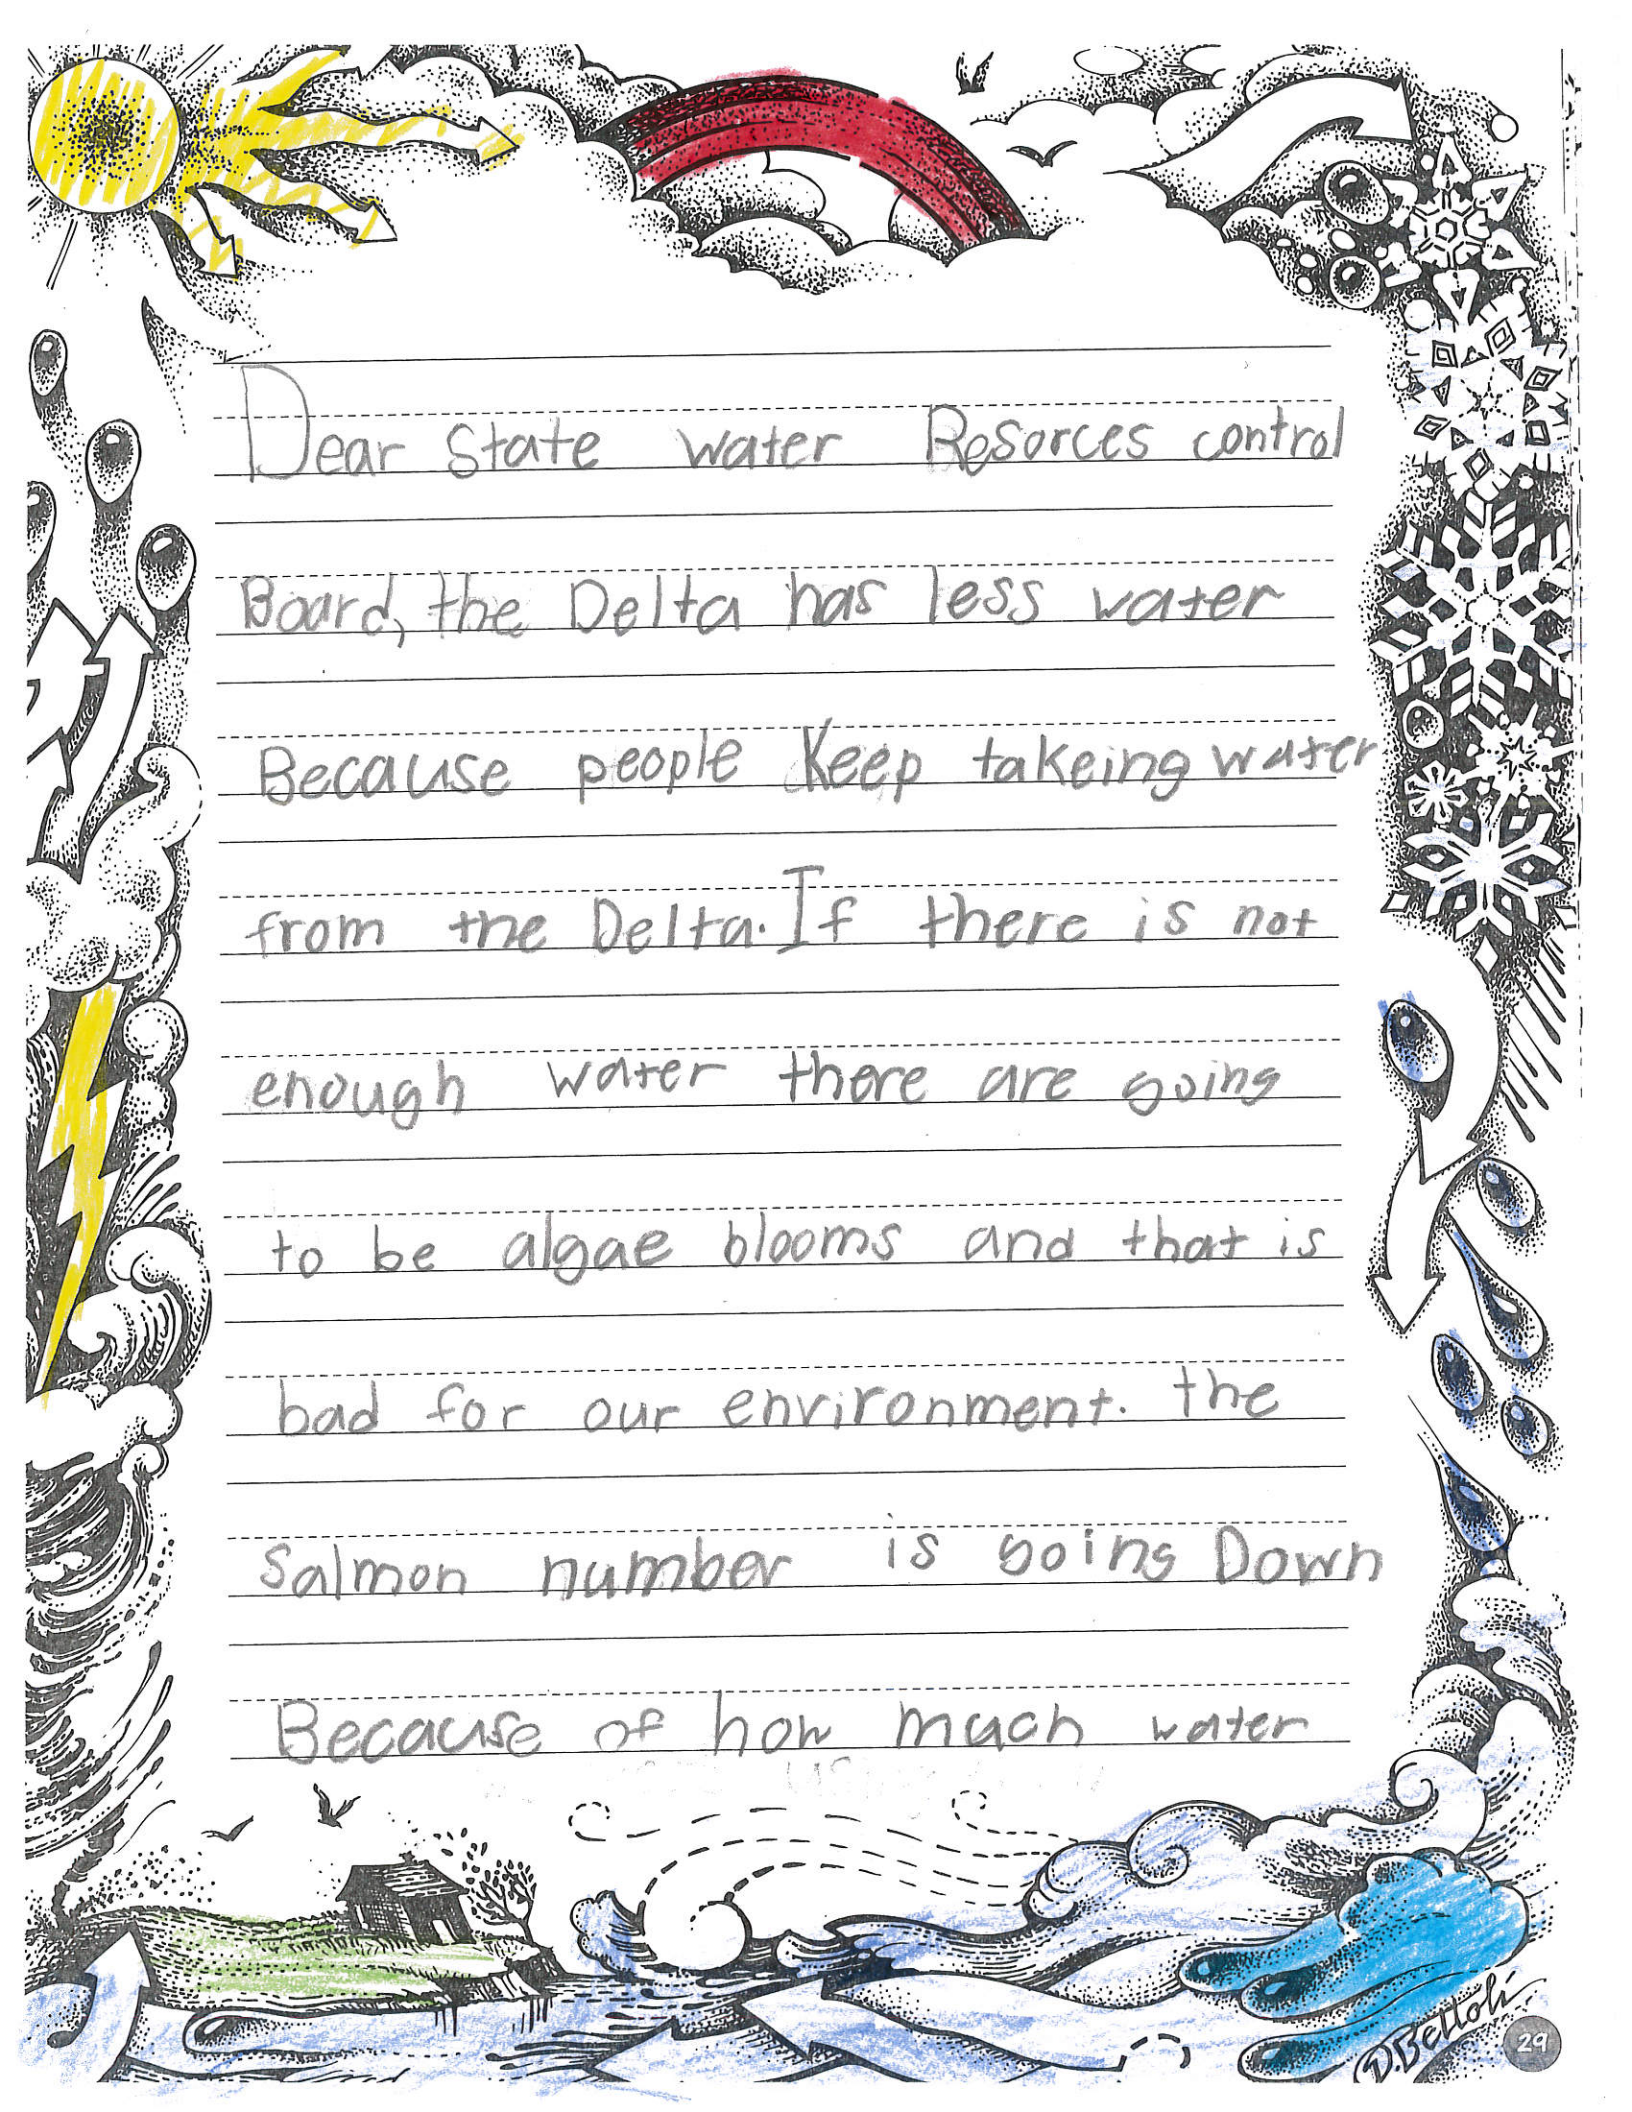

From a Earth
lover, Jackson

Dear State Water Resources
Control Board, please help the
Salmon because when the farmers
take the water from the Delta
the water is going down and then
the Salmon can not swim to
the ocean. Also the algae
bloom starts spreading and it
might be toxic and the Salmon

might breath it and ~~they~~ will die of breathing
the toxic water. Please help the Saburo live.

Love, James

Dear State water Resources control
Board, the Delta has less water
Because people keep takeing water
from the Delta. If there is not
enough water there are going
to be algae blooms and that is
bad for our environment. the
salmon number is going Down
Because of how much water

We were using from the Delta.

