Subject: comments A-2239(a)-(c)

I am a member of PNSSNS. I OPPOSE the draft Order and all 3 alternatives. I am OPPOSED to the proposed Order for E. San Joaquin which would affect all water quality coalitions in CA.

I own 9 acres near the town of Grass Valley of which only 4 acres can be irrigated. I do not currently irrigate except for my young shade trees and lawn area around my house. I have been a member of PNSSNS since 2003.

If I ever irrigate a crop or permanent planting of fruit trees or grapes in the future I would be using drip irrigation. My well is not near to any irrigation. my septic leech field is not near the well or any land that will be irrigated. I am not a commercial farmer/grower. I eat what my property produces. (Walnuts, apples, plums, pears which I don't intentionally irrigate). I have owned my property since 1985. I do have NID raw water at my property which is what I use for lawns and young shade trees. I do not use pesticides, fertilizers or herbicides on the 4 acres. I will be planting fall cover crops to increase the soil health.

thanks

Michael Marquardt