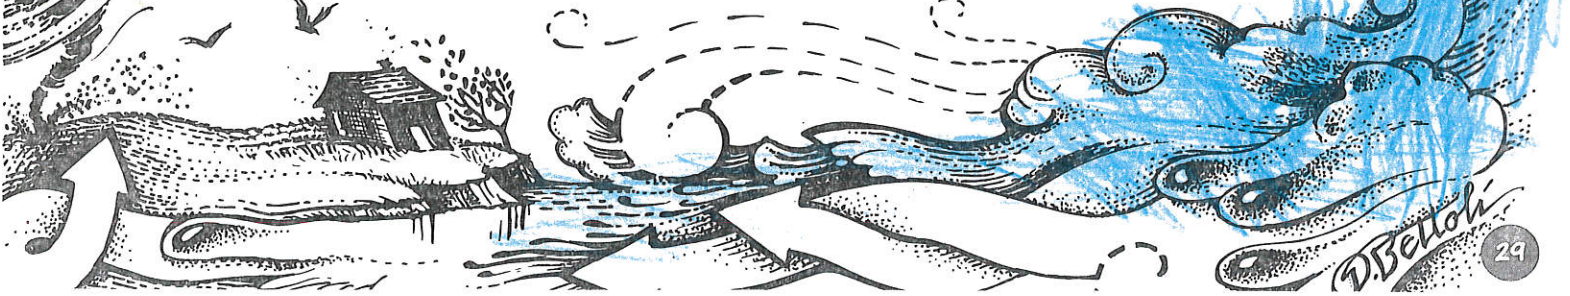

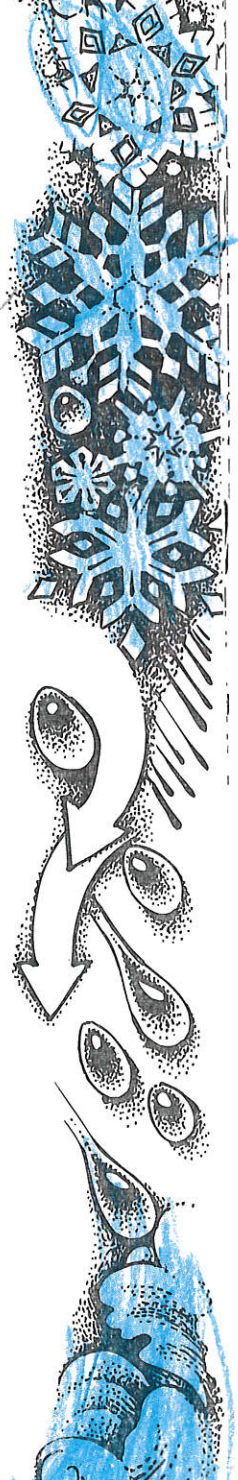

the salmon now do not hatch

were to lay their eggs because

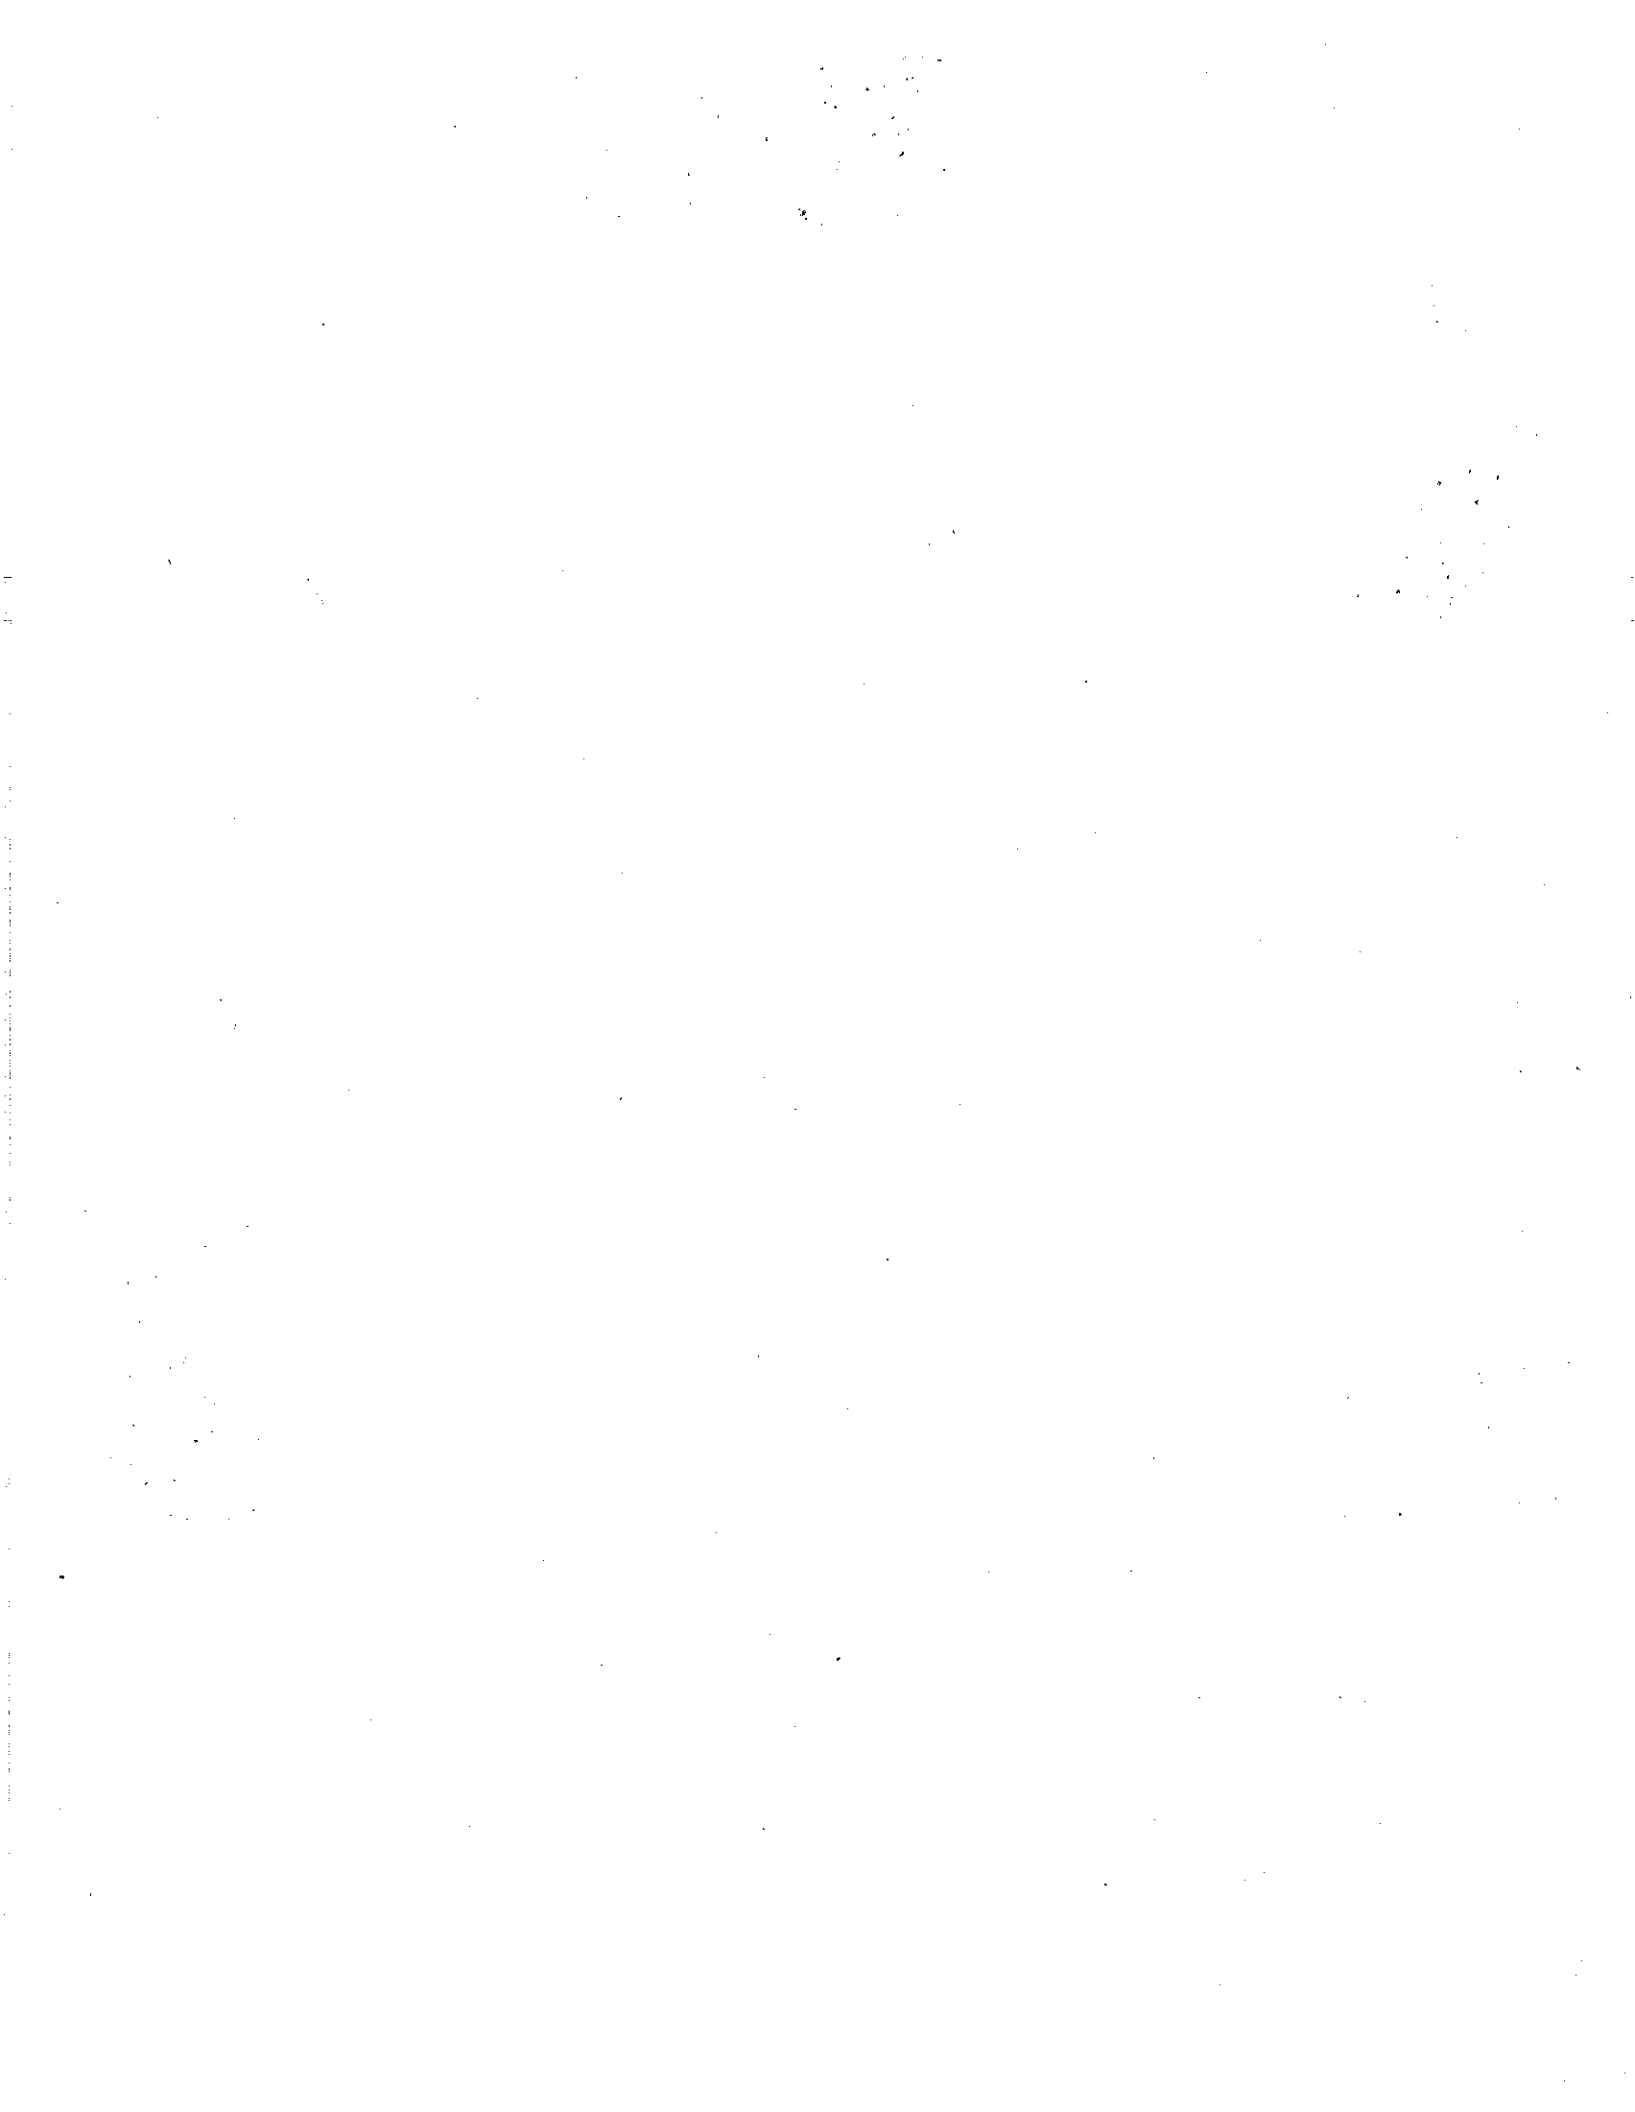

the farmers are taking the

water from the Delta.

Love, Eva

New State Water
 Resources Control Board
 Please have bill for the
 water from the Delta
 come to the Delta
 the board so I will be
 let to know if there will not
 be any business for the
 board on business. Amy Ethel

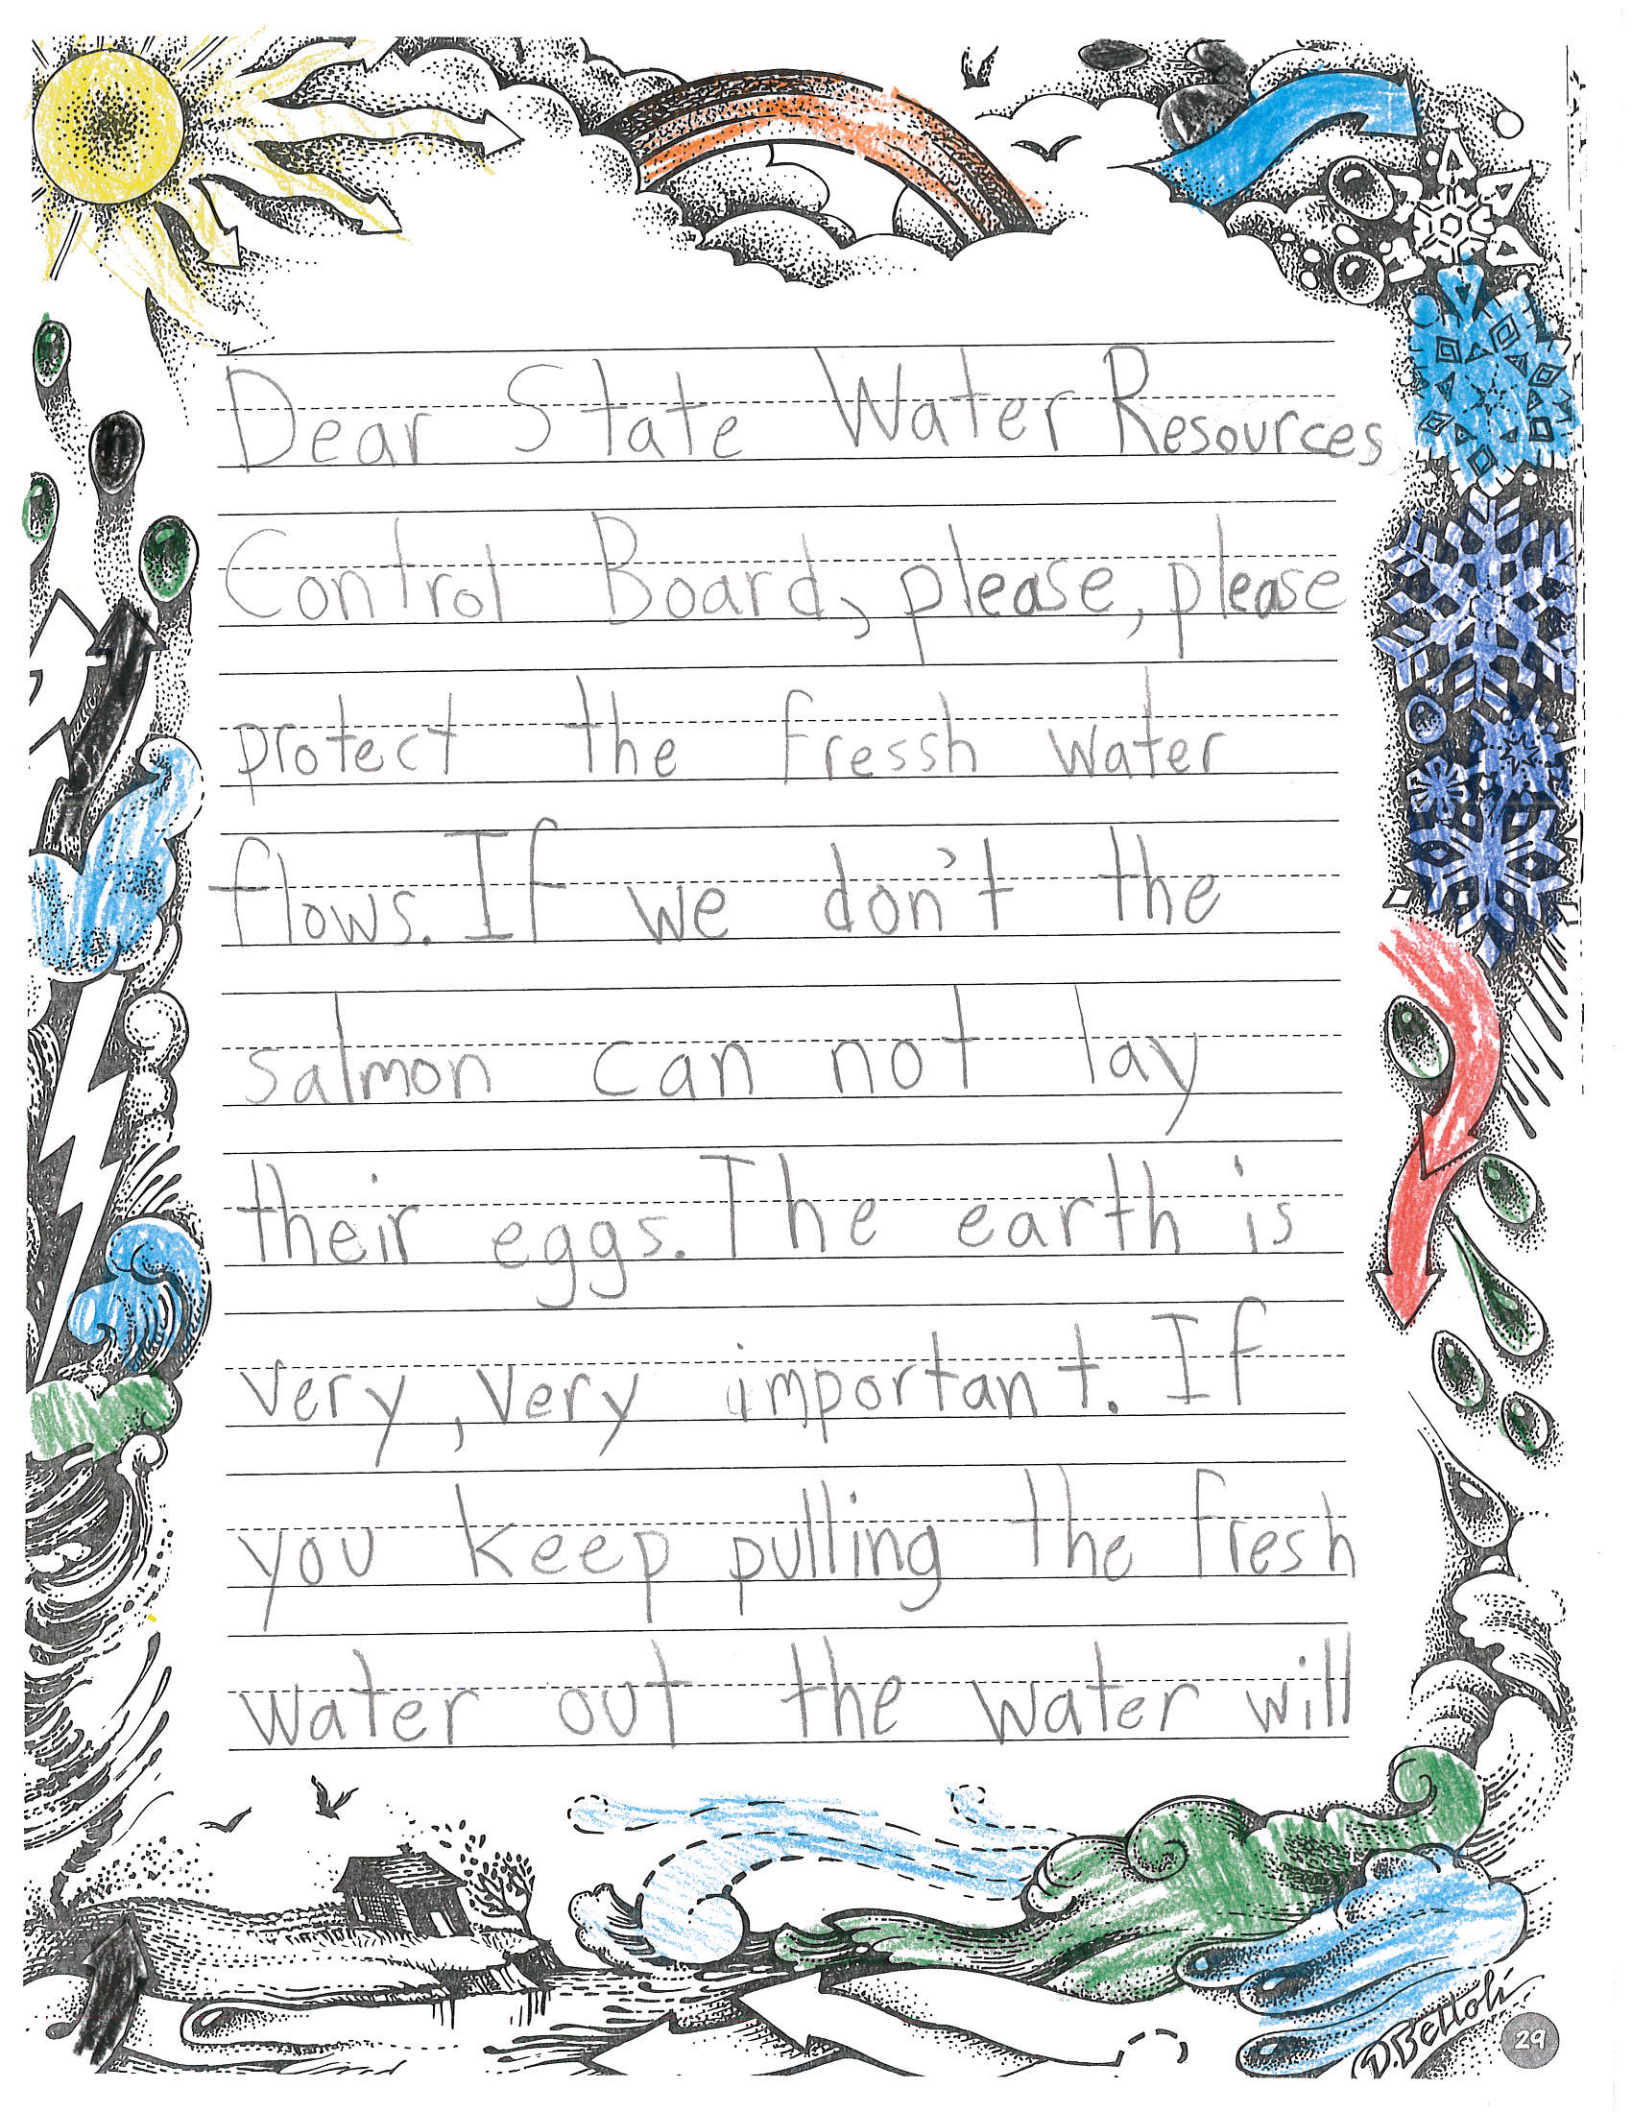

Dear State Water Resources
Control Board, please please
save the Delta water!
Because if there is
not alot of water in
the Delta it can warm
up and there can be
an algae bloom. So help
the Delta water from, here

Dear State Water Resources
Control Board, please, please
protect the fresh water
flows. If we don't the
salmon can not lay
their eggs. The earth is
very, very important. If
you keep pulling the fresh
water out the water will

get warmer and cause
toxic algal blooms. The blooms
might cause the Salmon to die!
We need the Salmon to eat.
And they are very fun to catch.

From, Penelope Frost
